EXPLANATORY RECITALS

[1<sup>st</sup>] WHEREAS, the United States has constructed and is operating the Central Valley Project, California, for multiple purposes pursuant to its statutory authority; and

[2<sup>nd</sup>] WHEREAS, the Contractor has rights to divert, is diverting, and will continue to divert for reasonable beneficial use, water from the natural flow of the Sacramento River and tributaries thereto, that would have been flowing therein if the Central Valley Project were not in existence and water from Butte Creek; and

[3<sup>rd</sup>] WHEREAS, the construction and operation of the integrated and coordinated Central Valley Project has changed and will further change the regimen of the Sacramento, American, San Joaquin, and Trinity Rivers and the Sacramento-San Joaquin Delta from unregulated flow to regulated flow; and

[4<sup>th</sup>] WHEREAS, the United States has rights to divert, is diverting, and will continue to divert waters from said Rivers and said Delta in connection with the operation of said Central Valley Project; and

[5<sup>th</sup>] WHEREAS, the Contractor and the United States had a dispute over the respective rights of the parties to divert and use water from the regulated flow of the Sacramento River which threatened to result in litigation, and as a means to settle that dispute entered into Contract No. 14-06-200-890A, as revised, hereinafter referred to as the Existing Contract, which established terms for the delivery to the Contractor of Central Valley Project Water, and the quantities of Base Supply the United States and the Contractor agreed may be diverted by the Contractor from the Sacramento River pursuant to such contract; and

[6<sup>th</sup>] WHEREAS, the United States and the Contractor disagree with respect to the authority of the United States to change the quantities of Base Supply and/or Project Water

49 specified as available for diversion in this Settlement Contract from the quantities specified in  
50 the Existing Contract, and other issues related thereto. That dispute was the subject of litigation  
51 in a lawsuit entitled *Glenn-Colusa Irrigation District, et al. v. United States, et al.* [Civ. No. S-  
52 01-1816 GEB/JFM (E.D. Cal.)], but that litigation was dismissed, without prejudice, pursuant to  
53 a stipulation of dismissal filed by the parties thereto on August 29, 2002. Notwithstanding that  
54 dismissal, the Contractor and the United States enter into this Settlement Contract to renew the  
55 Existing Contract, pursuant to the terms of the Existing Contract, Federal Reclamation law, and  
56 the laws of the State of California; and

57 [7<sup>th</sup>] WHEREAS, to assure the Contractor of the enjoyment and use of the regulated  
58 flow of the said Rivers and the Delta, and to provide for the economical operation of the Central  
59 Valley Project by, and the reimbursement to, the United States for expenditures made for said  
60 Project.

61 NOW, THEREFORE, in consideration of the performance of the herein contained  
62 provisions, conditions, and covenants, it is agreed as follows:

63 DEFINITIONS

64 1. When used herein, unless otherwise expressed or incompatible with the intent  
65 hereof, the term:

66 (a) "Base Supply" shall mean the quantity of Surface Water established in  
67 Articles 3 and 5 which may be diverted by the Contractor from the Sacramento River each month  
68 during the period April through October of each Year without payment to the United States for  
69 such quantities diverted;

70 (b) "Basin-Wide Water Management Plan" shall mean the mutually agreeable  
71 Sacramento River Basinwide Water Management Plan, dated October 11, 2004, developed by

72 Glenn-Colusa Irrigation District, Maxwell Irrigation District, Natomas Central Mutual Water  
73 Company, Pelger Mutual Water Company, Princeton-Codora-Glenn Irrigation District, Provident  
74 Irrigation District, Reclamation District 108, Sutter Mutual Water Company, Anderson-  
75 Cottonwood Irrigation District, Meridian Farms Water Company, Reclamation District 1004, and  
76 the U.S. Bureau of Reclamation;

77 (c) "Charges" shall mean the payments for Project Water that the Contractor  
78 is required to pay to the United States in addition to the "Rates" specified in this Settlement  
79 Contract. The Contracting Officer will, on an annual basis, determine the extent of these  
80 Charges. The type and amount of each Charge shall be specified in Exhibit D;

81 (d) "Contract Total" shall mean the sum of the Base Supply and Project Water  
82 available for diversion by the Contractor for the period April 1 through October 31;

83 (e) "Critical Year" shall mean any Year in which either of the following  
84 eventualities exists:

85 (1) The forecasted full natural inflow to Shasta Lake for the current  
86 Water Year, as such forecast is made by the United States on or before February 15 and reviewed  
87 as frequently thereafter as conditions and information warrant, is equal to or less than 3.2 million  
88 acre-feet; or

89 (2) The total accumulated actual deficiencies below 4 million acre-feet  
90 in the immediately prior Water Year or series of successive prior Water Years each of which had  
91 inflows of less than 4 million acre-feet, together with the forecasted deficiency for the current  
92 Water Year, exceed 800,000 acre-feet.

93 For the purpose of determining a Critical Year, the computation of inflow to  
94 Shasta Lake shall be performed in a manner that considers the extent of upstream development

95 above Shasta Lake during the year in question, and shall be used as the full natural flow to  
96 Shasta Lake. In the event that major construction has occurred or occurs above Shasta Lake after  
97 September 1, 1963, and which has materially altered or alters the regimen of the stream systems  
98 contributing to Shasta Lake, the computed inflow to Shasta Lake used to define a Critical Year  
99 will be adjusted to eliminate the effect of such material alterations. After consultation with the  
100 State of California, the National Weather Service, and other recognized forecasting agencies, the  
101 Contracting Officer will select the forecast to be used and will make the details of it available to  
102 the Contractor. The same forecasts used by the United States for the operation of the Project  
103 shall be used to make the forecasts hereunder;

104 (f) "CVPIA" shall mean the Central Valley Project Improvement Act, Title  
105 XXXIV of the Act of October 30, 1992 (106 Stat. 4706);

106 (g) "Eligible Lands" shall mean all lands to which Project Water may be  
107 delivered in accordance with Section 204 of the Reclamation Reform Act of October 12, 1982  
108 (96 Stat. 1263), as amended, hereinafter referred to as RRA;

109 (h) "Excess Lands" shall mean all lands in excess of the limitations contained  
110 in Section 204 of the RRA, other than those lands exempt from acreage limitation under Federal  
111 Reclamation law;

112 (i) "Full Cost Rate" shall mean that water rate described in Sections 205(a)(3)  
113 or 202(3) of the RRA, whichever is applicable;

114 (j) "Ineligible Lands" shall mean all lands to which Project Water may not be  
115 delivered in accordance with Section 204 of the RRA;

116 (k) "Landholder" shall mean a party that directly or indirectly owns or leases  
117 nonexempt land, as provided in 43 CFR 426.2;

118 (l) "Project" shall mean the Central Valley Project owned by the United  
119 States and managed by the Department of the Interior, Bureau of Reclamation;

120 (m) "Project Water" shall mean all Surface Water diverted or scheduled to be  
121 diverted each month during the period April through October of each Year by the Contractor  
122 from the Sacramento River which is in excess of the Base Supply. The United States recognizes  
123 the right of the Contractor to make arrangements for acquisition of water from projects of others  
124 than the United States for delivery through the Sacramento River and tributaries subject to  
125 written agreement between Contractor and the United States as to identification of such water  
126 which water when so identified shall not be deemed Project Water under this Settlement  
127 Contract;

128 (n) "Rates" shall mean the payments for Project Water determined annually  
129 by the Contracting Officer in accordance with the then current applicable water ratesetting  
130 policies for the Project, as described in subdivision (a) of Article 8 of this Settlement Contract;

131 (o) "Secretary" or "Contracting Officer" shall mean the Secretary of the  
132 Interior, a duly appointed successor, or an authorized representative acting pursuant to any  
133 authority of the Secretary and through any agency of the Department of the Interior;

134 (p) "Surface Water" shall mean only those waters that are considered as  
135 surface water under California law;

136 (q) "Water Year" shall mean the period commencing with October 1 of one  
137 year and extending through September 30 of the next; and

138 (r) "Year" shall mean a calendar year.

