

CHAPTER 4

Revisions to the Draft EIR/EIS

A. Revisions to the Draft EIR/EIS

The text changes presented in this chapter were initiated by Lead Agency staff or by comments on the Draft EIR/EIS. The changes are in the order they appear in the Draft EIR/EIS and include text corrections to the Draft EIR/EIS in cases where the error may cause misinterpretation of the information. Throughout this chapter, newly added text is shown in underline format, and deleted text is shown in strikethrough format. For changes initiated by comments on the Draft EIR/EIS, the alpha-numeric comment designator is indicated at the end of the revision in italics.

-
1. The text on page ES-33, Table ES-6, of the Executive Summary of the Draft EIR/EIS under Mitigation Measure 3.4.9a has been revised as follows:

Mitigation Measure 3.4.9a: SVCSD and Napa SD (as appropriate) shall implement the following measures:

- Prepare a Management Plan for the salt marsh ponds to monitor recycled water application and resulting changes in bittern pond conditions. ~~required by the San Francisco Bay RWQCB to obtain a discharge prohibition. The management plan will comply with the RWQCB Resolution 94-086.~~ The management plan will include the following features for Ponds 7 and 7A, as appropriate:
 - a) Facility Plan, includes project purpose and objectives, site selection factors, site sampling and analyses, planning and design elements.
 - b) Operations and Maintenance plan, includes vegetation planning and harvesting, channel and bank maintenance, pump and gate maintenance, vector controls, and contingency/emergency plans.
 - c) Monitoring Program, includes monitoring of pollutants, habitat diversity, wildlife use, and vector populations.

2. The following text has been added to Table ES-6, page ES-58 of the Executive Summary of the Draft EIR/EIS, to clarify the mitigation measures for impacts to cultural resources included in the Draft EIR/EIS to ensure Section 106 compliance:

Mitigation Measure 3.12.1: The standard Section 106 process outlined at 36 CFR Part 800 will be completed prior to supplying Federal funds to be used for construction of any facilities for the project. This includes all construction money that involves whole or in partial financing and includes both payment in advance or in reimbursement.

If project circumstances are such that it is infeasible to implement the measures identified below, a phased identification and evaluation strategy that accounts for the individual project effects will be developed in accordance with the procedures for doing so detailed in 36 CFR Part 800.4(b)(2). The alternative procedures would provide a similar level of accounting regarding the effects to cultural resources in a manner not inconsistent with the standard process provided for at 36 CFR Part 800. The alternative procedures agreed to in the Programmatic Agreement would need to be completed prior to construction of any actions that are subsidized with Federal funds. Pursuant to the Section 106 process, the appropriate Member Agency will incorporate the following measures:

-
3. The text on page ES-71, Table ES-6, of the Executive Summary of the Draft EIR/EIS under Mitigation Measure 5.1a has been revised as follows:

Mitigation Measure 5.1a: In order to maintain consistency with the Napa County General Plan, Napa County and Napa SD will approve the MST Local Options 1 and/or 2. This will provide approximately 530 AFY of recycled water that would be available for the existing users in the MST area. Trunk facilities may ~~be sized to~~ accommodate service of up to 1,400 AFY to existing agricultural irrigators only. Any expansion of service beyond the 1,400 AFY or provision of service to new land uses would be subject to approval by the County Planning Department and the Napa County Board of Supervisors.

-
4. Napa SD has clarified anticipated pumping capacity under Phase 1, resulting in an incremental change in pumping horsepower identified in the Draft EIR/EIS. This edit applies to tables and horsepower discussions throughout the Draft EIR/EIS. These edits are shown in strike block, and are reprinted in the order they occur. This clarification does not substantially affect the impact analysis or change any of the conclusions of the Draft EIR/EIS. Table 1-1 on page 1-6 of Chapter 1, Introduction, has been revised as follows:

**TABLE 1-1
PROPOSED COMPONENTS ANTICIPATED FOR PROJECT APPROVALS**

		New Pipeline (miles)	New Demand (AFY)	Capacity Increase (mgd)	New Pumps (HP)	New Storage (AF)

7. The text on pages 2-19 and 2-21, of Chapter 2, Project Description, in the bullet under the SVCSD SVWRP has been revised as follows:
- The facilities proposed under the Phase 1 Implementation Plan are shown in **Figure 2-5**. SVRWP Alignment 1A would consist of approximately 5.2 miles of pipeline in western Sonoma Valley. The main pipeline would originate from the SVCSD WWTP, extend southwest and then northwest through ~~a vineyard~~ agricultural land to Arnold Drive. The pipeline would continue north along Arnold Drive ~~to Orange Avenue, and extend north on Orange Avenue to Elm Avenue. The pipeline would then continue east on Elm Avenue, cross a field to Arnold Drive, extend north on Arnold Drive,~~ and end just north of Leveroni Road. ~~Secondary pipelines or segments would extend from the main pipeline on the following roadways: Highway 116, Watmaugh Road, and Leveroni Road.~~
8. Table 2-19 on page 2-43 of Chapter 2, Project Description, has been revised to clarify Napa SD pump capacity as follows:

10. The text on page 3.4-8 of Section 3.4, Water Quality, has been revised as follows:

Napa SD typically stores raw or partially treated wastewater in these ponds and then treats the water immediately before distribution.

Recycled water users are primarily located along the recycled water distribution pipeline at Highway 29 and Jameson Canyon Road and further north along the Napa Valley Highway. In 2005, recycled water customers received 426 MG per year (1,307 AFY) (Napa SD 2005). Napa SD has identified potential future recycled water users in the MST area, including Napa State Hospital.

Table 3.4-5 presents the WWTP effluent quality data from April 2007 to October 2007 provided by Napa SD, and the corresponding USEPA, NBWA and University of California Division of Agriculture and Natural Resources guidelines for the use of recycled water.

