# Newlands Project Planning Study Special Report

## Errata Sheet September 2013

This errata sheet documents changes to the text of the Newlands Project Planning Study (Study) Special Report (Special Report) released in April 2013. These corrections reflect typographical errors identified after the release of the final Special Report. This errata sheet uses “tracked changes” (underlined additions and crossed-out deletions) to assist the reader in more easily following the corrections. There are no changes to the Study’s analysis, findings, or conclusions as a result of the corrections.

Please note the following changes to the Special Report.

### Chapter 5

#### Alternative 600

On page 5-27, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~10,000~~ 20,000 acre-feet annually.

#### Alternative 350.a

On page 5-37, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~17,000~~ 27,000 acre-feet annually.

## Alternative 350.b

On page 5-48, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~35,000~~ 45,000 acre-feet annually.

## Alternative 350.d

On page 5-60, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~21,000~~ 31,000 acre-feet annually.

## Alternative 250.a

On page 5-69, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~28,000~~ 38,000 acre-feet annually.

## Alternative 250.b

On page 5-79, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~42,000~~ 52,000 acre-feet annually.

## Alternative 250.d

On page 5-89, the first bullet under the subheading “Water Quality and Quantity on Lower Truckee River” should have the following change:

- **Relative to the Desired Reliability** – Increase in Truckee River flow of ~~31,000~~ 41,000 acre-feet annually.