139 TERM OF SETTLEMENT CONTRACT

140 2. (a) This Settlement Contract shall become effective April 1, 2005, and shall  
141 remain in effect until and including March 31, 2045; Provided, that under terms and conditions  
142 mutually agreeable to the parties hereto, renewals may be made for successive periods not to  
143 exceed 40 years each. The terms and conditions of each renewal shall be agreed upon not later  
144 than one year prior to the expiration of the then existing Settlement Contract.

145 (b) With respect to Project Water and the portions of this Settlement Contract  
146 pertaining thereto, upon written request by the Contractor of the Secretary made not later than  
147 one year prior to the expiration of this Settlement Contract, whenever, account being taken of the  
148 amount then credited to the costs of construction of water supply works, the remaining amount of  
149 construction costs of water supply work which is properly assignable for ultimate return by the  
150 Contractor as established by the Secretary of the Interior pursuant to (3) of Section 1 of Public  
151 Law 643 (70 Stat. 483), probably can be repaid to the United States within the term of a contract  
152 under subsection 9(d) of the 1939 Reclamation Project Act (53 Stat. 1187), the relevant portions  
153 of this Settlement Contract may be converted to a contract under said subsection 9(d) upon terms  
154 and conditions mutually agreeable to the United States and the Contractor. The Secretary shall  
155 make a determination ten years after the date of execution of this Settlement Contract, and every  
156 five years thereafter, of whether a conversion to a contract under said subsection 9(d) can be  
157 accomplished pursuant to Public Law 643. Notwithstanding any provision of this Settlement  
158 Contract, the Contractor reserves and shall have all rights and benefits under Public Law 643.

159 WATER TO BE FURNISHED TO CONTRACTOR

160 3. (a) Subject to the conditions, limitations, and provisions hereinafter  
161 expressed, the Contractor is hereby entitled and authorized to divert from the Sacramento River

162 at the locations shown in Exhibit A, for beneficial use within the area delineated on Exhibit B,  
163 (both Exhibits are attached hereto and made a part hereof), the Contract Total designated in  
164 Exhibit A, or any revision thereof, in accordance with the monthly operating schedule required  
165 by Article 3(c) of this Settlement Contract. The quantity of any water diverted under this  
166 Settlement Contract from the Sacramento River, during the period April through October, for use  
167 on any lands delineated on Exhibit B, by the owner of such lands or otherwise shall constitute a  
168 part of the Contract Total as shown on Exhibit A and shall be subject to all the provisions of this  
169 Settlement Contract relating to such Contract Total as if such diversion were made by the  
170 Contractor; Provided, however, that the Contractor reserves the right to, and may at its option,  
171 divert water from Butte Creek to the extent permitted under California law for beneficial use  
172 within the area delineated on Exhibit B. The lawfulness of the Contractor's points of diversion  
173 for said area from Butte Creek will not be challenged by, or on behalf of, the Bureau of  
174 Reclamation except in the case of a general adjudication as provided in subdivisions (b) and (c)  
175 of Article 9.

176 (b) The Contractor may have acquired rights to divert water from the  
177 Sacramento River during the period April through October, that were obtained after the date of  
178 execution of the Existing Contract, or the Contractor may acquire such rights in the future. All  
179 diversions made from the Sacramento River, pursuant to such rights, during the period April  
180 through October, shall not be considered a part of the quantity of Base Supply and Project Water  
181 specified in Exhibit A; Provided, that the quantities diverted pursuant to the above rights shall be  
182 identified on the schedule submitted pursuant to Article 3(c) below, and shall not be substituted  
183 for any Base Supply or Project Water; Provided, further, that any such identified quantities of

184 other acquired rights may be diverted by the Contractor before incurring any fee pursuant to  
185 Article 3(c)(1), below.

186 (c) Before April 1 and before the first day of each month thereafter when a  
187 revision is needed, the Contractor shall submit a written schedule to the Contracting Officer  
188 indicating the Contract Total to be diverted by the Contractor during each month under this  
189 Settlement Contract. The United States shall furnish water to the Contractor in accordance with  
190 the monthly operating schedule or any revisions thereof. However, the United States recognizes  
191 the need of the Contractor to change from time to time its monthly diversions of water from the  
192 quantities shown in Exhibit A; the Contractor may make such changes, provided:

193 (1) that for the quantity of Base Supply diverted in excess of the  
194 monthly quantity shown in Exhibit A, and as may be reduced in accordance with Article 5(a),  
195 during June, July, August, September, or October of any Water Year, the Contractor shall be  
196 charged a rescheduling fee equal to 50 percent of the sum of the storage operations and  
197 maintenance rate and the storage capital rate components of the Project ratesetting policy.

198 (2) that in no event shall the total quantity scheduled for diversion by  
199 the Contractor from the Sacramento River:

200 (i) During the period April through October exceed the  
201 aggregate of the Contract Total for that period shown in Exhibit A or any revision  
202 thereof;

203 (ii) During the period July through September exceed the  
204 aggregate of the Contract Total for that period shown in Exhibit A or any revision  
205 thereof.

206 (d) In the event conditions warrant, the Contracting Officer reserves the right  
207 to require the Contractor to submit, at least 72 hours prior to the beginning of each weekly  
208 period, its estimate of daily diversion requirements for each such period from the Sacramento  
209 River; Provided, however, that changes during any such period may be made upon the giving of  
210 72 hours' notice thereof to the Contracting Officer.

211 (e) No sale, transfer, exchange, or other disposal of any of the Contract Total  
212 designated in Exhibit A or the right to the use thereof for use on land other than that shown on  
213 Exhibit B shall be made by the Contractor without first obtaining the written consent of the  
214 Contracting Officer. Such consent will not be unreasonably withheld and a decision will be  
215 rendered in a timely manner. For short-term actions that will occur within one year or less, the  
216 decision will be rendered within 30 days after receipt of a complete written proposal. For long-  
217 term actions that will occur in a period longer than one year, the decision will be rendered within  
218 90 days after receipt of a complete written proposal. For a proposal to be deemed complete by  
219 the Contracting Officer, it must comply with all provisions required by State and Federal law,  
220 including information sufficient to enable the Contracting Officer to comply with the National  
221 Environmental Policy Act, the Endangered Species Act, and applicable rules or regulations then  
222 in effect; Provided, that such consent does not authorize the use of Federal facilities to facilitate  
223 or effectuate the sale, transfer, exchange, or other disposal of Base Supply. Such use of Federal  
224 facilities will be the subject of a separate agreement to be entered into between the Contractor  
225 and Reclamation.

226 (f) For the purpose of determining whether Section 3405(a)(1)(M) of the  
227 CVPIA applies to the Contractor as a transferor or transferee of Project Water, the Contracting

228 Officer acknowledges that the Contractor is within a county, watershed, or other area of origin,  
229 as those terms are utilized under California law.

230 (g) Nothing herein contained shall prevent the Contractor from diverting  
231 water during the months of November through March for beneficial use on the land shown on  
232 Exhibit B or elsewhere to the extent authorized under the laws of the State of California.

233 (h) The United States assumes no responsibility for and neither it nor its  
234 officers, agents, or employees shall have any liability for or on account of:

235 (1) The quality of water to be diverted by the Contractor;

236 (2) The control, carriage, handling, use, disposal, or distribution of  
237 water diverted by the Contractor outside the facilities constructed and then being operated and  
238 maintained by or on behalf of the United States;

239 (3) Claims of damage of any nature whatsoever, including but not  
240 limited to, property loss or damage, personal injury, or death arising out of or connected with the  
241 control, carriage, handling, use, disposal, or distribution of said water outside of the hereinabove  
242 referred to facilities; and

243 (4) Any damage whether direct or indirect arising out of or in any  
244 manner caused by a shortage of water whether such shortage be on account of errors in  
245 operation, drought, or unavoidable causes.

246 (i) In addition to the provisions of subdivision (h) of Article 3 of this  
247 Contract, if there is a shortage of Project Water because of actions taken by the Contracting  
248 Officer to meet legal obligations then, except as provided in subdivision (a) of Article 30 of this  
249 Contract, no liability shall accrue against the United States or any of its officers, agents, or  
250 employees for any damage, direct or indirect, arising therefrom.