11. The text on page 3.4-52 of Section 3.4, Water Quality, has been revised as follows:

It is estimated that WWTP influent flow will increase over time, with a corresponding increase in discharge of treated effluent by the year 2020 (**Table 3.4-10**).

12. The text on page 3.4-54 of Section 3.4, Water Quality, has been revised as follows:

Napa SD

The No Action Alternative would not include any new recycled water deliveries by Napa SD. Future conditions would include development within the Napa service area consistent with approved General Plans, with corresponding increases in treated effluent discharge. Discharge under future 2020 discharge conditions would increase by an estimated 1,887,533 AFY. ~~Under the No Action Alternative, which considers implementation of a subset of recycled water projects, 2020 discharge conditions would increase by an estimated 1,067 AFY. This represents the future baseline discharge conditions, and no impacts would occur as a result from the NBWRP.~~

Phase 1 (Project level)

Compared to existing conditions (CEQA Baseline), Phase 1 projects would include 46 miles of new pipeline, ~~1,665-2,663~~ HP of pumping capacity, and treatment facilities providing ~~4.36.4~~ mgd of tertiary capacity, and 65 AF of storage to provide ~~3,7553,757~~ AFY of recycled water. ~~This~~ The Phase 1 projects would also result in a corresponding reduction in discharge. Analysis of Phase 1 recycled water use and corresponding changes in estimated discharge assumed 2020 influent flow and discharge conditions for the WWTP, which include increased influent flow over time. Implementation of Phase 1 projects would have an estimated 2020 discharge reduction of 6,121 AFY for all the WWTPs combined.

13. The text on pages 3.4-54 of Section 3.4, Water Quality, under Phase 1 has been revised as follows:

Analysis of Phase 1 recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

14. The text on page 3.4-54 of Section 3.4, Water Quality, under LGVSD/NMWD has been revised as follows:

Compared to existing conditions (CEQA baseline), Phase 1 would provide 542 AFY of recycled water. Analysis of Phase 1 recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

15. The text on page 3.4-56, Water Quality, under Napa SD has been revised as follows:

Compared to existing conditions (CEQA baseline), Phase 1 would provide 2,137 AFY of recycled water, with a corresponding reduction in discharge. Analysis of Phase 1 recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

16. The text on page 3.4-59, of Section 3.4, Water Quality, under Napa SD has been revised as follows:

Phase 1 Analysis of recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP.

17. The text on page 3.4-60, of Section 3.4, Water Quality, under LGVSD/NMWD has been revised as follows:

Analysis of recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

18. The text on page 3.4-61 of Section 3.4, Water Quality, under Novato SD/NMWD, SVCSD, and Napa SD has been revised as follows:

Analysis of recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

19. The text on pages 3.4-63 and 3.4-64, of Section 3.4, Water Quality, under Novato SD/NMWD and SVCSD has been revised as follows:

Analysis of recycled water use and corresponding changes in discharge assumed 2020 influent flow and discharge conditions for the WWTP, which would increase over time.

20. The text on page 3.4-64, of Section 3.4, Water Quality, under Impact 3.4.9, No Action Alternative heading has been revised as follows:

Under the No Action Alternative, which includes consideration of future conditions, it is likely that a subset of water recycling projects would be implemented by the Member Agencies on an individual basis, without the benefit of regional coordination, or federal funding. Facilities for Napa salt marsh pond restoration would be implemented only by SVCSD ~~and Napa SD~~. A discussion of impacts for each Member Agency is provided below.

21. The text on page 3.4-65, of Section 3.4, Water Quality, under Impact 3.4.9, No Action Alternative, SVCSD heading has been revised as follows:

Therefore, opening the ponds to tidal action would gradually reduce the elevated pond ~~than~~ concentrations down to ambient background conditions. Nutrients such as nitrogen and phosphorus could stimulate algal and vascular aquatic vegetation growth due to the shallow depth of the ponds under current conditions. However, if the ponds began receiving recycled water, it is anticipated that chemical constituents would be diluted substantially due to the large volume of water and dilution capacity in the ponds. Mercury accumulation in the restored wetlands could pose a concern due to the potential formation of methyl mercury in the chemically-reducing conditions of shallow wetland sediments. The potential long-term impacts of bioaccumulation of mercury are likely to increase over existing levels; therefore the impact could be significant. ~~Use of recycled water to restore the natural salinity patterns in the salt ponds would occur under the wastewater reuse policy in the San Francisco Bay RWQCB Resolution 94-086. As provided for in Mitigation Measure 3.4.9a, SVCSD would be required to prepare a management plan that includes long-term monitoring of water quality and other parameters within Ponds 7 and 7A, and obtain an exception to waste discharge prohibition from the San Francisco Bay RWQCB. In addition, i~~ Implementation of Mitigation Measure 3.4. 9a, development of a long-term water quality management plan for the salt marsh ponds, would minimize any adverse water quality impact to less-than-significant levels.

22. The text on pages 3.5-66, of Section 3.4, Water Quality, under the Alternative 1: Basic System, SVCSD and Napa SD heading has been revised as follows:

Restoration of the Napa salt marsh ponds implemented under the Basic System would be similar to that under the No Action Alternative and Phase 1 for SVCSD. However, under the Basic System, pipeline connection from Napa SD WWTP would occur, providing an additional treated effluent source of similar quality. No additional impacts beyond those identified for Phase 1 would occur. Please refer to the discussion under SVCSD above. The impact would be less than significant with **Mitigation Measure 3.4.9a.**

23. The text on page 3.5-67of Section 3.4, Water Quality, has been revised as follows:

Mitigation Measure 3.4.9a: SVCSD and Napa SD (as appropriate) shall implement the following measures:

- Prepare a Management Plan for the salt marsh ponds to monitor recycled water application and resulting changes in bittern pond conditions, required by the San Francisco Bay RWQCB to obtain a discharge prohibition. The management plan will comply with the RWQCB Resolution 94-086. The management plan will include the following features for Ponds 7 and 7A, as appropriate:
 - a) Facility Plan, includes project purpose and objectives, site selection factors, site sampling and analyses, planning and design elements.
 - b) Operations and Maintenance plan, includes vegetation planning and harvesting, channel and bank maintenance, pump and gate maintenance, vector controls, and contingency/emergency plans.
 - c) Monitoring Program, includes monitoring of pollutants, habitat diversity, wildlife use, and vector populations.
-

24. The text on page 3.7-12, of Section 3.7, Transportation and Traffic, second paragraph under the “Pipelines” heading has been revised to reflect

“In undeveloped areas, a 25-foot wide corridor for construction would be utilized to maximize construction efficiency. In areas encumbered of Sonoma County by existing improvements, high-volume roadways, or environmentally sensitive areas, a narrower construction corridor of approximately less than 20 25 feet would be used, as conditions allow.”

