Subject: Reinitiation of Section 7 Consultation for the Long-Term Operation of the Central Valley Project (CVP) and State Water Project (SWP)

Dear Mr. Souza and Mr. Thom:

Reclamation, after coordination with you and the California Departments of Water Resources (DWR) and Fish and Wildlife (CDFW), requests reinitiation of consultation on the Long-Term Operation of the CVP and SWP. Pursuant to 50 CFR § 402.16, reinitiation is warranted based on anticipated modifications to the Proposed Action that may cause effects to listed species or designated critical habitats not analyzed in the U.S. Fish and Wildlife Service (USFWS) and National Marine Fisheries Service (NMFS) Biological Opinions, dated October 21, 2019.

To address the review of agency actions required by Executive Order 13990 and to voluntarily reconcile CVP operating criteria with operational requirements of the SWP under the California Endangered Species Act, Reclamation and DWR anticipate a modified Proposed Action and associated biological effects analysis that would result in new Biological Opinions for the CVP and SWP. The goals will be to support species viability, protect life history diversity, support operational flexibility, provide regulatory certainty, support science and monitoring, and to create a single feasible adaptable coordinated operation for the CVP and SWP. Reclamation understands that DWR will be an applicant in the consultation and that CDFW participation will facilitate updating DWR’s Incidental Take Permit for the operation of the SWP.
Subject: Reinitiation of Section 7 Consultation for the Long-Term Operation of the Central Valley Project (CVP) and State Water Project (SWP)

I appreciate the efforts by you and your staff in working with Reclamation and the State of California to implement Long-Term Operations. Until new Biological Opinions are issued, and National Environmental Policy Act requirements are completed, the CVP will continue to operate pursuant to the existing consultation and Record of Decision as modified by interim measures, if any, as required by ongoing drought conditions or as ordered in conjunction with any ongoing litigation. Reclamation will remain in close coordination with USFWS and NMFS throughout reinitiation.

Sincerely,

Ernest A. Conant
Regional Director
