## Riverside Corona Feeder Realignment

**SCH Number:** 2003031121

**Document Type:** JD - Joint Document

**Alternate Title:** Riverside Corona Feeder (RCF) Project

**Project Lead Agency:** Western Municipal Water District

---

### Project Description

The project is proposed to store excess imported water when it is available to increase firm water supplies, to improve water quality, and to reduce water costs. The project proposes to manage the groundwater levels through the construction of groundwater wells in the San Bernardino Basin Area and pumps to deliver the groundwater supply to water users. The project will also include a new water pipeline to serve portions of San Bernardino and Riverside counties. This system of storage, extraction and distribution will improve the reliability of WMWD's water supply through the managed storage and distribution of excess imported water and reduce possible water shortages during dry years through reduced dependence on imported water during dry year conditions. To achieve this purpose, the FCF project replenishes excess State Water Project (SWP) water supplied by Metropolitan Water District of Southern California (MWD) into the San Bernardino Groundwater Basin Area, and extracts and moves water throughout the region by way of interconnections between local groundwater basins.

**Project Title: Riverside-Corona Feeder ("RCF") Realignment**

**Project Location:** This project will include approximately 30 miles of major feeder pipeline and related facilities located from the city of San Bernardino, San Bernardino County on the northeast, to the city of Corona, Riverside County on the southwest. The project facilities will run northeast to southwest and generally parallel to the 215/91 Freeway and the Santa Ana River.

The majority of the project will be located within street rights-of-way in the Jurupa area of unincorporated Riverside County, portions of San Bernardino County, and cities of San Bernardino, Colton, Rialto, Riverside, and Corona, and crossing the Santa Ana River near Van Buren Boulevard in the city of Riverside. The project is within portions of Township 1 South, Range 4 West; Township 1 South, Range 5 West; Township 2 South, Range 5 West; Township 2 South, Range 6 West; Township 3 South, Range 5 West; and Township 3 South, Range 6 West; San Bernardino Base & Meridian. (From approximately Latitude/Longitude: 34°04' 47" North/117° 17' 18" West to approximately Latitude/Longitude: 33°54' 21" North/117° 25' 25" West.)

**Project Description:** Western Municipal Water District (WMWD) is proposing to build the Riverside-Corona Feeder ("RCF") project which includes a large-capacity water pipeline ranging in diameter up to 78 inches, up to 20 new and existing wells, and appurtenant facilities associated with aquifer storage and recovery. The project includes federal funding through the Bureau of Reclamation.

The proposed project is a realignment of the RCF previously evaluated in the *Final Programmatic Environmental Impact Report for the Riverside-Corona Feeder* (PEIR) certified in May 2005 (SCH #2003031121). The RCF would deliver water from the San Bernardino Groundwater Basin (Bunker Hill) and Chino groundwater basin (Chino Basin). Imported water supplies would be recharged into the Bunker Hill basin area for later use, taking advantage of available storage capacity. The realignment will not change the number of wells or the Bunker Hill groundwater extraction process described in the 2005 PEIR. Groundwater supplies are also available to the RCF realignment from the Chino Basin under the Optimum Basin Management Plan from existing desalter facilities.

The project originally included eight segments, Reaches A through H in the 2005 PEIR. The project, as currently proposed, realigns Reaches A through G, with Reach H remaining as proposed in the original project. Additional connection facilities were also added to the project in 2009, including a new well field for five (5) of the 20 wells located east of the well fields analyzed in 2005, two (2) additional pump stations, one (1) five-million gallon reservoir, and connecting pipelines. The Supplemental EIR analyzes those realigned/added facilities. The EIS analyzes the entire project, as noted following each facility listed below. The project includes the following segments and facilities from north to south:

- Central Feeder Connection – a pipeline connecting to the existing Central Feeder and an additional well field (SEIR/EIS)
- Northern Reach – pipeline and previously analyzed well field locations (SEIR/EIS)
- Central Reach – pipeline, a portion of which crosses the Santa Ana River (SEIR/EIS)
- Clay Street Connection – pump station and pipeline to connect project to Chino Basin desalter facilities (SEIR/EIS)

