Weekly Fish and Water Operations Outlook

12/02/2025 – 12/08/2025

Water Project Operational Intent for Week

CVP and SWP operations are expected to be primarily governed by D-1641 standards such as required minimum Delta Outflow, the Rock Slough daily maximum salinity standard (250 Chlorides) and the maximum allowable Export to Inflow ratio of 0.65.

Biological Context

DCC gates are expected to remain closed through April to protect migrating salmonids.

Forecasted Weather

Dry conditions with morning mist and light fog. Below normal temperatures and low clouds continue through Monday. More sun and milder temperatures for the rest of the week as low clouds diminish. Winds becoming gusty on Wednesday.

Tables
