

Weekly Fish and Water Operations Outlook 4/26/2022 – 5/2/2022

Quiet and dry weather with milder temperatures for most of the week. Significant uncertainty beginning Sunday regarding possible shower chances and gradual cooling for early next week.

Tributary/Division	Anticipated Weekly Ranges	Related Environmental and Fish Conditions*
Clear Creek	Current Release: 200 cfs Anticipated Weekly Range of Releases: 200 cfs	 Juvenile spring-run, fall-run, and late fall-run Chinook Salmon and O. mykiss/steelhead are rearing in Clear Creek. Adult spring-run Chinook salmon are migrating into Clear Creek. Adult spring-run Chinook have been delivered (trucked from Keswick fish trap) to the upper-most reach and the fish are now holding in Clear Creek. Late-fall run Chinook Salmon and O. mykiss/steelhead eggs are incubating and hatching. (updated 4/25/22)
Sacramento River	Shasta Storage: 1.790 MAF Current Release: 3,250 cfs Anticipated Weekly Range of Releases: 3,250 cfs	Winter-run Chinook salmon adults present in increasing numbers and are holding from RBDD to Keswick Dam. Spawning surveys begin next week for adult winter-run Chinook salmon. Spring-run Chinook salmon 2022 adult present in upper river migrating into upper headwaters as flows allow, and are being observed at Keswick fish trap along with winter-run Chinook salmon. Spring-run Chinook Salmon fry (from 2021) present and migrating downstream. Spring-run juvenile passage has slowed, fall-run Chinook salmon are the dominant run passing at RBDD currently. Fall-run Chinook Salmon have all emerged from gravel, outmigration passage at RBDD is ongoing daily (catch composed of primarily fall run, mostly hatchery origin). Hatchery origin fall-run juveniles were released into Battle Creek from Coleman National Fish Hatchery. Late fall-run Chinook Salmon spawning completed, eggs and alevins in the gravel and fry are emerging. Juveniles beginning to emerge and caught in low numbers at RBDD. Green Sturgeon adults and juveniles present in lower river with Delta entry likely. Green Sturgeon larvae expected to begin passing RBDD soon. Adult steelhead present; juveniles beginning to emerge and present in low numbers from upper river catch caught in low numbers at RBDD.