- Mockingbird Connection – pipelines, 5-million gallon reservoir, and pump station (former Reach E) (SEIR/EIS)
- Reach F<sup>1</sup> - pipeline (EIS)
- Reach G<sup>1</sup> – pipeline connecting to Arlington pump station (EIS)
- La Sierra Pipeline Connection – pipeline (SEIR/EIS)
- Reach H – pipeline (EIS)

**Potentially Significant Environmental Effects:** The Initial Study prepared and circulated for public review on the Riverside-Corona Feeder Pipeline Realignment project along with scoping input, concluded that the proposed project would not result in significant impacts to the following: Agricultural Resources, Geology/Soils, Mineral Resources, Population/Housing, Public Services, Recreation, and Utilities/Service Systems. These issue areas are not discussed further in the Draft SEIR/EIS.

The Draft SEIR/EIS analysis determined there would be no impacts or less than significant impacts related to long-term operational Air Quality, short-term greenhouse gas (GHG) emissions and consistency with the California Air Resources Board Scoping Plan, direct effects on Groundwater Quality, or Land Use/Planning due to the nature of project construction and operations, implementation of design considerations, and/or compliance with standard regulations. As a result, no mitigation measures are required.

The Draft SEIR/EIS determined that the following issue areas have potentially significant environmental impacts that will be mitigated to below a level of significance: Aesthetics, Biological Resources, Cultural Resources, Energy, Groundwater Levels, Indirect Groundwater Quality, Hazards and Hazardous Materials, Noise, Stormwater/Water Quality, and Transportation and Traffic.

The following issue areas have impacts that are significant and unavoidable requiring a statement of overriding considerations: short-term construction-related Air Quality and operational GHG. Emissions are below *de minimis* thresholds for federal Clean Air Act conformity applicability.

Potential cumulative impacts were analyzed and the conclusions are consistent with the project-specific effects listed above, except that long-term GHG effects may result in significant unavoidable cumulative impacts.

**Listed Toxic Site:** The project does not involve a toxic site listed pursuant to Government Code Section 65962.5.

**Public Review:** Copies of the Draft SEIR/EIS and all documents referenced therein are available for review at WMWD offices, 14205 Meridian Parkway, Riverside, CA 92518, from January 20, 2011 through March 8, 2011. A copy of the Draft SEIR/EIS is also available for public review at the following libraries: University of California at Riverside, Tomas Rivera Library, 3401 Watkins Drive, Riverside, CA 92521; City of Riverside, Arlington Branch Library, 9556 Magnolia Avenue, Riverside, California, 92503; Glen Avon Public Library, 9244 Galena Street, Riverside, CA 92509; Colton Public Library, 656 North 9th Street, Colton, CA 92324; Corona Public Library, 650 South Main Street, Corona, CA 92882; Mentone Library, 1870 Mentone Boulevard, Mentone, CA 92359; San Bernardino Public Library, 555 West 6th Street, San Bernardino, CA 92410; and on the WMWD website at [www.wmwd.com](http://www.wmwd.com).

Comments on the Draft SEIR/EIS may be made in writing, and should be sent no later than **March 8, 2011** to:

LEAD AGENCY (CEQA):  
 Fakhri Manghi, Senior Water Resource Engineer  
 Western Municipal Water District  
 14205 Meridian Parkway  
 Riverside, CA 92518  
 fmanghi@wmwd.com

The National Environmental Protection Act review is being conducted concurrently with the California Environmental Quality Act process. A notice has been published in the Federal Register and the draft document is also available at the Bureau of Reclamation, Southern California Area Office, 27708 Jefferson Avenue, Suite 202, Temecula, CA 92590 and on the Reclamation website at <http://www.usbr.gov/lc/socal/envdocs.html>.

---

<sup>1</sup> Reaches E, F, and G were re-evaluated and **Reaches F and G** were refined slightly in 2007, as analyzed in the *Final Environmental Impact Report for the La Sierra Avenue Water Transmission Pipeline Project* (SCH #2006101152) which was certified by WMWD on February 20, 2008. The refined alignment for Reaches F and G will remain consistent with the approvals in this 2008 Refinement EIR.

