Creation of Mexico's Water Reserve <sup>7</sup>	0	0	0										0
Total to Mexico in Satisfaction of Treaty Requirements	101,881	87,932	50,074										239,887
To Mexico in Excess of Treaty <sup>8</sup>	9,878	321	382										10,581
Accountable Deliveries to Mexico <sup>9</sup>	111,759	88,253	50,456										250,468
Water Bypassed Pursuant to IBWC Minute 242	9,420	13,299	4,783										27,502

Note: Annual totals may differ from the sum of the displayed monthly values due to rounding and conversion from TCM to AF.

Footnotes:

<sup>1</sup> Total flow in the river at the NIB as reported by IBWC; includes water passing to Mexico in excess of Treaty requirements and delivery of water from Mexico's Water Reserve, if any.

<sup>2</sup> Wasteway deliveries to the river Limitrophe via the Cooper, 11 Mile, and 21 Mile lateral wasteways in satisfaction of the Treaty requirements.

<sup>3</sup> Temporary emergency delivery of Colorado River water for the City of Tijuana is diverted at Lake Havasu by MWD and delivered via the Colorado River Aqueduct, MWD's, SDCWA's and Otay Water District's distribution systems pursuant to IBWC Minute 327.

<sup>4</sup> The Diversion Channel delivers water from the SIB confluence structure to the river or to the Bypass Drain. Consistent with a 2001 Memorandum of Understanding between Reclamation and the U.S. Section of the IBWC, IBWC Minute 242, and Section VI.B of IBWC Minute 323, during the months of September through December (Mexico's four critical months) water is discharged to the Bypass Drain and is not charged to the Treaty. During the months of January through August water is discharged to the river Limitrophe and is charged to the Treaty.

<sup>5</sup> That portion of the flows at NIB necessary to meet the total scheduled delivery to Mexico. Includes deliveries from Mexico's Water Reserve, if any.

<sup>6</sup> Water deferred by Mexico pursuant to Section IV of IBWC Minute 323 and Section IV.A.1 of the *Joint Report of the Principal Engineers with the Implementing Details of the Binational Water Scarcity Contingency Plan in the Colorado River Basin* dated July 11, 2019 (2019 Joint Report) and applied towards Mexico's Binational Water Scarcity Contingency Plan Contribution.

<sup>7</sup> Water deferred by Mexico pursuant to Section V of IBWC Minute 323. Mexico's Water Reserve includes Emergency Storage, Revolving Account, and Intentionally Created Mexican Allocation.

<sup>8</sup> Water passing to Mexico in excess of Mexico's monthly schedule. Calculated as the sum of daily differences between actual flows to Mexico and Mexico's total schedule.

<sup>9</sup> "Accountable Deliveries" are calculated as: Colorado River at NIB + Delivery at the Limitrophe + Diversion for Delivery at Tijuana + Delivery at SIB + Diversion Channel Discharge + Creation of Mexico's Water Reserve + Creation of Mexico's Recoverable Water Savings. It includes water passing to Mexico in excess of Mexico's daily schedule. It does not include water bypassed pursuant to IBWC Minute 242 or water discharged to the river Limitrophe via the Diversion Channel during Mexico's four critical months.
