Subject: CAP 2015 Diversion Estimate

Dear Paul:

Listed below are the Central Arizona Project's (CAP's) monthly Colorado River diversion estimates, to be pumped through the Mark Wilmer (Havasu) Pumping Plant, for calendar year 2015:

<u>Month</u>	<u>Acre-Feet</u>
January	180,000
February	96,000
March	152,000
April	175,000
May	181,000
June	130,000
July	90,000
August	89,000
September	129,000
October	136,000
November	133,000
December	<u>119,000</u>
TOTAL	1,610,000

Mr. Paul Matuska

Page 2

CAP has planned its 2015 diversions to divert Arizona's full 2.8 MAF apportionment. Monthly diversion estimates will be adjusted after we receive your forecast showing Arizona's mainstream uses.

CAP requests approval to adjust pumping to the amount shown on the USBR website. As the end of 2015 approaches, if it appears that Arizona will use less than its full apportionment, CAP may increase its diversions in November and December to use the full apportionment. In our efforts to monitor end-of-year uses, CAP staff will be consulting with your office, ADWR and Arizona's mainstream users. In the event that Arizona's final 2015 use is below its 2.8 MAF apportionment, we would expect the unused amount to remain in system storage.

To support the request for the estimated 2015 Colorado River diversion and the Part 417 Consultation process, a copy of the CAP 2013 Annual Report will be forwarded to you. The report provides current information that is pertinent to CAP's operating practices in the diversion, delivery, distribution and use of Colorado River water.

Sincerely,

Brian Henning, P.E.
Water Control Manager
Central Arizona Project