**DEPARTMENT OF THE INTERIOR****Bureau of Reclamation****Bunker Hill Groundwater Basin,  
Riverside-Corona Feeder Project, San  
Bernardino and Riverside Counties,  
CA**

**AGENCY:** Bureau of Reclamation,  
Interior.

**ACTION:** Notice of availability.

**SUMMARY:** Pursuant to the National  
Environmental Policy Act (NEPA) and  
the California Environmental Quality  
Act (CEQA), the Bureau of Reclamation  
(Reclamation) and the Western  
Municipal Water District (Western) have  
prepared a Supplemental Draft  
Environmental Impact Report and a  
Draft Environmental Impact Statement  
(SDEIR/DEIS) for the proposed  
Riverside-Corona Feeder (RCF) Project.  
Interested parties are invited to  
comment on the SDEIR/DEIS.

The Federal action will provide funds  
for a proposed aquifer storage and  
recovery project, including new  
groundwater wells and a 28-mile water  
pipeline with pump stations and a  
reservoir storage tank. The project is  
intended to improve the reliability of  
Western's water supply through  
managed storage, extraction and  
distribution of local and imported water  
supplies, using available capacity in the  
Bunker Hill Groundwater Basin and the  
Chino Basin.

**DATES:** Submit written comments on the  
SDEIR/DEIS by March 22, 2011.

**ADDRESSES:** Send written comments to  
Mrs. Amy Witherall, SCAO-7300,  
Bureau of Reclamation, Southern  
California Area Office, 27708 Jefferson  
Avenue, Suite 202, Temecula, CA  
92590; facsimile (951) 695-5319; e-mail:  
[awitherall@usbr.gov](mailto:awitherall@usbr.gov).

**FOR FURTHER INFORMATION CONTACT:** Mrs.  
Amy Witherall, telephone (951) 695-  
5310; facsimile (951) 695-5319; e-mail:  
[awitherall@usbr.gov](mailto:awitherall@usbr.gov).

**SUPPLEMENTARY INFORMATION:** The  
SDEIR/DEIS can be downloaded from  
our Web site: <http://www.usbr.gov/lc/socal/envdocs.html>. Copies are also  
available for public review and  
inspection at the following locations:

- Bureau of Reclamation, Lower Colorado Regional Office, 500 Fir Street, Boulder City, Nevada 89005
- Bureau of Reclamation, Southern California Area Office, 27708 Jefferson Avenue, Suite 202, Temecula, California 92590
- Western Municipal Water District, 14205 Meridian Parkway, Riverside, California 92518
- San Bernardino Public Library, 555 West 6th Street, San Bernardino, California 92410
- Corona Public Library, 650 South Main Street, Corona, California 92882
- Riverside Public Library, 9556 Magnolia Avenue, Riverside, California 92503

#### Authority

This notice is provided pursuant to NEPA, 42 U.S.C. 4332(2)(c), and Department of the Interior regulations for the implementation of NEPA, 43 CFR Part 46.

Section 9112 of the Omnibus Public Land Management Act of 2009 (Public Law 111–11, 123 Stat. 1318), signed by the President on March 30, 2009, authorizes the Secretary of the Interior, in cooperation with Western, to participate in the planning, design, and construction of the Riverside-Corona Feeder Project including: (i) 20 groundwater wells; (ii) groundwater treatment facilities; (iii) water storage and pumping facilities; and (iv) 28 miles of pipeline in San Bernardino and Riverside Counties in the State of California.

#### Background

The proposed project will install up to 20 groundwater wells in the Bunker Hill Groundwater Basin, San Bernardino County, California. Existing recharge basins will be used to store imported water and local Santa Ana River flows in the Bunker Hill Groundwater Basin when supplies are available. The stored groundwater will be extracted later for delivery to communities in Western's service area in Riverside County, California, via 28 miles of pipeline ranging in diameter up to 78 inches, capable of delivering up to 40,000 acre-feet per year of groundwater at 100 cubic feet per second. The first phase of the project will also provide access to groundwater from the Chino Basin in San Bernardino County.