25. The text on page 3.8-18, of Section 3.8, Air Quality, first paragraph under the “Phase 1 (Project level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, Phase 1 projects would provide 46.4 miles of new pipeline, ~~1,873~~ 2,663 HP of pumping capacity, treatment facilities providing 6.4 mgd of tertiary capacity, and 65 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Phase 1 projects would provide 28.8 miles of new pipeline, ~~961~~ 1,751 HP of pumping capacity, treatment facilities providing 5.9 mgd of tertiary capacity, and no additional storage.

26. The text on page 3.8-20, of Section 3.8, Air Quality, first paragraph under the “Alternative 1: Basic System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Basic System projects would provide 83 miles of new pipeline, ~~2,345~~ 3,109 HP of pumping capacity, treatment facilities providing 7.8 mgd of tertiary capacity, and 1,020 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Basic System would provide 65.7 miles of new pipeline, ~~1,433~~ 2,197 HP of pumping capacity, treatment facilities providing 7.3 mgd of tertiary capacity, and 955 AF of storage.

27. The text on page 3.8-21, of Section 3.8, Air Quality, first paragraph under the “Alternative 2: Partially Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Partially Connected System would provide 140 miles of new pipeline, ~~3,656~~ 4,588 HP of pumping capacity, treatment facilities providing 15.9 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Partially Connected System would provide 122.5 miles of new pipeline, ~~2,744~~ 3,676 HP of pumping capacity, treatment facilities providing 15.0 mgd of tertiary capacity, and 2,155 AF of storage.

28. The text on page 3.8-21, of Section 3.8, Air Quality, first paragraph under the “Alternative 3: Fully Connected System (Program level)” heading, has been revised as follows:

Compared to the CEQA Baseline, the Fully Connected System would provide 153 miles of new pipeline, ~~5,021~~ 5,786 HP of pumping capacity, treatment facilities providing 20.8 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the

No Action Alternative (NEPA Baseline), the Fully Connected System would provide 135.8 miles of new pipeline, ~~4,109~~ 4,874 HP of pumping capacity, treatment facilities providing 19.9 mgd of tertiary capacity, and 2,155 AF of storage.

29. Chart 3.8-2 on page 3.4-24 of Section 3.8, Air Quality, has been updated as follows:

**CHART 3.8-2
COMPARISON OF CEQA AND NEPA BASELINE -
PUMPING CAPACITY (HORSEPOWER), BY ALTERNATIVE**

30. The text on page 3.8-25, of Section 3.8, Air Quality, first paragraph under the “Phase 1 (Project level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, Phase 1 projects would provide 46.4 miles of new pipeline, ~~1,873~~ 2,663 HP of pumping capacity, treatment facilities providing 6.4 mgd of tertiary capacity, and 65 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Phase 1 projects would provide 28.8 miles of new pipeline, ~~961~~ 1,751 HP of pumping capacity, treatment facilities providing 5.9 mgd of tertiary capacity, and no additional storage.

31. The text on page 3.8-26, of Section 3.8, Air Quality, first paragraph under the “Alternative 1: Basic System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Basic System projects would provide 83 miles of new pipeline, ~~2,345~~ 3,109 HP of pumping capacity, treatment facilities providing 7.8 mgd of tertiary capacity, and 1,020 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Basic System would provide 65.7 miles of new pipeline, ~~4,433~~ 2,197 HP of pumping capacity, treatment facilities providing 7.3 mgd of tertiary capacity, and 955 AF of storage.

32. The text on page 3.8-26, of Section 3.8, Air Quality, first paragraph under the “Alternative 2: Partially Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Partially Connected System would provide 140 miles of new pipeline, ~~3,656~~ 4,588 HP of pumping capacity, treatment facilities providing 15.9 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Partially Connected System would provide 122.5 miles of new pipeline, ~~2,744~~ 3,676 HP of pumping capacity, treatment facilities providing 15.0 mgd of tertiary capacity, and 2,155 AF of storage.

33. The text on page 3.8-27, of Section 3.8, Air Quality, first paragraph under the “Alternative 3: Fully Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Fully Connected System would provide 153 miles of new pipeline, ~~5,021~~ 5,786 HP of pumping capacity, treatment facilities providing 20.8 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Fully Connected System would provide 135.8 miles of new pipeline, ~~4,109~~ 4,874 HP of pumping capacity, treatment facilities providing 19.9 mgd of tertiary capacity, and 2,155 AF of storage.

34. The text on page 3.8-28, of Section 3.8, Air Quality, first paragraph under the “Phase 1 (Project level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, Phase 1 projects would provide 46.4 miles of new pipeline, ~~1,873~~ 2,663 HP of pumping capacity, treatment facilities providing 6.4 mgd of tertiary capacity, and 65 AF of storage. Compared to the No Action Alternative

(NEPA Baseline), Phase 1 projects would provide 28.8 miles of new pipeline, ~~961~~ 1,751 HP of pumping capacity, treatment facilities providing 5.9 mgd of tertiary capacity, and no additional storage.

