Dear Bureau of Reclamation,

I am VERY disappointed and concerned that the National Parks Service did not have a voice in the study, nor did the resources of our national parks receive any serious consideration. I ask that Bureau include the National Parks Service in a more substantive way. Our national parks are a significant economic engine for the region (and most all regions) and all American parks deserve to be considered as significant stakeholders in any and all future planning.

Thank you for your consideration.

Laura Waterworth