The currently proposed RCF alignment is a modification to a project previously evaluated by Western in 2005 and revised in 2008. The original project included eight segments, Reaches A through H, analyzed in the Programmatic Environmental Impact Report (PEIR) for the Riverside-Corona

Feeder, California State Clearinghouse (SCH) No. 2003031121, certified by Western on May 18, 2005. Reaches E, F, and G were refined slightly in 2007 and evaluated in the Environmental Impact Report for the La Sierra Avenue Water Transmission Pipeline Project (SCH No. 2006101152), certified by Western on February 20, 2008. Western issued a Notice of Preparation of a draft Supplemental Program EIR on July 30, 2008, to evaluate a change in the pipeline alignment. Reclamation issued a Notice of Intent (NOI) to prepare an Environmental Impact Statement on February 24, 2010 (75 FR 8395).

The new alignment will not change the number of wells or the Bunker Hill groundwater extraction described in the 2005 PEIR, but will now allow Western to access available groundwater from existing desalter facilities in Chino Basin under an approved Optimum Basin Management Plan. The current project includes realignment of Reaches A through D, now referred to as the Northern and Central Reaches, with Reach H remaining as proposed in the original project. The refined alignment for Reaches E, F, and G will remain consistent with the approvals in the 2008 EIR.

Additional connection facilities were added to the project including a new well field for five (5) of the 20 wells, two (2) additional pump stations, one (1) five-million gallon reservoir, and connecting pipelines.

Reclamation is incorporating the two previous CEQA Environmental Impact Reports by reference. They are included as appendices to the draft SDEIR/DEIS.

#### Public Disclosure

Before including your name, address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Consent Decree Under The Clean Air Act

Notice is hereby given that on January 13, 2011, a proposed Consent Decree in *United States et al. v. Northern Indiana Public Service Co.*, Civil Action No. 2:11–cv–016, was filed with the United States District Court for the Northern District of Indiana.

In this action, the United States and Indiana sought penalties and injunctive relief for the Defendants' violations of the Clean Air Act, 42 U.S.C. 7401 *et seq.*, and the Indiana Code 13–13–5–1 and 13–13–5–2, at its four coal-fired power plants in Chesterton, Michigan City, Wheatfield, and Gary, Indiana.

To resolve the United States' and Indiana's claims, the Defendants will pay a penalty of \$3.5 million, and will install or upgrade air emission controls at three of its plants, and cease operations at its fourth plant in Gary, Indiana. In addition, the Defendant will perform environmental mitigation projects costing at least \$9.5 million.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree.

Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to [pubcomment-ees.enrd@usdoj.gov](mailto:pubcomment-ees.enrd@usdoj.gov) or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, D.C. 20044–7611, and should refer to either: *United States et al. v. Northern Indiana Public Service Co.*, Civil Action No. 2:11–cv–016, or D.J. Ref. 90–5–2–1–08417. The Consent Decree may be examined at the Office of the United States Attorney, Northern District of Indiana, 5400 Federal Plaza, Suite 1500, Hammond, Indiana 46320, and at the United States Environmental Protection Agency, 77 W. Jackson Blvd., Chicago, Illinois 60604. During the public comment period, the Consent Decree may also be examined on the following Department of Justice Web site, [http://www.usdoj.gov/enrd/Consent\\_Decrees.html](http://www.usdoj.gov/enrd/Consent_Decrees.html). A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood ([tonia.fleetwood@usdoj.gov](mailto:tonia.fleetwood@usdoj.gov)), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check, payable to the U.S. Treasury, in the amount of \$26.00 (25 cents per page

#### [Reclamation, Western MWD Seek Comments on Riverside-Corona Feeder Project Supplemental Draft EIR/Draft EIS](#)

TEMECULA, CA. The Bureau of Reclamation and Western Municipal Water District are seeking comments on a supplemental draft environmental impact report/draft environmental impact statement (SDEIR/DEIS) for the construction of a proposed aquifer storage and recovery project. The project is designed to help supply water to up to 80,000 families in California's Riverside and San Bernardino counties. An electronic copy of the draft document is available at: [www.usbr.gov/lc/socal/envdocs.html](http://www.usbr.gov/lc/socal/envdocs.html).