RETURN FLOW

251  
252 4. Nothing herein shall be construed as an abandonment or a relinquishment by the  
253 United States of any right it may have to the use of waste, seepage, and return flow water derived  
254 from water diverted by the Contractor hereunder and which escapes or is discharged beyond the  
255 boundaries of the lands shown on Exhibit B; Provided, that this shall not be construed as  
256 claiming for the United States any right to such water which is recovered by the Contractor  
257 pursuant to California law from within the boundaries of the lands shown on Exhibit B, and  
258 which is being used pursuant to this Settlement Contract for surface irrigation or underground  
259 storage for the benefit of the lands shown on Exhibit B by the Contractor.

260 CONSTRAINTS ON THE AVAILABILITY OF WATER

261 5. (a) In a Critical Year, the Contractor's Base Supply and Project Water agreed  
262 to be diverted during the period April through October of the Year in which the principal portion  
263 of the Critical Year occurs and, each monthly quantity of said period shall be reduced by  
264 25 percent.

265 (b) The amount of any overpayment by the Contractor shall, at its option, be  
266 refunded or credited upon amounts to become due to the United States from the Contractor under  
267 the provisions hereof in the ensuing Year. To the extent of such deficiency such adjustment of  
268 overpayment shall constitute the sole remedy of the Contractor.

269 INTEGRATED WATER MANAGEMENT AND PARTNERSHIPS

270 6. The Contractor and United States desire to work together to maximize the  
271 reasonable beneficial use of water for their mutual benefit. As a consequence, the United States  
272 and the Contractor will work in partnership and with others within the Sacramento Valley,  
273 including other contractors, to facilitate the better integration within the Sacramento Valley of all

274 water supplies including, but not limited to, the better management and integration of surface  
275 water and groundwater, the development and better utilization of surface water storage, the  
276 effective utilization of waste, seepage and return flow water, and other operational and  
277 management options that may be identified in the future.

278 USE OF WATER FURNISHED TO CONTRACTOR

279 7. (a) Project Water furnished to the Contractor pursuant to this Settlement  
280 Contract shall not be delivered or furnished by the Contractor for any purposes other than  
281 agricultural purposes without the written consent of the Contracting Officer. For purposes of this  
282 Settlement Contract, "agricultural purposes" includes, but is not restricted to, the irrigation of  
283 crops, the watering of livestock, incidental domestic use including related landscape irrigation,  
284 and underground water replenishment.

285 (b) The Contractor shall comply with requirements applicable to the  
286 Contractor in biological opinion(s) prepared as a result of a consultation regarding the execution  
287 of this Settlement Contract undertaken pursuant to Section 7 of the Endangered Species Act of  
288 1973, as amended, that are within the Contractor's legal authority to implement. The Existing  
289 Contract, which evidences in excess of 40 years of diversions, for agricultural uses, of the  
290 quantities of water provided for in Article 3, and the underlying water rights of the Contractor  
291 will be considered in developing an appropriate base-line for the Biological Assessment prepared  
292 pursuant to the Endangered Species Act, and in any other needed environmental review.  
293 Nothing herein shall be construed to prevent the Contractor from challenging or seeking judicial  
294 relief in a court of competent jurisdiction with respect to any biological opinion or other  
295 environmental documentation referred to in this Article.

296 RATE AND METHOD OF PAYMENT FOR WATER

297 8. (a) The Contractor shall make payments to the United States as provided in  
298 this Article for all Project Water shown in Exhibit A as follows:

299 (1) 75 percent of the amount shown as Project Water shall be paid for  
300 by the Contractor in each Year; and in addition

301 (2) the Contractor shall pay for Project Water actually diverted in  
302 excess of 75 percent of the amount shown as Project Water.

303 Such payments shall be at Rates and Charges established in accordance with: (i) the  
304 Secretary's then-current ratesetting policies for the Project; and (ii) applicable Reclamation law  
305 and associated rules and regulations, or policies; Provided, that if the Contractor desires to use  
306 Project Water for other than agricultural purposes the Rates and Charges set forth above will be  
307 adjusted by the Contracting Officer to the applicable Rates and Charges for such purposes. The  
308 Rates and Charges applicable to the Contractor upon execution of this Settlement Contract are  
309 set forth in Exhibit D, as may be revised annually. The Secretary's ratesetting policies for the  
310 Project shall be amended, modified, or superseded only through a public notice and comment  
311 procedure. The Contracting Officer shall adjust the amount of Project Water for which payment  
312 is required to the extent of any reduction in diversions of Project Water made in accordance with  
313 the water conservation provisions of Article 29(e).

314 (b) The Contracting Officer shall notify the Contractor of the Rates and  
315 Charges as follows:

316 (1) Prior to July 1 of each Year, the Contracting Officer shall provide  
317 the Contractor an estimate of the Charges for Project Water that will be applied to the period  
318 October 1, of the current Year, through September 30, of the following Year, and the basis for

319 such estimate. The Contractor shall be allowed not less than two months to review and comment  
320 on such estimates. On or before September 15 of each Year, the Contracting Officer shall notify  
321 the Contractor in writing of the Charges to be in effect during the period October 1 of the current  
322 Year, through September 30, of the following Year, and such notification shall revise Exhibit D.

323 (2) Prior to October 1 of each Year, the Contracting Officer shall make  
324 available to the Contractor an estimate of the Rates for Project Water for the following Year and  
325 the computations and cost allocations upon which those Rates are based. The Contractor shall be  
326 allowed not less than two months to review and comment on such computations and cost  
327 allocations. By December 31 of each Year, the Contracting Officer shall provide the Contractor  
328 with the final Rates to be in effect for the upcoming Year, and such notification shall revise  
329 Exhibit D.

330 (c) The Contractor shall pay the United States for Project Water in the  
331 following manner:

332 (1) With respect to Rates, prior to May 1 of each Year, the Contractor  
333 shall pay the United States one-half the total amount payable pursuant to subdivision (a) of this  
334 Article and the remainder shall be paid prior to July 1 or such later date or dates as may be  
335 specified by the United States in a written notice to the Contractor; Provided, however, that if at  
336 any time during the Year the amount of Project Water diverted by the Contractor shall equal the  
337 amount for which payment has been made, the Contractor shall pay for the remaining amount of  
338 such water as shown in Exhibit A in advance of any further diversion of Project Water.

339 (2) With respect to Charges, the Contractor shall also make a payment  
340 to the United States, in addition to the Rate(s) in subdivision (c)(1) of this Article, at the Charges  
341 then in effect, before the end of the month following the month of delivery or transfer. The

342 payments shall be consistent with the quantities of Project Water delivered or transferred.  
343 Adjustment for overpayment or underpayment of Charges shall be made through the adjustment  
344 of payments due to the United States for Charges for the next month. Any amount to be paid for  
345 past due payment of Charges shall be computed pursuant to Article 13 of this Settlement  
346 Contract.

347 (d) Payments to be made by the Contractor to the United States under this  
348 Settlement Contract may be paid from any revenues available to the Contractor. All revenues  
349 received by the United States from the Contractor relating to the delivery of Project Water or the  
350 delivery of non-Project Water through Project facilities shall be allocated and applied in  
351 accordance with Federal Reclamation law and the associated rules or regulations, and the then  
352 current Project ratesetting policies for irrigation water.

353 (e) The Contracting Officer shall keep its accounts pertaining to the  
354 administration of the financial terms and conditions of its long-term water service and Settlement  
355 Contracts, in accordance with applicable Federal standards, so as to reflect the application of  
356 Project costs and revenues. The Contracting Officer shall, each Year upon request of the  
357 Contractor, provide to the Contractor a detailed accounting of all Project and Contractor expense  
358 allocations, the disposition of all Project and Contractor revenues, and a summary of all water  
359 delivery information. The Contracting Officer and the Contractor shall enter into good faith  
360 negotiations to resolve any discrepancies or disputes relating to accountings, reports, or  
361 information.

362 (f) The parties acknowledge and agree that the efficient administration of this  
363 Settlement Contract is their mutual goal. Recognizing that experience has demonstrated that  
364 mechanisms, policies, and procedures used for establishing Rates and Charges and/or for making

365 and allocating payments, other than those set forth in this Article may be in the mutual best  
366 interest of the parties, it is expressly agreed that the parties may enter into agreements to modify  
367 the mechanisms, policies, and procedures for any of those purposes while this Settlement  
368 Contract is in effect without amendment of this Settlement Contract.