35. The text on page 3.8-28, of Section 3.8, Air Quality, first paragraph under the “Alternative 1: Basic System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Basic System projects would provide 83 miles of new pipeline, ~~2,345~~ 3,109 HP of pumping capacity, treatment facilities providing 7.8 mgd of tertiary capacity, and 1,020 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Basic System would provide 65.7 miles of new pipeline, ~~4,433~~ 2,197 HP of pumping capacity, treatment facilities providing 7.3 mgd of tertiary capacity, and 955 AF of storage.

36. The text on page 3.8-29, of Section 3.8, Air Quality, first paragraph under the “Alternative 2: Partially Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Partially Connected System would provide 140 miles of new pipeline, ~~3,656~~ 4,588 HP of pumping capacity, treatment facilities providing 15.9 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Partially Connected System would provide 122.5 miles of new pipeline, ~~2,744~~ 3,676 HP of pumping capacity, treatment facilities providing 15.0 mgd of tertiary capacity, and 2,155 AF of storage.

37. The text on page 3.8-29, of Section 3.8, Air Quality, first paragraph under the “Alternative 3: Fully Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Fully Connected System would provide 153 miles of new pipeline, ~~5,024~~ 5,786 HP of pumping capacity, treatment facilities providing 20.8 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Fully Connected System would provide 135.8 miles of new pipeline, ~~4,109~~ 4,874 HP of pumping capacity, treatment facilities providing 19.9 mgd of tertiary capacity, and 2,155 AF of storage.

38. Chart 3.8-3 on page 3.4-31 of Section 3.8, Air Quality, has been updated as follows:

**CHART 3.8-3
ESTIMATED CO₂E EMISSIONS (METRIC/TONS ANNUALLY)
VERSUS CALIFORNIA AIR RESOURCE BOARD INTERIM THRESHOLD**

39. Table 3.8-10 on page 3.8-31, of Section 3.8, Air Quality, has been revised as follows to clarify Napa SD pumping capacity:

**TABLE 3.8-10
CARBON DIOXIDE EMISSIONS AND VEHICLE EQUIVALENCY**

Alternative	CO ₂ Generated by Alternative Operations	Equivalent in Vehicles per Year
No Action Alternative	116.9	23.2
Phase 1 (Project level)	517.5 <u>628.9</u>	102.9 <u>125.1</u>
Alternative 1: Basic System (Program level)	593.3 <u>690.8</u>	118.0 <u>137.4</u>
Alternative 2: Partially Connected System (Program level)	803.3 <u>898.4</u>	159.8 <u>178.7</u>
Alternative 3: Fully Connected System (Program level)	979.7 <u>1073.8</u>	194.8 <u>213.6</u>

SOURCE: ESA, 2008

This incremental change does not change the impact analysis or conclusion.

40. The text on page 3.8-32 and 3.8-33, of Section 3.8, Air Quality, first paragraph under the “Phase 1 (Project level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, Phase 1 projects would provide 46.4 miles of new pipeline, ~~1,873~~ 2,663 HP of pumping capacity, treatment facilities providing 6.4 mgd of tertiary capacity, and 65 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Phase 1 projects would provide 28.8 miles of new pipeline, ~~961~~ 1,751 HP of pumping capacity, treatment facilities providing 5.9 mgd of tertiary capacity, and no additional storage.

41. Table 3.8-12 on page 3.8-33, of Section 3.8, Air Quality, has been revised as follows to clarify Napa SD pumping capacity:

**TABLE 3.8-12
GHG EMISSION RATES FROM PROJECT OPERATION – PHASE 1**

Emission Source	CO ₂ e Emissions (metric tons/year)				
	LGVSD	Novato SD	SVCSD	Napa SD	All Districts
Indirect (Electricity Usage)	9.3	33.1	112.5	356.7 <u>468.2</u>	544.5 <u>623.0</u>
Direct (Vehicle Exhaust)	0.8	1.3	1.7	2.2	5.9
Total Emissions	10.0	34.4	114.1	358.9 <u>470.4</u>	547.5 <u>628.9</u>

NOTE: Totals may appear to not add up due to rounding.

See Appendix AQ for detailed calculation sheets.

This incremental change does not change the impact analysis or conclusion.

42. Text on page 3.8-34, of Section 3.8, Air Quality, first paragraph under the “Napa SD” heading, has been revised as follows to clarify Napa SD pumping capacity:

Phase 1 implementation would involve construction of 17.5 miles of new pipeline to move water from the Napa SD WWTP. As shown in Table 3.8-12, direct and indirect emissions associated with improvements under Phase 1 implementation would total approximately ~~358.9~~ 470.4 metric tons of CO₂e per year. This value is below the interim GHG threshold. Therefore, the impacts would be less than significant.

This incremental change does not change the impact analysis or conclusion.

43. The text on page 3.8-34, of Section 3.8, Air Quality, first paragraph under the “Alternative 1: Basic System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Basic System projects would provide 83 miles of new pipeline, ~~2,345~~ 3,109 HP of pumping capacity, treatment facilities providing 7.8 mgd of tertiary capacity, and 1,020 AF of storage. Compared to the No Action Alternative (NEPA Baseline), Basic System would provide 65.7 miles of new pipeline, ~~4,433~~ 2,197 HP of pumping capacity, treatment facilities providing 7.3 mgd of tertiary capacity, and 955 AF of storage.

This incremental change does not change the impact analysis or conclusion.

44. Table 3.8-13 on page 3.8-35, of Section 3.8, Air Quality, has been revised as follows to clarify Napa SD pumping capacity:

**TABLE 3.8-13
GHG EMISSION RATES FROM PROJECT OPERATION – BASIC SYSTEM**

Emission Source	CO ₂ e Emissions (metric tons/year)				
	LGVSD	Novato SD	SVCS	Napa SD	All Districts
Indirect (Electricity Usage)	9.3	33.1	169.9	370.5 <u>467.9</u>	582.8 <u>680.2</u>
Direct (Vehicle Exhaust)	0.8	1.6	4.3	4.0	10.6
Total Emissions	10.0	34.7	174.2	374.4 <u>471.9</u>	593.3 <u>690.8</u>

NOTE: Totals may appear to not add up due to rounding.