#### [Western Director Evans to chair powerful MWD committee](#)

RIVERSIDE, CA – January 11, 2011 – Thomas P. Evans, Western Municipal Water District's board member and agency representative to the Metropolitan Water District of Southern California, will serve as Chairman of Metropolitan's influential Engineering and Operations Committee for 2011. The appointment also places Director Evans on Metropolitan's Executive Board Committee.

Notice Type: GPN - GOVT PUBLIC NOTICE

Ad Description: PROJECT: RIVERSIDE-CORONA FEEDER ("RCF")  
REALIGNMENT

I am a citizen of the United States and a resident of the State of California; I am over the age of eighteen years, and not a party to or interested in the above entitled matter. I am the principal clerk of the printer and publisher of the SAN BERNARDINO COUNTY SUN, a newspaper published in the English language in the city of SAN BERNARDINO, county of SAN BERNARDINO, and adjudged a newspaper of general circulation as defined by the laws of the State of California by the Superior Court of the County of SAN BERNARDINO, State of California, under date 06/20/1952, Case No. 73084. That the notice, of which the annexed is a printed copy, has been published in each regular and entire issue of said newspaper and not in any supplement thereof on the following dates, to-wit:

01/20/2011

Executed on: 01/20/2011  
At Los Angeles, California

I certify (or declare) under penalty of perjury that the foregoing is true and correct.

*Helen Tang*

**NOTICE OF COMPLETION & AVAILABILITY of a DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT and DRAFT ENVIRONMENTAL IMPACT STATEMENT (SEIR/EIS) for the Riverside-Corona Feeder Realignment State Clearing-house No. 2003031121 Department of Interior Filing No. DES 11-01**

To: Responsible Agencies, Trustee Agencies, and Interested Parties

**Lead Agency (CEQA):**  
Western Municipal Water District  
14205 Meridian Parkway  
Riverside, CA 92518

**Lead Agency (NEPA):**  
U.S. Department of Interior,  
Bureau of Reclamation  
27708 Jefferson Ave., #202  
Temecula, CA 92590

**Project Title: Riverside-Corona Feeder ("RCF") Realignment**

**Project Location:** This project will include approximately 30 miles of major feeder pipeline and related facilities located from the city of San Bernardino, San Bernardino County on the northeast, to the city of Corona, Riverside County on the southwest. The project facilities will run northeast to southwest and generally parallel to the 215/91 Freeway and the Santa Ana River.

The majority of the project will be located within street rights-of-way in the Jurupa area of unincorporated Riverside County, portions of San Bernardino County, and cities of San Bernardino, Colton, Rialto, Riverside, and Corona, and crossing the Santa Ana River near Van Buren Boulevard in the city of Riverside. The project is within portions of Township 1 South, Range 4 West; Township 1 South, Range 5 West; Township 2 South, Range 5 West; Township 2 South, Range 6 West; Township 3 South, Range 5 West; and Township 3 South, Range 6 West; San Bernardino Base & Meridian. (From approximately Latitude/Longitude: 34°04' 47" North/117° 17' 18" West to approximately Latitude/Longitude: 33°54' 21" North/117° 25' 25" West.)

**Project Description:** Western Municipal Water District (WMWD) is proposing to build the Riverside-Corona Feeder ("RCF") project which includes a large-capacity water pipeline ranging in diameter up to 78 inches, up to 20 new and existing wells, and appurtenant facilities associated with aquifer storage and recovery. The project includes federal funding through the Bureau of Reclamation. The proposed project is a realignment

\* A 0 0 0 0 0 2 0 2 3 5 6 5 \*

storage and recovery. The project includes federal funding through the of the RCF previously evaluated in the Final Programmatic Environmental Impact Report for the Riverside-Corona Feeder (PEIR) certified in May 2005 (SCH #2003031121). The RCF would deliver water from the San Bernardino Groundwater Basin (Bunker Hill) and Chino groundwater basin (Chino Basin). Imported water supplies would be recharged into the Bunker Hill basin area for later use, taking advantage of available storage capacity. The realignment will not change the number of wells or the Bunker Hill groundwater extraction process described in the 2005 PEIR. Groundwater supplies are also available to the RCF realignment from the Chino Basin under the Optimum Basin Management Plan from existing desalter facilities.