369 (g) For the term of this Settlement Contract, Rates under the respective  
370 ratesetting policies for the Project will be established to recover only reimbursable operation and  
371 maintenance (including any deficits) and capital costs of the Project, as those terms are used in  
372 the then current Project ratesetting policies, and interest, where appropriate, except in instances  
373 where a minimum Rate is applicable in accordance with the relevant Project ratesetting policy.  
374 Proposed changes of significance in practices which implement the ratesetting policies for the  
375 Project will not be implemented until the Contracting Officer has provided the Contractor an  
376 opportunity to discuss the nature, need, and impact of the proposed change. The Contractor  
377 retains all rights to challenge the validity of Rates and Charges imposed pursuant to this  
378 Settlement Contract, including but not limited to operation and maintenance expenses and  
379 operation and maintenance deficits, in an appropriate administrative or judicial proceeding.

380 (h) Except as provided in subsection 3405(a)(1)(B) of the CVPIA, the Rates  
381 for Project Water transferred, exchanged, or otherwise disposed of, by the Contractor shall be the  
382 Contractor's Rates adjusted upward or downward to reflect the changed costs of delivery (if any)  
383 of the transferred, exchanged, or otherwise disposed of Project Water to the transferee's point of  
384 delivery in accordance with the then-current ratesetting policies for the Project. Except as  
385 provided in subsection 3407(d)(2)(A) of the CVPIA, the Charges for Project Water transferred,  
386 exchanged, or otherwise disposed of, by the Contractor shall be the Contractor's Charges  
387 specified in Exhibit D. If the Contractor is receiving lower Rates and Charges because of

388 inability to pay and is transferring, exchanging, or otherwise disposing of Project Water to  
389 another entity whose Rates and Charges are not adjusted due to inability to pay, the Rates and  
390 Charges for transferred, exchanged, or otherwise disposed of Project Water shall be the  
391 Contractor's Rates and Charges unadjusted for ability to pay.

392 (i) Pursuant to the Act of October 27, 1986 (100 Stat. 3050), the Contracting  
393 Officer is authorized to adjust determinations of ability to pay every five years.

394 (j) Each payment to be made pursuant to subdivisions (a) and (c) of this  
395 Article shall be made at the office of the Bureau of Reclamation, MP Region: Mid-Pacific,  
396 P.O. Box 894242, Los Angeles, CA 90189-4242, or at such other place as the United States may  
397 designate in a written notice to the said Contractor. Payments shall be made by cash transaction,  
398 wire, or any other mechanism as may be agreed to in writing by the Contractor and the  
399 Contracting Officer. In the event there should be a default in the payment of the amount due, the  
400 delinquent payment provisions of Article 13 shall apply. The Contractor shall not be relieved of  
401 the whole or any part of its said obligation by, on account of, or notwithstanding, as the case may  
402 be:

403 (1) Its failure, refusal, or neglect to divert 75 percent of the quantity of  
404 Project Water shown on Exhibit A;

405 (2) The default in payment to it by any water user of assessments,  
406 tolls, or other charges levied by or owing to said Contractor;

407 (3) Any judicial determination that any assessment, toll, or other  
408 charge referred to in subsection 8(c)(2) of this Settlement Contract is irregular, void, or  
409 ineffectual; or

410 (4) Any injunctive process enjoining or restraining the Contractor  
411 from making or collecting any such assessment, toll, or other charge referred to in subsection  
412 8(c)(2) of this Settlement Contract.

413 AGREEMENT ON WATER QUANTITIES

414 9. (a) During the term of this Settlement Contract and any renewals thereof:

415 (1) It shall constitute full agreement as between the United States and  
416 the Contractor as to the quantities of water and the allocation thereof between Base Supply and  
417 Project Water which may be diverted by the Contractor from the Sacramento River for beneficial  
418 use on the land shown on Exhibit B from April 1 through October 31, which said diversion, use,  
419 and allocation shall not be disturbed so long as the Contractor shall fulfill all of its obligations  
420 hereunder;

421 (2) Neither party shall claim any right against the other in conflict with  
422 the provisions of Article 9(a)(1) hereof.

423 (b) Nothing herein contained is intended to or does limit rights of the  
424 Contractor against others than the United States or of the United States against any person other  
425 than the Contractor; Provided, however, that in the event the Contractor, the United States, or  
426 any other person shall become a party to a general adjudication of rights to the use of water of  
427 the Sacramento River system, this Settlement Contract shall not jeopardize the rights or position  
428 of either party hereto or of any other person and the rights of all such persons in respect to the  
429 use of such water shall be determined in such proceedings the same as if this Settlement Contract  
430 had not been entered into, and if final judgment in any such general adjudication shall determine  
431 that the rights of the parties hereto are different from the rights as assumed herein, the parties  
432 shall negotiate an amendment to give effect to such judgment. In the event the parties are unable

433 to agree on an appropriate amendment they shall, within 60 days of determining that there is an  
434 impasse, employ the services of a neutral mediator, experienced in resolving water rights  
435 disputes, to assist in resolving the impasse. The cost of the mediation will be shared equally. A  
436 failure to reach agreement on an amendment within 60 days of the end of mediation will cause  
437 the immediate termination of this Settlement Contract.

438 (c) In the event that the California State Water Resources Control Board or a  
439 court of competent jurisdiction issues a final decision or order modifying the terms and  
440 conditions of the water rights of either party to this Settlement Contract in order to impose Bay-  
441 Delta water quality obligations, the Contractor and the United States shall promptly meet to  
442 determine whether or not to modify any of the terms of this Settlement Contract to comply with  
443 the final decision or order, including, but not limited to, the applicability of the rescheduling  
444 charge in Article 3(c)(1) of this Settlement Contract. If within 60 days of the date of the issuance  
445 of the final decision or order the parties are not able to reach agreement regarding either the need  
446 to modify this Settlement Contract or the manner in which this Settlement Contract is to be  
447 modified, the parties shall promptly retain a neutral mediator, experienced in resolving water  
448 right disputes, to assist the parties in resolving their dispute. The cost of the mediator shall be  
449 shared equally. In the event that either of the parties to this Settlement Contract determines that  
450 the parties will not be able to develop mutually-agreeable modification(s) to this Settlement  
451 Contract even with the assistance of a mediator, either of the parties to this Settlement Contract  
452 may attempt to resolve the impasse by seeking appropriate judicial relief including, but not  
453 limited to, filing a general adjudication of the rights to the use of water in the Sacramento River  
454 system. The foregoing provisions of this sub-article shall only apply to the incremental  
455 obligations contained within a final decision or order of the State Water Resources Control

456 Board that reflects a modification to the obligations imposed in State Water Resources Control  
457 Board Revised Water Rights Decision 1641 dated March 15, 2000, and its associated 1995 Water  
458 Quality Control Plan which, taken together, will be considered the baseline for the application of  
459 the provisions of this sub-article.

460 (d) In the event this Settlement Contract terminates, the rights of the parties to  
461 thereafter divert and use water shall exist as if this Settlement Contract had not been entered into;  
462 and the fact that as a compromise settlement of a controversy as to the respective rights of the  
463 parties to divert and use water and the yield of such rights during the term hereof, this Settlement  
464 Contract places a limit on the Contract Total to be diverted annually by the Contractor during the  
465 Settlement Contract term and segregates it into Base Supply and Project Water shall not  
466 jeopardize the rights or position of either party with respect to its water rights or the yield thereof  
467 at all times after the Settlement Contract terminates. It is further agreed that the Contractor at all  
468 times will first use water to the use of which it is entitled by virtue of its own water rights, and  
469 neither the provisions of this Settlement Contract, action taken thereunder, nor payments made  
470 thereunder to the United States by the Contractor shall be construed as an admission that any part  
471 of the water used by the Contractor during the term of this Settlement Contract was in fact water  
472 to which it would not have been entitled under water rights owned by it nor shall receipt of  
473 payments thereunder by the United States from the Contractor be construed as an admission that  
474 any part of the water used by the Contractor during the term of this Settlement Contract was in  
475 fact water to which it would have been entitled under water rights owned by it.

476 MEASUREMENT OF WATER

477 10. (a) All water diverted by the Contractor from the Sacramento River will be  
478 diverted at the existing point or points of diversion shown on Exhibit A or at such other points as  
479 may be mutually agreed upon in writing by the Contracting Officer and the Contractor.

