

Chapter 5.0

Individual Comments

This chapter contains copies of comment letters (and any attachments) from the individuals listed in Table 5-1. Each comment in the comment letters was assigned a number, in sequential order (note that some letters may have more than one comment). The numbers were then combined with an abbreviation for the individual (example: Barger-1).

Responses to the comments follow the comment letters, and are also numbered, corresponding to the numbering assigned in the letter. The letters and associated responses are sorted alphabetically by abbreviation and appear in the chapter in that order.

Email Address: _____

Please provide responses to each of the following questions:

1. For each APN identified above, please specify the approximate distance from the river for each parcel.

APNs: _____ Distance from river: half mile
042-020-024-000

2. The current uses of the property described above are for:

- _____ Annual crops
_____ Trees
_____ Vines
_____ Commercial
_____ Industrial
 Residential
_____ Governmental
_____ Wildlife refuge
_____ Other (please explain)

3. Based upon your experience, if river flows are expected to range from approximately 475 cfs to 1300 cfs during the course of a year, what impacts are likely to be experienced on your property(s):

- High groundwater that saturates the root zone
- High groundwater that causes surface flooding
- Other seepage impacts impeding farming practices
- Flooding
- Increased levee maintenance requirements
- Increases to groundwater levels with no adverse impact to crops or surface conditions
- Loss of riparian zone
- Enhanced riparian zone

4. If you anticipate losing any real property as a result of the flow increases, please provide your best estimate as to the amount of property that will be lost and describe how the loss will occur.

a. Acreage lost:

b. Explanation: my house will be flooded. and I will loose every thing. probably I will be a home less person with my family

GAGE - 2

3. Based upon your experience, if river flows are expected to range from approximately 475 cfs to 1300 cfs during the course of a year, what impacts are likely to be experienced on your property(s):

- High groundwater that saturates the root zone
- High groundwater that causes surface flooding
- Other seepage impacts impeding farming practices
- Flooding
- Increased levee maintenance requirements
- Increases to groundwater levels with no adverse impact to crops or surface conditions
- Loss of riparian zone
- Enhanced riparian zone

4. If you anticipate losing any real property as a result of the flow increases, please provide your best estimate as to the amount of property that will be lost and describe how the loss will occur.

- a. Acreage lost:
- b. Explanation:

I am interested in the environmental review process for the above-referenced proceeding. Please include this letter and comments for the record in this environmental review process.

LOPES - 1

I hereby join in the comments submitted by the San Joaquin River Resource Management Coalition (RMC). The purpose of this letter is to fulfill my obligation to exhaust administrative remedies. Whether or not I choose to raise all issues raised by the RMC or others will be determined at a later time.

Sincerely yours,

Ch. Lopes For James Lopes
