Appendix F

Proposed Construction Areas at Restoration Project Sites

This appendix presents the proposed construction areas for two new sites (Jeffcoat and Willow Springs mitigation sites), as well as the proposed construction area for the Asbury Diversion Dam project site. The new information presented in this appendix does not necessarily require recirculation for public comment. However, Reclamation and the State Water Board have deemed that the new information presented in this appendix supports significant new information presented in this Draft SEIS/REIR (see Impact 4.1-8 in Section 4.1, Fish, of this document). As a result, the lead agencies have included this appendix here for public comment. The complete new appendix will be presented in the Final EIS/EIR.
