| Municipal | Naval Enclave | within Camp Pendleton |
| Domestic | Naval Enclave | within Camp Pendleton |
| Irrigation | Naval Enclave | |

The place of use is shown on map filed with the State Water Resources Control Board.
5. The water appropriated shall be limited to the quantity which can be
beneficially used and shall not exceed 165,000 acre-feet per annum to be
collected from January 1 to December 31 of each year.

6. The amount authorized for appropriation may be reduced in the license if
investigation warrants.

7. Construction work shall be completed by December 31, 1990.

8. Complete application of the water to the authorized use shall be made by
December 31, 1996.

9. Progress reports shall be submitted promptly by permittee when requested by
the State Water Resources Control Board until license is issued.

10. Permittee shall allow representatives of the State Water Resources Control
Board and other parties as may be authorized from time to time by said Board,
reasonable access to project works to determine compliance with the terms of
this permit.

11. Pursuant to California Water Code Sections 100 and 275, and the common law
public trust doctrine, all rights and privileges under this permit and under
any license issued pursuant thereto, including method of diversion, method of
use, and quantity of water diverted, are subject to the continuing authority of
the State Water Resources Control Board in accordance with law and in the
interest of the public welfare to protect public trust uses and to prevent
waste, unreasonable use, unreasonable method of use or unreasonable method of
diversion of said water.

The continuing authority of the Board may be exercised by imposing specific
requirements over and above those contained in this permit with a view to
eliminating waste of water and to meeting the reasonable water requirements of
permittees without unreasonable draft on the source. Permittee may be required to
implement a water conservation plan, features of which may include but not
necessarily be limited to: (1) reusing or reclaiming the water allocated; (2)
using water reclaimed by another entity instead of all or part of the water
allocated; (3) restricting diversions so as to eliminate agricultural tailwater
or to reduce return flow; (4) suppressing evaporation losses from water
surfaces; (5) controlling phreatophytic growth; and (6) to installing, maintain-
ing, and operating efficient water measuring devices to assure compliance with
the quantity limitations of this permit and to determine accurately water use
as against reasonable water requirements for the authorized project. No action
will be taken pursuant to this paragraph unless the Board determines, after
notice to affected parties and opportunity for hearing, that such specific
requirements are physically and financially feasible and are appropriate to the
particular situation. The continuing authority of the Board also may be
exercised by imposing further limitations on the diversion and use of water by
the permittee in order to protect public trust uses. No action will be taken
pursuant to this paragraph unless the Board determines, after notice to
affected parties and opportunity for hearing, that such action is consistent
with California Constitution Article X, Section 2; is consistent with the
public interest and is necessary to preserve or restore the uses protected by
the public trust.

12. The quantity of water diverted under this permit and under any license
issued pursuant thereto is subject to modification by the State Water Resources
Control Board if, after notice to the permittee and an opportunity for hearing,
the Board finds that such modification is necessary to meet water quality
objectives in water quality control plans which have been or hereafter may be
established or modified pursuant to Division 7 of the Water Code. No action
will be taken pursuant to this paragraph unless the Board finds that (1)
adequate waste discharge requirements have been prescribed and are in effect
with respect to all waste discharges which have any substantial effect upon
water quality in the area involved, and (2) the water quality objectives cannot
be achieved solely through the control of waste discharges.
19. The State Water Resources Control Board reserves jurisdiction over this permit to impose further conditions in the public interest pursuant to Water Code Sections 1243, 1243.5, 1253, and 1257, and pursuant to the Board's public trust authority to include measures necessary to mitigate significant environmental impacts of the project. All such conditions and measures shall conform to the standard of reasonableness contained in Article X, Section 2 of the California Constitution. Action by the Board will be taken only after notice to interested parties and an opportunity for hearing.

This permit is issued and permits it subject to the following provisions of the Water Code:

Section 1280. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1291. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriation of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1295. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), or under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

DOMESTIC, AND MUNICIPAL USES WITHIN THE CAMP PENDLETON NAVAL ENCLAVE WITHIN T6S,
SHOWN ON MAP FILED WITH STATE WATER RESOURCES CONTROL BOARD.

LICENSEE SHALL ALLOW REPRESENTATIVES OF THE STATE WATER RESOURCES CONTROL
BOARD REASONABLE ACCESS CONSISTENT WITH NATIONAL SECURITY TO PROJECT WORKS TO
DETERMINE COMPLIANCE WITH THE TERMS OF THIS LICENSE.
Licenses shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to projects to determine compliance with the terms of this license.

All rights and privileges under this license, including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The license must be kept in the possession of the licensee and must be produced upon demand. The Board may require the licensee to furnish a bond in the amount of ten times the monthly average of the last three months' contribution to the reservoir. Such bond may be kept in the possession of the Board in lieu of the license. The Board may also require the licensee to furnish evidence of financial responsibility, such as a bond or other security, to ensure compliance with the terms of this license.

Reports shall be filed promptly by licensees on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby conferred to the diversion and use of water is restricted to the points or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1926. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1929. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1937. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1938. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriate water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1939. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid for the land therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1950. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1931. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State shall desire to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