See Appendix AQ for detailed calculation sheets.

This incremental change does not change the impact analysis or conclusion.

45. Text on page 3.8-36, of Section 3.8, Air Quality, first paragraph under the “Alternative 2: Partially Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Partially Connected System would provide 140 miles of new pipeline, ~~3,656~~ 4,588 HP of pumping capacity, treatment facilities providing 15.9 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Partially Connected System would provide 122.5 miles of new pipeline, ~~2,744~~ 3,676 HP of pumping capacity, treatment facilities providing 15.0 mgd of tertiary capacity, and 2,155 AF of storage.

This incremental change does not change the impact analysis or conclusion.

46. Table 3.8-14 on page 3.8-37, of Section 3.8, Air Quality, has been revised as follows to clarify Napa SD pumping capacity:

**TABLE 3.8-14
GHG EMISSION RATES FROM PROJECT OPERATION – PARTIALLY CONNECTED SYSTEM**

Emission Source	CO ₂ e Emissions (metric tons/year)				
	LGVSD	Novato SD	SVCS	Napa SD	All Districts
Indirect (Electricity Usage)	43.4 <u>40.0</u>	74.6 <u>75.0</u>	260.6	407.2 <u>504.9</u>	785.5 <u>880.6</u>
Direct (Vehicle Exhaust)	2.3	4.6	5.3	5.6	17.8
Total Emissions	45.4 <u>42.3</u>	79.2 <u>79.6</u>	266.0	412.8 <u>510.5</u>	803.3 <u>898.4</u>

NOTE: Totals may appear to not add up due to rounding

See Appendix AQ for detailed calculation sheets.

This incremental change does not change the impact analysis or conclusion.

47. Text on page 3.8-38, of Section 3.8, Air Quality, first paragraph under the “Alternative 3: Fully Connected System (Program level)” heading, has been revised as follows to clarify Napa SD pumping capacity:

Compared to the CEQA Baseline, the Fully Connected System would provide 153 miles of new pipeline, ~~5,021~~ 5,786 HP of pumping capacity, treatment facilities providing 20.8 mgd of tertiary capacity, and 2,220 AF of storage. Compared to the No Action Alternative (NEPA Baseline), the Fully Connected System would provide 135.8 miles of new pipeline, ~~4,109~~ 4,874 HP of pumping capacity, treatment facilities providing 19.9 mgd of tertiary capacity, and 2,155 AF of storage.

This incremental change does not change the impact analysis or conclusion.

48. Table 3.8-15 on page 3.8-39, of Section 3.8, Air Quality, has been revised as follows to clarify Napa SD pumping capacity:

**TABLE 3.8-15
GHG EMISSION RATES FROM PROJECT OPERATION – THE FULLY CONNECTED SYSTEM**

Emission Source	CO ₂ e Emissions (metric tons/year)				
	LGVSD	Novato SD	SVCSD	Napa SD	All Districts
Indirect (Electricity Usage)	57.4 <u>54.3</u>	423.4 <u>123.7</u>	372.1	407.2 <u>504.1</u>	960.4 <u>1054.3</u>
Direct (Vehicle Exhaust)	2.3	6.0	5.6	5.6	19.5
Total Emissions	59.7 <u>56.6</u>	429.4 <u>129.6</u>	377.8	412.8 <u>509.8</u>	979.7 <u>1073.8</u>

-- Data not available to determine value.

See Appendix 3.8 for detailed calculation sheets.

This incremental change does not change the impact analysis or conclusion.

49. The third bullet under Mitigation Measure 3.9.1 on page 3.9-20, of Section 3.9, Noise, has been revised as follows:

- ~~All construction activities within unincorporated Sonoma County shall be limited to between the hours of 7 a.m. and 6 p.m. on weekdays and between 9 a.m. and 5 p.m. on Saturdays.~~ All construction activities within unincorporated areas shall be limited to between the hours depending upon the jurisdiction.

50. The text on page 3.11-12 of Section 3.11, Public Services and Utilities, has been revised as follows:

Napa provides treatment of raw water at three water treatment plants (WTP): Hennessey, Milliken, and Jameson Canyon. The Hennessey WTP was constructed in 1981 and has a treatment capacity of 20 MGD. The Milliken WTP was constructed in 1976 and has a treatment capacity of 4 MGD. The Jamieson Canyon WTP was constructed in 1986 and has a treatment capacity of 12 MGD. The City of Napa is currently designing an expansion of the Jamieson Canyon WTP to provide a maximum capacity of 24 MGD.

Sewer. Please refer to Sewer under Utilities for unincorporated Napa County below. Napa provides treatment of raw water at three water treatment plants (WTP): Hennessey, Milliken, and Jameson Canyon. The Hennessey WTP was constructed in 1981 and has a treatment capacity of 20 MGD. The Milliken WTP was constructed in 1976 and has a treatment capacity of 4 MGD. The Jamieson Canyon WTP was

~~constructed in 1986 and has a treatment capacity of 12 MGD. The City of Napa is currently designing an expansion of the Jamieson Canyon WTP to provide a maximum capacity of 24 MGD.~~

-
51. The text on page 3.11-13, of Section 3.11, Public Services and Utilities, has been revised as follows:

These law enforcement services are provided by ~~the~~ over 135 Deputy Sheriffs in the Administrative, Patrol, Investigations, Civil and Coroner Divisions.

Through a network of approximately 250 miles of underground sewer pipelines, assisted by a system of six lift stations, the ~~wastewater sewage~~ makes its way to the Napa SD WWTP for treatment. The WWTP is a secondary ~~and tertiary~~ biological physical-chemical treatment facility that treats a mixture of domestic and industrial wastewater. Tertiary treatment is used to produce recycled water.

