

Hello Water Contractors,

Reclamation has been providing to water contractors and their representatives Bureau of Reclamation Operations and Recordkeeping system (BORWORKS) reports more timely through an efficient electronic email process. This process has been in effect for sending January 2020 reports and later reports. This process is intended to replace receiving reports from BORWORKS through regular mail in the future to the extent possible. However, since this process is still considered a pilot program, it will not replace reports sent out by Area Offices until Reclamation has made the decision to do so. The reports sent under this pilot program are the Water Delivery and Revenue report; Water Delivery and Revenue Adjustment Report; and, the Payment Summary Report. These reports, for your contractor number, are attached to this email.

The Water Delivery and Revenue Reports (WDR) will be the report showing all of your deliveries, charges, and charge adjustments for the prior month. These reports will replace the Monthly Water Statement for deliveries that you have been receiving in the past.

The Payment Summary Reports that were sent out for January, February and March only showed the payments posted for that month. Going forward, the reports will show all payments posted into our water accounting system starting January 1st, 2020. This report will accumulate payments through the calendar year, each month starting on January 1st.

Please do not reply to this email for questions regarding these reports.

For questions concerning your deliveries and charges please contact your area contact. Here is that contact information for each of you.