The project originally included eight segments, Reaches A through H in the 2005 PEIR. The project, as currently proposed, realigns Reaches A through G, with Reach H remaining as proposed in the original project. Additional connection facilities were also added to the project in 2009, including a new well field for five (5) of the 20 wells located east of the well fields analyzed in 2005, two (2) additional pump stations, one (1) five-million gallon reservoir, and connecting pipelines. The Supplemental EIR analyzes those realigned/added facilities. The EIS analyzes the entire project, as noted following each facility listed below. The project includes the following segments and facilities from north to south:

- Central Feeder Connection - a pipeline connecting to the existing Central Feeder and an additional well field (SEIR/EIS)
- Northern Reach - pipeline and previously analyzed well field locations (SEIR/EIS)
- Central Reach - pipeline, a portion of which crosses the Santa Ana River (SEIR/EIS)
- Clay Street Connection - pump station and pipeline to connect project to Chino Basin desalter facilities (SEIR/EIS)
- Mockingbird Connection - pipelines, 5-million gallon reservoir, and pump station (former Reach E) (SEIR/EIS)
- Reach F(1) - pipeline (EIS)
- Reach G - pipeline connecting to Arlington pump station (EIS)
- La Sierra Pipeline Connection - pipeline (SEIR/EIS)
- Reach H - pipeline (EIS)

**Potentially Significant Environmental Effects:** The Initial Study prepared and circulated for public review on

**Potentially Significant**  
 the Riverside-Corona Feeder Pipeline Realignment project along with scoping input, concluded that the proposed project would not result in significant impacts to the following: Agricultural Resources, Geology/Soils, Mineral Resources, Population/Housing, Public Services, Recreation, and Utilities/Service Systems. These issue areas are not discussed further in the Draft SEIR/EIS.

The Draft SEIR/EIS analysis determined there would be no impacts or less than significant impacts related to long-term operational Air Quality, short-term greenhouse gas (GHG) emissions and consistency with the California Air Resources Board Scoping Plan, direct effects on Groundwater Quality, or Land Use/Planning due to the nature of project construction and operations, implementation of design considerations, and/or compliance with standard regulations. As a result, no mitigation measures are required.

The Draft SEIR/EIS determined that the following issue areas have potentially significant environmental impacts that will be mitigated to below a level of significance: Aesthetics, Biological Resources, Cultural Resources, Energy, Groundwater Levels, Indirect Groundwater Quality, Hazards and Hazardous Materials, Noise, Stormwater/Water Quality, and Transportation and Traffic.

The following issue areas have impacts that are significant and unavoidable requiring a statement of overriding considerations: short-term construction-related Air Quality and operational GHG. Emissions are below de minimis thresholds for federal Clean Air Act conformity applicability. Potential cumulative impacts were analyzed and the conclusions are consistent with the project-specific effects listed above, except that long-term GHG effects may result in significant unavoidable cumulative impacts. **Listed Toxic Site:** The project does not involve a toxic site listed pursuant to Government Code Section 65962.5.

**Public Review:** Copies of the Draft SEIR/EIS and all documents referenced therein are available for review at WMWD offices, 14205 Meridian Parkway, Riverside, CA 92518, from January 20, 2011 through March 8, 2011. A copy of the Draft SEIR/EIS is also available for public review at the following libraries: University of California at Riverside, Tomas Rivera Library, 3401 Watkins Drive, Riverside, CA 92521; City of Riverside, Arlington Branch Library, 9556 Magnolia Avenue, Riverside, California, 92503; Glen Avon Public Library, 9244 Galena Street, Riverside, CA 92500.

University of California at Riverside, Tomas Rivera Library, 3401 Watkins Drive, Riverside, CA 92521; Colton Public Library, 656 North 9th Street, Colton, CA 92324; Corona Public Library, 650 South Main Street, Corona, CA 92882; Mentone Library, 1870 Mentone Boulevard, Mentone, CA 92359; San Bernardino Public Library, 555 West 6th Street, San Bernardino, CA 92410; and on the WMWD website at [www.wmwd.com](http://www.wmwd.com).

Comments on the Draft SEIR/EIS may be made in writing, and should be sent no later than **March 8, 2011** to:

**LEAD AGENCY (CEQA):**