-
52. The text on pages 3.11-20 and 3.11-21 of Section 3.11, Public Services and Utilities, has been revised as follows:

Phase 1 would involve installation of pipeline and construction of four booster pump stations in the MST area. Pipeline installation would occur primarily in residential and open spaces areas and would affect ~~the following roadways discussed under the No Action Alternative and the following primary~~ roadways: Imola Avenue, 4th Avenue, Kreuzer Lane, Coombsville Road/Wild Horse Valley Road, North Avenue, 1st Avenue, 2nd Avenue, 3rd Avenue, and East 3rd Avenue, North 3rd Avenue, Olive Hill Lane, Loma Heights Road, Biava Lane, La Londe Lane, Magnolia Drive, and Kirkland Road.

Construction of the booster pump stations would be similar to construction discussed above and could have a significant effect. Implementation of **Mitigation Measure 3.11.1** would reduce this impact to a less-than-significant level.

-
53. The text on page 3.11-27 of Section 3.11, Public Services and Utilities, has been revised as follows:

Pipeline installation would occur primarily in residential and open spaces areas and roadways that would be affected include Imola Avenue, Wild Horse Valley Road, 4th Avenue, Kreuzer Lane, Coombsville Road, Hagan Road, North Avenue,

1st Avenue, 2nd Avenue, 3rd Avenue, East 3rd Avenue, Loma Heights Road, Biava Lane, La Londe Lane, Magnolia Drive, Kirkland Road, and Olive Hill Road.

54. The text on page 3.11-31 of Section 3.11, Public Services and Utilities, has been revised as follows:

Treatment upgrades at any of the WWTP's would not interrupt recycled water supply service to the corresponding service areas because recycled water service during any planned outages could be provided on a temporary basis from existing distribution storage.

55. The text on page 3.11-37, of Section 3.11, Public Services and Utilities, has been revised as follows:

Much of the energy involved in municipal recycled water systems is used for pumping.

56. The following text has been added to the Impact Analysis section of Section 3.12, Cultural Resources, under 3.12.3, Environmental Consequences/ Impacts, to clarify the mitigation measures included in the Draft EIR/EIS and ensure Section 106 compliance:

Mitigation Measures

Mitigation Measure 3.12.1: The standard Section 106 process outlined at 36 CFR Part 800 will be completed prior to supplying Federal funds to be used for construction of any facilities for the project. This includes all construction money that involves whole or in partial financing and includes both payment in advance or in reimbursement.

If project circumstances are such that it is infeasible to implement the measures identified below, a phased identification and evaluation strategy that accounts for the individual project effects will be developed in accordance with the procedures for doing so detailed in 36 CFR Part 800.4(b)(2). The alternative procedures would provide a similar level of accounting regarding the effects to cultural resources in a manner not inconsistent with the standard process provided for at 36 CFR Part 800. The alternative procedures agreed to in the Programmatic Agreement would need to be completed prior to construction of any actions that are subsidized with Federal funds. Pursuant to the Section 106 process, the appropriate Member Agency will incorporate the following measures:"

57. The text on page 3.13-3, of Section 3.13, Recreation has been revised to clarify the following:

The Marin County Department of Public Works has developed a Countywide Bicycle Plan ~~in (2001)~~, which has evolved from the collaborative planning efforts of various Pedestrian and Bicycle Advisory Committees. The plan was updated in 2008. The goal of the Bicycle Plan is to make Marin County a model community for alternative transportation by implementing safe bikeways and pedestrian networks. The plan describes existing bikeways and proposed bikeways that are estimated for completion within five to 25 years.

58. The text and Table 3.13-2 on page 3.13-3, of Section 3.13, Recreation, has been updated to include existing Class I bikeways as follows:

In the action area, there are existing Class I, Class II and Class III bikeways. In general, there are existing bikeways along McInnis Park, China Camp State Park, LGVSD WWTP, Hamilton Parkway, Main Gate Road, and Hangar Avenue, along LGVSD Phase 1 of the recycled water pipelines. Table 3.13-2 lists the existing bikeways and their locations relative to the NBWRP components.

**TABLE 3.13-2
EXISTING AND PROPOSED BIKEWAYS AND RECREATIONAL TRAILS
ADJACENT TO THE NBWRP FOR LGVSD**

Bikeway or Trail Facility	Location	Project Component	Ownership	Status
<u>San Francisco Bay Trail Class I Bikeway</u>	<u>McInnis Park</u>	<u>Peacock Gap Service Area</u>	<u>City of San Rafael</u>	<u>Existing</u>
<u>San Francisco Bay Trail Class I Bikeway</u>	<u>China Camp State Park</u>	<u>Peacock Gap Service Area</u>	<u>City of San Rafael</u>	<u>Existing</u>
<u>San Francisco Bay Trail Class I Bikeway</u>	<u>LGVSD WWTP</u>	<u>Peacock Gap Service Area</u>	<u>City of San Rafael</u>	<u>Existing</u>
Class II Bikeway	Hamilton Parkway	Novato South Service Area	City of Novato	Existing

Class III Bikeway	North San Pedro Road	Peacock Gap Service Area	City of San Rafael	Existing
Class II/ III Bikeway	North San Pedro Road	Peacock Gap Service Area	City of San Rafael	Proposed
San Francisco Bay Trail	North San Pedro Road, Haner Road, Hamilton Parkway, Smith Ranch Road	Phase 1 and Peacock Gap Service Area	City of San Rafael/ City of Novato	Existing

SOURCE: ESA, 2006.

59. The following clarifications have been made to the text and Table 3.13-7 on page 3.13-14 of Section 3.13, Recreation:

In the action area, there are both existing and proposed Class I, Class II and Class III bikeways, as listed in **Table 3.13-7**. In general, there are existing and/or proposed bikeways along proposed recycled water pipeline routes on West Imola Road and Coombsville Road. The route for the Bay Trail alignment in Napa has not been firmly established, however portions of the route have been adopted and signed, and Bay Trail grant funding has contributed to their construction. These segments include Cuttings Wharf Road and 3,000 feet of Las Amigas Road from the intersection with Cuttings Wharf Road heading west.

