Subject: America's National Parks Deserve Consideration and Participation in Colorado River Basin Decisions!

Dear Pam Adams,

Please consider removing Lake Powell and restoring Glen Canyon. The evaporation rate of the lake wastes millions of gallons of water that could be saved by diverting the river using an alternative method beyond a lake in the middle of a desert, and removing Lake Powell would restore the beautiful landscape of that area of southern Utah that the lake mars and buries.

Also, please take the many other national parks that the Colorado River flows through into consideration for this study.

Sincerely,  
Mr. Justin Faircloth