480 (b) All water diverted from the Sacramento River pursuant to this Settlement  
481 Contract will be measured or caused to be measured by the United States at each point of  
482 diversion with existing equipment or equipment to be installed, operated, and maintained by the  
483 United States, and/or others, under contract with and at the option of the United States. The  
484 equipment and methods used to make such measurement shall be in accordance with sound  
485 engineering practices. Upon request of the Contractor, the accuracy of such measurements will  
486 be investigated by the Contracting Officer and any errors appearing therein will be corrected.

487 (c) The right of ingress to and egress from all points of diversion is hereby  
488 granted to all authorized employees of the United States. The Contractor also hereby grants to  
489 the United States the right to install, operate, maintain, and replace such equipment on diversion  
490 or carriage facilities at each point of diversion as the Contracting Officer deems necessary.

491 (d) The Contractor shall not modify, alter, remove, or replace diversion  
492 facilities or do any other act which would alter the effectiveness or accuracy of the measuring  
493 equipment installed by the United States or its representatives unless and until the Contracting  
494 Officer has been notified with due diligence and has been given an opportunity to modify such  
495 measuring equipment in such manner as may be necessary or appropriate. In the event of an  
496 emergency the Contractor shall notify the United States within a reasonable time thereafter as to  
497 the existence of the emergency and the nature and extent of such modification, alteration,  
498 removal, or replacement of diversion facilities.

499 (e) The Contractor shall pay the United States for the costs to repair, relocate,  
500 or replace measurement equipment when the Contractor modifies, alters, removes, or replaces  
501 diversion or carriage facilities.

502 (f) Contractor and Contracting Officer shall develop a mutually agreeable  
503 surface water delivery water measurement program which shall be implemented by the  
504 Contractor, and such measurement program shall be consistent with the conservation and  
505 efficiency criteria for evaluating water conservation plans as provided in Article 29(a).

506 (g) All new surface water delivery systems installed within the lands  
507 delineated on Exhibit B after the effective date of this Settlement Contract shall also comply with  
508 the measurement provisions described in this Article.

509 RULES AND REGULATIONS

510 11. The parties agree that the delivery of Project Water for irrigation use or use of  
511 Federal facilities pursuant to this Settlement Contract is subject to Federal Reclamation law,  
512 including but not limited to, the Reclamation Reform Act of 1982 (43 U.S.C. 390aa et seq.), as  
513 amended and supplemented, and the rules and regulations promulgated by the Secretary of the  
514 Interior under Federal Reclamation law.

515 GENERAL OBLIGATION--BENEFITS CONDITIONED UPON PAYMENT

516 12. (a) The obligation of the Contractor to pay the United States as provided in  
517 this Settlement Contract is a general obligation of the Contractor notwithstanding the manner in  
518 which the obligation may be distributed among the Contractor's water users and notwithstanding  
519 the default of individual water users in their obligations to the Contractor.

520 (b) The payment of Charges becoming due hereunder is a condition precedent  
521 to receiving benefits under this Settlement Contract. The United States shall not make water  
522 available to the Contractor through Project facilities during any period in which the Contractor  
523 may be in arrears in the advance payment of water Rates due the United States. The Contractor  
524 shall not furnish water made available pursuant to this Settlement Contract for lands or parties  
525 which are in arrears in the advance payment of water rates levied or established by the  
526 Contractor.

527 (c) With respect to subdivision (b) of this Article, the Contractor shall have no  
528 obligation to require advance payment for water Rates which it levies.

529 CHARGES FOR DELINQUENT PAYMENTS

530 13. (a) The Contractor shall be subject to interest, administrative and penalty  
531 charges on delinquent installments or payments. When a payment is not received by the due  
532 date, the Contractor shall pay an interest charge for each day the payment is delinquent beyond  
533 the due date. When a payment becomes 60 days delinquent, the Contractor shall pay an  
534 administrative charge to cover additional costs of billing and processing the delinquent payment.  
535 When a payment is delinquent 90 days or more, the Contractor shall pay an additional penalty  
536 charge of six percent per year for each day the payment is delinquent beyond the due date.  
537 Further, the Contractor shall pay any fees incurred for debt collection services associated with a  
538 delinquent payment.

539 (b) The interest charge rate shall be the greater of the rate prescribed quarterly  
540 in the Federal Register by the Department of the Treasury for application to overdue payments,  
541 or the interest rate of one-half of one percent per month prescribed by Section 6 of the  
542 Reclamation Project Act of 1939 (Public Law 76-260). The interest charge rate shall be  
543 determined as of the due date and remain fixed for the duration of the delinquent period.

544 (c) When a partial payment on a delinquent account is received, the amount  
545 received shall be applied, first to the penalty, second to the administrative charges, third to the  
546 accrued interest, and finally to the overdue payment.

547 QUALITY OF WATER

548 14. The operation and maintenance of Project facilities shall be performed in such  
549 manner as is practicable to maintain the quality of raw water made available through such  
550 facilities at the highest level reasonably attainable as determined by the Contracting Officer. The  
551 United States does not warrant the quality of water and is under no obligation to construct or  
552 furnish water treatment facilities to maintain or better the quality of water.

553 WATER AND AIR POLLUTION CONTROL

554 15. The Contractor, in carrying out this Settlement Contract, shall comply with all  
555 applicable water and air pollution laws and regulations of the United States and the State of

556 California, and shall obtain all required permits or licenses from the appropriate Federal, State,  
557 or local authorities.

558 EQUAL OPPORTUNITY

559 16. During the performance of this Settlement Contract, the Contractor agrees as  
560 follows:

561 (a) The Contractor will not discriminate against any employee or applicant for  
562 employment because of race, color, religion, sex, or national origin. The Contractor will take  
563 affirmative action to ensure that applicants are employed, and that employees are treated during  
564 employment, without regard to their race, color, religion, sex, or national origin. Such action  
565 shall include, but not be limited to, the following: Employment, upgrading, demotion, or  
566 transfer; recruitment or recruitment advertising; layoff or termination, rates of payment or other  
567 forms of compensation; and selection for training, including apprenticeship. The Contractor  
568 agrees to post in conspicuous places, available to employees and applicants for employment,  
569 notices to be provided by the Contracting Officer setting forth the provisions of this  
570 nondiscrimination clause.

571 (b) The Contractor will, in all solicitations or advertisements for employees  
572 placed by or on behalf of the Contractor, state that all qualified applicants will receive  
573 consideration for employment without discrimination because of race, color, religion, sex, or  
574 national origin.

575 (c) The Contractor will send to each labor union or representative of workers  
576 with which it has a collective bargaining agreement or other contract or understanding, a notice,  
577 to be provided by the Contracting Officer, advising the said labor union or workers'  
578 representative of the Contractor's commitments under Section 202 of Executive Order No. 11246  
579 of September 24, 1965, as amended, and shall post copies of the notice in conspicuous places  
580 available to employees and applicants for employment.

581 (d) The Contractor will comply with all provisions of Executive Order  
582 No. 11246 of September 24, 1965, as amended, and of the rules, regulations, and relevant orders  
583 of the Secretary of Labor.

584 (e) The Contractor will furnish all information and reports required by said  
585 amended Executive Order and by the rules, regulations, and orders of the Secretary of Labor, or  
586 pursuant thereto, and will permit access to its books, records, and accounts by the Contracting  
587 Officer and the Secretary of Labor for purposes of investigation to ascertain compliance with  
588 such rules, regulations, and orders.

589 (f) In the event of the Contractor's noncompliance with the nondiscrimination  
590 clauses of this Settlement Contract or with any of the said rules, regulations, or orders, this  
591 Settlement Contract may be canceled, terminated, or suspended, in whole or in part, and the  
592 Contractor may be declared ineligible for further Government contracts in accordance with

593 procedures authorized in said amended Executive Order, and such other sanctions may be  
594 imposed and remedies invoked as provided in said Executive Order, or by rule, regulation, or  
595 order of the Secretary of Labor, or as otherwise provided by law.