**TABLE 3.13-7
EXISTING AND PROPOSED BIKEWAYS, RECREATIONAL TRAILS, AND RECREATION FACILITIES
ADJACENT TO THE NBWRP FOR NAPA SD**

Recreational Facility	Location	NBWRP Alternative Affecting Facility	Recreational Facility Ownership	Status
Class III Bikeway	Imola Avenue	Phase 1	City of Napa	Existing
San Francisco Bay Trail	Foster Road to Imola Avenue, cross the river and proceed through Kennedy Park to the Napa-Vallejo Highway	Phase 1	ABAG	Proposed
Bay Area Ridge Trail	the City of Napa to Skyline Park via Imola Ave.	Phase 1	Bay Area Ridge Trail Council	Proposed
Skyline Wilderness Park	Imola Avenue	Phase 1 pipeline	State of CA/ Napa County- subleased to Skyline Park Citizens Association	Existing
Napa Valley County Club	Hagen Road	Phase 1 pipeline	Privately owned	Existing
<u>San Francisco Bay Trail Class I Bikeway</u>	<u>Cuttings Wharf/ Stanly Ranch</u>	<u>Phase 1 pipeline</u>	<u>ABAG</u>	<u>Existing</u>

60. Table 4-1 on Page 4-12 in Chapter 4, Cumulative Impacts, under Foreseeable Future Projects, has been revised to include the proposed Sonoma-Schellville bike trail as shown on the following page.

**TABLE 4-1
PLANNED AND APPROVED PROJECTS IN THE PROJECT AREA AND VICINITY**

Jurisdiction	Project	Area Affected	Status
<u>FORSEEABLE FUTURE PROJECTS</u>			
<i>Marin County Projects</i>			
Marin County Department of Public Works (CIP)	Miller Creek Road and Trail Inventory for Watershed Plan	San Rafael	2008-2009

¹ The Petaluma and MMWD service areas are included in this water use estimate.² Irrigation of the Napa State Hospital grounds is included in this water use estimate.

SOURCE: CDM, 2008

64. The text on page 5-15 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

The 1998 City of Napa General Plan lists a policy to evaluate the feasibility of use of reclaimed wastewater in appropriate locations. In order to plan future and adequate water supply capacity and services to Napa, the General Plan calls for the implementation of the *1997 Water System Optimization and Master Plan* (City of Napa, 1998). The 1997 Master Plan identifies use of reclaimed wastewater to offset potable water supplies currently being used to irrigate parks, a golf course, and other landscaped areas in Napa and improvements to water supplies during drought years. The City would enter into an agreement with Napa SD to deliver recycled water to the current City customers. The areas proposed for recycled water use in the General Plan are area south of Imola Avenue, east of Napa River, ~~and west of Highway 221~~ (including the Napa State Hospital property), the south Napa Market Place, the Stanly Ranch, and the property owned by Napa SD adjacent to Imola Avenue bordering Napa River. The water reuse in the proposed areas would offset potable

water use for irrigation of turf at Kennedy Golf Course, Kennedy Park, ~~and~~ Napa Valley College, and Napa State Hospital.

65. The text on page 5-16 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

Also, the County ~~will~~shall identify and support ways to utilize recycled water for irrigation and non-potable uses to offset dependency on groundwater and surface waters and ensure adequate wastewater treatment capacity through measures such as using wastewater treatment and reuse facilities where feasible to reclaim, reuse, and deliver treated wastewater for irrigation and other uses possible ~~potable use depending on wastewater treatment standards and encouraging the use of non-potable/recycled water wherever recycled water is available and require the use of recycled water for golf courses where feasible~~ (County of Napa, 2008).

66. The text on page 5-16, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

This would make approximately 4,540~~3,500~~ AFY available for use in and around the city.

67. Impact 5.1 on Page 5-18 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

Impact 5.1: The NBWRP would provide recycled water for urban, agricultural, and environmental uses, and as such, would contribute to the provision of adequate water supply to support a level of growth that is consistent with the amount planned and approved within the General Plans of the affected cities within Marin, Sonoma, And Napa Counties and the General Plans for Marin, Sonoma and Napa Counties. No appreciable growth in population or employment would occur as a direct result of construction or operation of the proposed facilities. However, development under the General Plans accommodated by the proposed project would result in secondary environmental effects, which include effects that would be significant and unavoidable.

68. The text on page 5-20 of Chapter 5, Growth Inducement and Secondary Effects of Growth, the text is edited as follows:

Population within the region is anticipated to increase by approximately 4 percent by 2010 and 2015 and by 2 percent through 2030, as shown in **Table 5-13**. **Tables 5-14** and **5-15** show the total projected water use in the individual service areas, and total water use by SCWA agency contractors and customers, respectively.

69. The text on page 5-37 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

This would ensure that recycled water is provided at levels that are consistent with current agricultural practices, and that recycled water is used to offset existing groundwater pumpage. Facilities would ~~be sized to~~ serve up to 1,400 AFY to existing uses within the MST area (above the 200 AFY for Napa State Hospital).

70. The text on page 5-40 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

The Basic System would include facilities to provide an additional 1,055 AFY to the Carneros East service area.

71. The text on page 5-45 of Chapter 5, Growth Inducement and Secondary Effects of Growth, has been revised as follows:

Mitigation Measure 5.1a: In order to maintain consistency with the Napa County General Plan, Napa County and Napa SD will approve the MST Local Options 1 and/or 2. This will provide approximately 530 AFY of recycled water that would be available for the existing users in the MST area. Trunk facilities may ~~be sized to~~ accommodate service of up to 1,400 AFY to existing agricultural irrigators only. Any expansion of service beyond the 1,400 AFY or provision of service to new land uses would be subject to approval by the County Planning Department and the Napa County Board of Supervisors.

