

## Environmental Commitment Program

This form must accompany all Federal discretionary action approvals that require compliance with the National Environmental Policy Act and other applicable environmental laws.

### Environmental Document<sup>1</sup>: CEC 12-045

On January 14, 2011 the President's Council on Environmental Quality (CEQ) issued guidance for Federal agencies to implement, monitor and evaluate environmental commitments identified in Environmental Assessments and Environmental Impact Statements completed for compliance with the National Environmental Policy Act (NEPA). This guidance also pertains to Categorical Exclusions when environmental commitments have been identified in order to meet the requirements for exclusion.

The Bureau of Reclamation's NEPA Handbook provides guidance on the establishment of an Environmental Commitment Program (ECP) to meet the CEQ guidance. The ECP is a system designed to implement, monitor and evaluate the environmental commitments identified in the NEPA document. These commitments fall under one or more of the following categories:

#### 1. Commitments where no construction or ground disturbance is involved

These commitments are typically associated with water transfers, exchanges, Warren Act contracts and similar actions.

Required ☐ Not Required ☒

#### 2. Commitments where construction or ground disturbance is involved

These commitments are typically associated with short-term construction impacts resulting from modifications to Federal facilities or modifications to non-Federal facilities where there is a Federal nexus such as Federal funds or approvals.

Required ☒ Not Required ☐

#### 3. Long-term commitments

These commitments are typically associated with larger construction or ground disturbing activities where impacts to resources such as wetlands, special status species habitat or water quality may occur that require long-term mitigation and monitoring.

Required ☐ Not Required ☒

**Note:** If the "Not Required" boxes are checked on all three commitment categories, no further action is required. If any of the required boxes are checked please refer to the following Environmental Commitment table for a summary of the commitments required for environmental compliance. Reclamation would continue to require compliance with all commitments imposed by existing environmental documents, such as Biological Opinions and Programmatic Agreements. Please direct any questions or comments regarding the Environmental Commitment Program to:

Chuck Siek, Supervisory Natural Resources Specialist  
Department of Interior, Bureau of Reclamation  
1243 "N" Street, Fresno, CA 93721

| Biological Resources                                                                                                                                                                                                                                                                                       | 2                                | Work will be scheduled outside the bird breeding season (February 1 to September 30) to avoid take of nesting birds. If work must take place during the breeding season, a qualified biologist will conduct a pre-construction nest inspection of each pole. If nesting birds are found, work will be postponed until the nest is inactive.                                                                                                                                                                | During Construction                       |                                         |      |                                                                                                                               |                                                   |      |
| Biological Resources                                                                                                                                                                                                                                                                                       | 2                                | If the project will occur between February 15 and July 31, a preconstruction survey for Least Bell's Vireo nests will be conducted. If an active nest is found, no work will be allowed within 500 feet of the nest until the nest is inactive.                                                                                                                                                                                                                                                            | During Construction                       |                                         |      |                                                                                                                               |                                                   |      |
| Biological Resources                                                                                                                                                                                                                                                                                       | 2                                | Before commencement of work, the person in charge of work at the site will slowly walk the area that is subject to disturbance. The project area and all adjacent land within 25 feet will be visually surveyed for frogs. If any "frog" is observed, a general description (coloration and pattern, estimated length) will be noted, and if possible, pictures taken. Information on any potential frog(s) will be reviewed by a Reclamation biologist, who must give permission before work can proceed. | Prior to Construction                     |                                         |      |                                                                                                                               |                                                   |      |
| Cultural Resources                                                                                                                                                                                                                                                                                         | 2                                | If human remains or cultural artifacts are encountered, work will stop immediately and Reclamation's Regional Archaeologist will be contacted for further guidance.                                                                                                                                                                                                                                                                                                                                        | During Construction                       |                                         |      |                                                                                                                               |                                                   |      |

**Funding:** The project proponent is responsible for all direct costs to implement, monitor and evaluate the environmental commitments described in the table. The project proponent is also responsible for the costs incurred by Reclamation staff to monitor and evaluate the environmental commitments.