596 (g) The Contractor will include the provisions of paragraphs (a) through (g) in  
597 every subcontract or purchase order unless exempted by the rules, regulations, or orders of the  
598 Secretary of Labor issued pursuant to Section 204 of said amended Executive Order, so that such  
599 provisions will be binding upon each subcontractor or vendor. The Contractor will take such  
600 action with respect to any subcontract or purchase order as may be directed by the Secretary of  
601 Labor as a means of enforcing such provisions, including sanctions for noncompliance:  
602 Provided, however, that in the event the Contractor becomes involved in, or is threatened with,  
603 litigation with a subcontractor or vendor as a result of such direction, the Contractor may request  
604 the United States to enter into such litigation to protect the interests of the United States.

#### 605 COMPLIANCE WITH CIVIL RIGHTS LAWS AND REGULATIONS

606 17. (a) The Contractor shall comply with Title VI of the Civil Rights Act of 1964  
607 (42 U.S.C. 2000d), Section 504 of the Rehabilitation Act of 1975 (P.L. 93-112, as amended), the  
608 Age Discrimination Act of 1975 (42 U.S.C. 6101, et seq.) and any other applicable civil rights  
609 laws, as well as with their respective implementing regulations and guidelines imposed by the  
610 U.S. Department of the Interior and/or Bureau of Reclamation.

611 (b) These statutes require that no person in the United States shall, on the  
612 grounds of race, color, national origin, handicap, or age, be excluded from participation in, be  
613 denied the benefits of, or be otherwise subjected to discrimination under any program or activity  
614 receiving financial assistance from the Bureau of Reclamation. By executing this Settlement  
615 Contract, the Contractor agrees to immediately take any measures necessary to implement this  
616 obligation, including permitting officials of the United States to inspect premises, programs, and  
617 documents.

618 (c) The Contractor makes this agreement in consideration of and for the  
619 purpose of obtaining any and all Federal grants, loans, contracts, property discounts, or other  
620 Federal financial assistance extended after the date hereof to the Contractor by the Bureau of  
621 Reclamation, including installment payments after such date on account of arrangements for  
622 Federal financial assistance which were approved before such date. The Contractor recognizes  
623 and agrees that such Federal assistance will be extended in reliance on the representations and  
624 agreements made in this Article, and that the United States reserves the right to seek judicial  
625 enforcement thereof.

#### 626 MINGLING OF CONTRACTOR'S PROJECT AND NON-PROJECT WATER

627 18. (a) Project Water must of necessity be transported by the Contractor to its  
628 water users by means of the same works and channels used for the transport of its non-Project  
629 Water including Base Supply. Notwithstanding such mingling of water, the provisions of Article

630 11 hereof shall be applicable only to Project Water, and such mingling of water shall not in any  
631 manner subject to the provisions of Article 11 hereof the Contractor's non-Project Water  
632 including Base Supply.

633 (b) If required in accordance with subdivision (c) of this Article, the  
634 Contractor shall install and maintain such measuring equipment and distribution facilities and  
635 maintain such records as may be necessary to determine the amounts of water delivered to  
636 Excess Lands served by the Contractor. The Contractor shall not within any month deliver to  
637 Ineligible Lands water in excess of the non-Project Water, including Base Supply, for that  
638 month. The Contracting Officer or authorized representative shall have the right at all  
639 reasonable times to inspect such records and measuring equipment.

640 (c) The Contractor will not be considered in violation of the requirement that  
641 Project Water be delivered only to Eligible Lands during any month of the irrigation season that  
642 the water requirement for beneficial use on Eligible Lands for that month is equal to or in excess  
643 of the Project Water for that month as shown on Exhibit A or any revision thereof pursuant to  
644 subdivision (c) of Article 3. The water requirement for beneficial use on Eligible Lands will be  
645 determined by multiplying:

646 (1) the number of irrigable acres of the particular types of crops grown  
647 in that year on the acreage designated as eligible by

648 (2) the Unit Duties as set forth in Exhibit C attached hereto and made  
649 a part hereof, or by such other Unit Duties mutually agreed upon by the Contractor and the  
650 Contracting Officer. In order to make the computation of the water requirement for Eligible  
651 Lands, on April 1 of each Year and concurrently with its order for water for the irrigation season,  
652 the Contractor shall designate the acreage of and type of crops to be grown on its Eligible Lands

653 that irrigation season. During any month the water requirement as above determined for crops  
654 growing on Eligible Lands during such month is equal to or in excess of the Project Water for  
655 that month as provided herein the Contractor shall not be required to measure the water delivered  
656 to Excess Lands. Any month the said water requirement is less than the amount of Project Water  
657 as provided herein, the Contractor will be required to measure water delivered to excess land in  
658 accordance with subdivision (b) hereof.

659 BOOKS, RECORDS, AND REPORTS

660 19. The Contractor shall establish and maintain accounts and other books and records  
661 pertaining to administration of the terms and conditions of this Settlement Contract, including:  
662 the Contractor's financial transactions, water supply data, and Project land and right-of-way  
663 agreements; the water users' land-use (crop census), land ownership, land-leasing and water use  
664 data; and other matters that the Contracting Officer may require. Reports thereon shall be  
665 furnished to the Contracting Officer in such form and on such date or dates as the Contracting  
666 Officer may require. Subject to applicable Federal laws and regulations, each party to this  
667 Settlement Contract shall have the right during office hours to examine and make copies of each  
668 other's books and official records relating to matters covered by this Settlement Contract.

669 CHANGE OF PLACE OF USE OR ORGANIZATION

670 20. (a) Unless the written consent of the United States is first obtained no change  
671 shall be made in the place of water use shown on Exhibit B.

672 (b) While this Settlement Contract is in effect, no change shall be made in the  
673 area of the Contractor as shown on its Exhibit B, by inclusion, exclusion, annexation, or  
674 detachment of lands, by dissolution, consolidation, or merger or otherwise, except upon the  
675 Contracting Officer's written consent thereto. Such consent will not be unreasonably withheld  
676 and a decision will be provided in a timely manner.

677 (c) In the event lands are annexed to or detached from the area of the  
678 Contractor, as provided herein, the quantity of Project Water to be diverted may be increased or

679 decreased, as may be appropriate, pursuant to a supplemental agreement to be executed in  
680 respect thereto.

681 CONSOLIDATION OF CONTRACTING ENTITIES

682 21. Consolidation of Contractors may be approved by the Contracting Officer  
683 provided: (i) the Contracting Officer approves the form and organization of the resulting entity  
684 and the utilization by it of the Contract Total; and (ii) the obligations of the Contractors are  
685 assumed by such entity.

686 No such consolidation shall be valid unless and until approved by the Contracting  
687 Officer.

688 NOTICES

689 22. Any notice, demand, or request authorized or required by this Settlement Contract  
690 shall be deemed to have been given, on behalf of the Contractor, when mailed, postage prepaid,  
691 or delivered to the Area Manager, Northern California Area Office, Bureau of Reclamation,  
692 16349 Shasta Dam Boulevard, Shasta Lake, California 96019, and on behalf of the United  
693 States, when mailed, postage prepaid, or delivered to the Board of Directors of the Reclamation  
694 District No. 1004, 134 5th Street, Colusa, California 95932. The designation of the addressee or  
695 the address may be changed by notice given in the same manner as provided in this Article for  
696 other notices.

697 ASSIGNMENT LIMITED--SUCCESSORS AND ASSIGNS OBLIGATED

698 23. (a) The provisions of this Settlement Contract shall apply to and bind the  
699 successors and assigns of the parties hereto, but no assignment or transfer of this Settlement  
700 Contract or any right or interest therein shall be valid until approved in writing by the  
701 Contracting Officer.

702 (b) The assignment of any right or interest in this Settlement Contract by  
703 either party shall not interfere with the rights or obligations of the other party to this Settlement  
704 Contract absent the written concurrence of said other party.

705 (c) The Contracting Officer shall not unreasonably condition or withhold his  
706 approval of any proposed assignment.

707

OFFICIALS NOT TO BENEFIT

708 24. (a) No Member of or Delegate to Congress, Resident Commissioner, or  
709 official of the Contractor shall benefit from this Settlement Contract other than as a water user or  
710 landowner in the same manner as other water users or landowners.

711 (b) No officer or member of the governing board of the Contractor shall  
712 receive any benefit that may arise by reason of this Settlement Contract other than as a  
713 landowner within the Contractor's Service Area and in the same manner as other landowners  
714 within the said service area.

