

Water supply and demand of the COLORADO RIVER

Dear Ms. Pam Adams,

As a whitewater boater, I am concerned with projected water supply and demand imbalances in the Colorado Basin and ask that flows to support boating are protected.

I love to spend my summers and springs in the rivers boating. I have recently just become addicted to boating, so it is important to me that I can spend as much time in the rivers improving and having fun with my friends and family.

Thank you for your efforts in working to ensure that whitewater boating needs are considered as Reclamation assesses supply and demand in the Basin over the next 50 years, and for considering my comments.

Respectfully submitted,

Naomi Major
