

Terrestrial Resources

Types of Resources

- Botanical
- Wildlife
- Wetland

Impacts

- Reservoir Area and Tributaries
 - *Inundation*
 - *Construction activities*
- Sacramento River and Delta
 - *Modified flow regimes*

Overview of Reservoir Area Evaluations

Methods

Reclamation conducted a wide array of technical studies to characterize potential impacts to physical habitat, plants, and wildlife:

- Habitat mapping
- Botanical species field surveys
- Wildlife species field surveys
- Wetland surveys
- Genetic studies
- Reservoir tributary investigations

Example Results