715 CONTINGENT UPON APPROPRIATION OR ALLOTMENT OF FUNDS

716 25. The expenditure or advance of any money or the performance of any obligation of  
717 the United States under this Settlement Contract shall be contingent upon appropriation or  
718 allotment of funds. Absence of appropriation or allotment of funds shall not relieve the  
719 Contractor from any obligations under this Settlement Contract. No liability shall accrue to the  
720 United States in case funds are not appropriated or allotted.

721 CONFIRMATION OF SETTLEMENT CONTRACT

722 26. The Contractor, after the execution of this Settlement Contract, shall promptly  
723 seek to secure a decree of a court of competent jurisdiction of the State of California, if  
724 appropriate, confirming the execution of this Settlement Contract. The Contractor shall furnish  
725 the United States a certified copy of the final decree, the validation proceedings, and all pertinent  
726 supporting records of the court approving and confirming this Settlement Contract, and  
727 decreeing and adjudging it to be lawful, valid, and binding on the Contractor. This Settlement  
728 Contract shall not be binding on the United States until such final decree has been secured.

729 UNAVOIDABLE GROUNDWATER PERCOLATION

730 27. To the extent applicable, the Contractor shall not be deemed to have delivered  
731 Project Water to Excess Lands or Ineligible Lands if such lands are irrigated with groundwater  
732 that reaches the underground strata as an unavoidable result of the delivery of Project Water by  
733 the Contractor to Eligible Lands.

734 PRIVACY ACT COMPLIANCE

735 28. (a) The Contractor shall comply with the Privacy Act of 1974 (5 U.S.C. 552a)  
736 (the Act) and the Department of the Interior rules and regulations under the Act (43 CFR 2.45 et  
737 seq.) in maintaining Landholder acreage certification and reporting records, required to be

738 submitted to the Contractor for compliance with Sections 206 and 228 of the Reclamation  
739 Reform Act of 1982 (96 Stat. 1266), and pursuant to 43 CFR 426.18.

740 (b) With respect to the application and administration of the criminal penalty  
741 provisions of the Act (5 U.S.C. 552a(i)), the Contractor and the Contractor's employees  
742 responsible for maintaining the certification and reporting records referenced in (a) above are  
743 considered to be employees of the Department of the Interior. See 5 U.S.C. 552a(m).

744 (c) The Contracting Officer or a designated representative shall provide the  
745 Contractor with current copies of the Interior Department Privacy Act regulations and the Bureau  
746 of Reclamation Federal Register Privacy Act System of Records Notice (Acreage Limitation--  
747 Interior, Reclamation-31) which govern the maintenance, safeguarding, and disclosure of  
748 information contained in the Landholder's certification and reporting records.

749 (d) The Contracting Officer shall designate a full-time employee of the  
750 Bureau of Reclamation to be the System Manager who shall be responsible for making decisions  
751 on denials pursuant to 43 CFR 2.61 and 2.64 amendment requests pursuant to 43 CFR 2.72. The  
752 Contractor is authorized to grant requests by individuals for access to their own records.

753 (e) The Contractor shall forward promptly to the System Manager each  
754 proposed denial of access under 43 CFR 2.64; and each request for amendment of records filed  
755 under 43 CFR 2.71; notify the requester accordingly of such referral; and provide the System  
756 Manager with information and records necessary to prepare an appropriate response to the  
757 requester. These requirements do not apply to individuals seeking access to their own  
758 certification and reporting forms filed with the Contractor pursuant to 43 CFR 426.18, unless the  
759 requester elects to cite the Privacy Act as a basis for the request.

760 WATER CONSERVATION

761 29. (a) Prior to the diversion of Project Water, the Contractor shall be  
762 implementing an effective water conservation and efficiency program based on the Basin-Wide  
763 Water Management Plan and/or Contractor's water conservation plan that has been determined  
764 by the Contracting Officer to meet the conservation and efficiency criteria for evaluating water  
765 conservation plans established under Federal law. The water conservation and efficiency  
766 program shall contain definite water conservation objectives, appropriate economically feasible  
767 water conservation measures, and time schedules for meeting those objectives. Continued  
768 diversion of Project Water pursuant to this Settlement Contract shall be contingent upon the  
769 Contractor's continued implementation of such water conservation program. In the event the

770 Contractor's water conservation plan or any revised water conservation plan completed pursuant  
771 to subdivision (c) of Article 29 of this Settlement Contract have not yet been determined by the  
772 Contracting Officer to meet such criteria, due to circumstances which the Contracting Officer  
773 determines are beyond the control of the Contractor, Project Water deliveries shall be made  
774 under this Settlement Contract so long as the Contractor diligently works with the Contracting  
775 Officer to obtain such determination at the earliest practicable date, and thereafter the Contractor  
776 immediately begins implementing its water conservation and efficiency program in accordance  
777 with the time schedules therein.

778           (b)     The Contractor shall submit to the Contracting Officer a report on the  
779 status of its implementation of the water conservation plan on the reporting dates specified in the  
780 then existing conservation and efficiency criteria established under Federal law.

781           (c)     At five-year intervals, the Contractor shall revise its water conservation  
782 plan to reflect the then current conservation and efficiency criteria for evaluating water  
783 conservation plans established under Federal law and submit such revised water management  
784 plan to the Contracting Officer for review and evaluation. The Contracting Officer will then  
785 determine if the water conservation plan meets Reclamation's then current conservation and  
786 efficiency criteria for evaluating water conservation plans established under Federal law.

787           (d)     If the Contractor is engaged in direct groundwater recharge, such activity  
788 shall be described in the Contractor's water conservation plan.

789           (e)     In order to provide incentives for water conservation, the Contractor may  
790 reduce the amount of Project Water for which payment is required under Article 8(a) in  
791 accordance with the provisions of this Article 29(e).

792 (1) On or before February 15 of any Water Year, the Contractor may  
793 file with Reclamation an offer to reduce Project Water use, hereinafter referred to as Offer. The  
794 Offer shall specify the maximum quantity of Project Water to be diverted by the Contractor for  
795 each month that Project Water is available for that Water Year under this Settlement Contract.  
796 The Contracting Officer shall provide the Contractor with a decision, in writing, to the Offer on  
797 or before March 15 of that Water Year. The dates specified in this Article 29(e)(1) can be  
798 changed if mutually agreed to, in writing, by the Contractor and Contracting Officer.

799 (2) If Reclamation accepts the Offer, the Contractor's payment  
800 obligation under Article 8(a)(1) shall be reduced to the maximum quantity of Project Water to be  
801 diverted by the Contractor as specified in the Offer. The Contractor shall not divert Project  
802 Water in excess of the quantities set forth in the Offer; Provided, however, if the Contractor's  
803 diversions of Project Water exceed the quantities set forth in the Offer, the Contractor shall pay  
804 to Reclamation the applicable Rates and Charges plus an amount equal to the applicable Rates  
805 and Charges, unadjusted for ability to pay, for each acre-foot of Project Water diverted in excess  
806 of the quantities set forth in the Offer.

807 (3) If Reclamation decides not to accept the Offer, the Contractor's  
808 payment obligation will remain as specified in Article 8(a)(1).

809 (4) The provisions of this Article 29(e) shall be in addition to and shall  
810 not affect the provisions of Article 3(e) pertaining to the sale, transfer, exchange, or other  
811 disposal of the Contract Total designated in Exhibit A.

#### 812 OPINIONS AND DETERMINATIONS

813 30. (a) Where the terms of this Settlement Contract provide for actions to be  
814 based upon the opinion or determination of either party to this Settlement Contract, said terms

815 shall not be construed as permitting such action to be predicated upon arbitrary, capricious, or  
816 unreasonable opinions or determinations. Both parties, notwithstanding any other provisions of  
817 this Settlement Contract, expressly reserve the right to seek relief from and appropriate  
818 adjustment for any such arbitrary, capricious, or unreasonable opinion or determination. Each  
819 opinion or determination by either party shall be provided in a timely manner. Nothing in  
820 subdivision (a) of Article 30 of this Settlement Contract is intended to or shall affect or alter the  
821 standard of judicial review applicable under Federal law to any opinion or determination  
822 implementing a specific provision of Federal law embodied in statute or regulation.

823 (b) The Contracting Officer shall have the right to make determinations  
824 necessary to administer this Settlement Contract that are consistent with the provisions of this  
825 Settlement Contract, the laws of the United States and of the State of California, and the rules  
826 and regulations promulgated by the Secretary of the Interior. Such determinations shall be made  
827 in consultation with the Contractor to the extent reasonably practicable.

828 CONTRACTOR TO PAY CERTAIN MISCELLANEOUS COSTS

829 31. (a) In addition to all other payments to be made by the Contractor pursuant to  
830 this Settlement Contract, the Contractor shall pay to the United States, within 60 days after  
831 receipt of a bill and detailed statement submitted by the Contracting Officer to the Contractor for  
832 such specific items of direct cost incurred by the United States for work requested by the  
833 Contractor associated with this Settlement Contract plus indirect costs in accordance with  
834 applicable Bureau of Reclamation policies and procedures. All such amounts referred to in this  
835 Article shall not exceed the amount agreed to in writing in advance by the Contractor. This  
836 Article shall not apply to costs for routine contract administration.

837 (b) All advances for miscellaneous costs incurred for work requested by the  
838 Contractor pursuant to Article 31 of this Settlement Contract shall be adjusted to reflect the  
839 actual costs when the work has been completed. If the advances exceed the actual costs incurred,  
840 the difference will be refunded to the Contractor. If the actual costs exceed the Contractor's  
841 advances, the Contractor will be billed for the additional costs pursuant to Article 31 of this  
842 Settlement Contract.

843 WAIVER OF DEFAULT

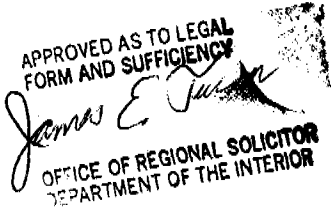

844 32. The waiver by either party to this Settlement Contract as to any default shall not  
845 be construed as a waiver of any other default or as authority of the other party to continue such  
846 default or to make, do, or perform, or not to make, do, or perform, as the case may be, any act or  
847 thing which would constitute a default.

848 IN WITNESS WHEREOF, the parties hereto have executed this Settlement

849 Contract as of the day and year first hereinabove written.

 <u>RESCHEDULING FEE:</u>	 <u>\$5.71</u>
 <u>FULL-COST RATES:</u>	
Section 202(3) Rate is applicable to a Qualified Recipient or to a Limited Recipient receiving irrigation water on or before October 1, 1981.	<u>\$23.83</u>
Section 205(a)(3) Rate is applicable to a Limited Recipient that did not receive irrigation water on or before October 1, 1981.	<u>\$26.54</u>
 <u>CHARGES UNDER P.L. 102-575 TO THE RESTORATION FUND 2/</u>	
Restoration Payments (3407(d)(2)(A))	<u>\$ 7.93</u>

1/ Chief Financial Officer (CFO) adjustment and Provision for Replacement (PFR) expense is being distributed over a 5-year period beginning in FY 2003 for those contractors that requested those costs be deferred.

2/ Restoration fund charges are payments in addition to the water rates and were determined pursuant to Title XXXIV of Public Law 102-575. Restoration fund charges are on a fiscal year basis (10/1 - 9/30).

Upon conclusion of discussion Trustee Pine offered the following Resolution and moved its adoption:

BEFORE THE BOARD OF DIRECTORS  
OF RECLAMATION DISTRICT NO. 1004  
COUNTY OF COLUSA, STATE OF CALIFORNIA

RESOLUTION NO. 2005-01

RESOLUTION OF RECLAMATION DISTRICT NO. 1004 APPROVING  
AND AUTHORIZING EXECUTION OF RENEWAL WATER SERVICE SETTLEMENT  
CONTRACT BETWEEN RECLAMATION DISTRICT NO. 1004 AND THE  
UNITED STATES BUREAU OF RECLAMATION AND  
AUTHORIZING FILING OF A VALIDATION ACTION

WHEREAS, there is existing between Reclamation District No. 1004, hereafter "District" and the United States of America, Department of the Interior, Bureau of Reclamation, hereafter "Bureau of Reclamation", Contract No. 14-06-200-890A, a contract settling water rights disputes and providing for project water -Central Valley Project, California from the Bureau of Reclamation to the District; and

WHEREAS, said contract will expire on March 31, 2005; and

WHEREAS, representatives of the District and the Bureau of Reclamation have engaged in negotiations to develop a renewal contract for a succeeding forty (40) year period; and

WHEREAS, the Board of Directors has been advised of those negotiations, the draft contracts arising therefrom and has considered the form and content of the proposed agreement arising from said negotiations; and

WHEREAS, pursuant to said negotiations, the form of Agreement, tendered to the District as Contract No. 14-06-200-890A-R-1 on February 25, 2005, has been negotiated; and

WHEREAS, said form of Agreement is acceptable to the Board of Directors of Reclamation District No. 1004; and

WHEREAS, the Board of Directors of Reclamation District No. 1004 believes it is in the best interests of the District to authorize execution of the renewal contract as tendered and referred to as 14-06-200-890A-R-1.

WHEREAS, as a condition of said renewal contract, Reclamation District No. 1004 is required to initiate and prosecute a validation action in accordance with the laws of the State of California providing for the confirmation of said renewal agreement; and

WHEREAS, in accordance with the provisions of Water Code Section 50979, Reclamation District No. 1004 is authorized to bring such a validation action; and

WHEREAS, the Board of Directors of Reclamation District No. 1004 believes it is in the best interest of the District and consistent with the terms and conditions of said agreement to file and prosecute to completion said validation action.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of Reclamation District No. 1004 that it approves the tendered Agreement and that the President and Secretary are authorized to execute the Agreement on behalf of Reclamation District No. 1004 upon approval being granted by the United States Bureau of Reclamation.

BE IT FURTHER RESOLVED that the District's attorney is hereby authorized and directed to file and prosecute to completion a validation action in accordance with the provisions of Chapter 9 (commencing with Section 860) of the Code of Civil Procedure, State of California, in order to determine the validity of the renewed water service contract with the United States of America, Department of Interior, Bureau of Reclamation, and to validate all actions taken in connection with the development and execution of said water service contract, and to confirm that all acts and proceedings in connection with said water service contract are valid and binding.

BE IT FURTHER RESOLVED that the Manager of the District is authorized to execute all documents, affidavits, and pleadings as may be required in connection with said proceeding.

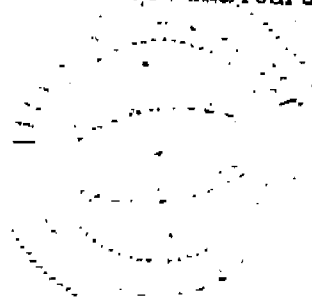

This motion was seconded by Trustee Hulbert and passed at a Meeting of the Board of Directors held on March 16, 2005, by the following vote:

AYES:	5
NOES:	0
ABSTAIN:	0
ABSENT:	0

### CERTIFICATE OF SECRETARY

I do hereby certify that I am the Secretary of Reclamation District No. 1004, a special district organized and existing under the laws of the State of California, and that the foregoing Resolution was duly adopted by the Board of Directors of said District at a meeting thereof duly and regularly held at the office of the said District at 134 Fifth Street, Colusa, California on the 16th day of March, 2005, at which meeting a quorum of said Board of Directors was at all times present and acting, and that said Resolution has not been rescinded or amended in whole or any part thereof, and remains in force and effect.

IN WITNESS WHEREOF, I have hereunto set my hand and the Seal of Reclamation District No. 1004 this 16th day of March, 2005.

  
  
 Secretary,  
 RECLAMATION DISTRICT NO. 1004

**CERTIFICATION**

I, Cameron "Kelly" Boyd, the duly and regularly appointed Secretary of RECLAMATION DISTRICT #1004, hereby certify that the foregoing is a true, correct and exact copy of a Resolution of the Board of Trustees of RECLAMATION DISTRICT #1004, duly and regularly passed and adopted at a meeting of said Board of Trustees at Colusa, California, on March 16, 2005, the original of which is on file in my office and duly and regularly entered in the official records of proceedings of the Board of Trustees of RECLAMATION DISTRICT #1004.

Dated: Mar. 16, 2005

  
  
Cameron "Kelly" Boyd, Secretary