72. The text on page 6-11 of Chapter 6, Alternatives Analysis, has been revised as follows:

The Proposed Action would not directly cause localized increases in groundwater levels over the long-term, therefore the impact on structures or flooding patterns

would be less than significant. The use and storage of recycled water would not significantly affect groundwater quality for potable and agricultural uses.

73. The text on page 6-23 of Chapter 6, Alternatives Analysis, has been revised as follows:

Similarly, the No Action Alternative would potentially affect cultural, surface water, or biological resources in the SVCSD and, Novato SD, ~~and Napa SD~~ service areas.

74. The text on page 6-33 of Chapter 6, Alternatives Analysis, has been revised as follows:

The Basic System would achieve the project objectives with the least environmental impacts and costs, although it would not provide the benefits from increased connectivity that would occur under the Partially and Fully Connected Systems.

75. The text on page 6-34 of Chapter 6, Alternatives Analysis, has been revised as follows:

The No Project Alternative was actually rated highest for this criterion, as it would not construct or operate any proposed facilities.

76. The text on page 6-34 of Chapter 6, Alternatives Analysis, has been revised as follows:

In general, all ~~the~~ three proposed alternatives would meet the stated project objectives and comply with applicable regulations and policies.

77. The text on page 7-3, of Chapter 7, Climate Change, has been revised as follows:

Most precipitation events in California occur between October and April more specifically, ~~in terms of amount of precipitation occurring~~ the events are more frequent and intense from November through March.

78. The text on page 8-1, of Chapter 8, Agency Consultation, has been revised as follows:

The Member Agencies of NBWRA initially planned on ~~individual~~-recycled water projects that were examined and refined through the Engineering Report and Feasibility Study discussed below.

79. The text on page 8-2, of Chapter 8, Agency Consultation, has been revised as follows:

The report describes the Proposed Project area and the key water management problems and needs within the Project area, identifies water reuse opportunities in the project area, develops and analyzes alternative measures that could address the ~~identifies~~-identified water management needs, and presents an overview of associated legal and institutional requirements.

80. The text on page 11-9 under Mitigation Measure 3.4.6a of Chapter 11, Mitigation Monitoring and Reporting Program, has been revised as follows:

Mitigation Measure 3.4.6a

Under the Master Recycling Permit for each Member Agency and Cooperating Agency, user agreements shall include provisions for compliance with Title 22 and the State Recycled Water Policy regarding storage and use of recycled water onsite at individual properties.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Incorporate provisions for compliance with Title 22 and State Recycled Water Policy in user agreements. 2. Comply with provisions in the user agreement	1. Execute agreement 2. Execute agreement	1. Member Agency/Users 2. Member Agency/Users	1. During project operation (recycled water use) 2. During project operation (recycled water use)	Member Agency/ Users

81. The text on page 11-10 of Chapter 11, Mitigation Monitoring and Reporting Program under Mitigation Measure 3.4.9.a has been revised as follows:

Mitigation Measure 3.4.9a: SVCSD and Napa SD (as appropriate) shall implement the following measures:

- Prepare a Management Plan for the salt marsh ponds to monitor recycled water application and resulting changes in bittern pond conditions, required by the San Francisco Bay RWQCB to obtain a discharge prohibition. The management plan will comply with the RWQCB Resolution 94-086. The management plan will include the following features for Ponds 7 and 7A, as appropriate:
 - a) Facility Plan, includes project purpose and objectives, site selection factors, site sampling and analyses, planning and design elements.
 - b) Operations and Maintenance plan, includes vegetation planning and harvesting, channel and bank maintenance, pump and gate maintenance, vector controls, and contingency/emergency plans.
 - c) Monitoring Program, includes monitoring of pollutants, habitat diversity, wildlife use, and vector populations.

82. The text on pages 11-40 and 11-41 of Chapter 11, Mitigation Monitoring and Reporting Program, has been revised as follows:

Impact 3.10.4: Wildland Fire Hazard

Construction activities in grassland areas could have the potential to expose people or equipment to risk of loss, injury, or death involving wildland fires.

Mitigation Measure 3.10.4a

For applicable Member Agencies, in consultation with local fire agencies, a Fire Safety Plan will be developed for each of the service areas associated with the project. The Fire Safety Plan(s) will describe various potential scenarios and action plans in the event of a fire.

Mitigation Measure 3.10.4b

For applicable Member Agencies, during project construction, all staging areas, welding areas, or areas slated for development using spark-producing equipment will be cleared of dried vegetation or other material that could ignite. Any construction equipment that includes a spark arrestor shall be equipped with a spark arrestor in good working order. All vehicles and crews working at the project site(s) will have access to functional fire extinguishers at all times. In addition, construction crews

will be required to have a spotter during welding activities to look out for potentially dangerous situations, including accidental sparks.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Develop Fire Safety Plan. 2. Clear all staging areas, welding areas, or areas slated for development using spark-producing equipment of dried vegetation or other material that could ignite. Equip construction equipment a spark arrestor in good working order. All vehicles and crews working at the project site(s) will have access to functional fire extinguishers at all times. Require construction crews to have a spotter during welding activities to look out for potentially dangerous situations, including accidental sparks.	1. Incorporate Fire Safety Plan into construction specifications. 2. Incorporate measures into construction specifications; sign-off on inspection report and/or MMRP.	1. Member Agency 2. Contractor/ Member Agency	1. Prior to Construction 2. During Construction	Member Agency LGVSD/NMWD, Novato SD/NMWD

83. The text starting on page 11-44 of Chapter 11, Mitigation Monitoring and Reporting Program, is edited as follows to clarify the mitigation measures for impacts to cultural resources included in the Draft EIR/EIS to ensure Section 106 compliance:

Mitigation Measure 3.12.1: The standard Section 106 process outlined at 36 CFR Part 800 will be completed prior to supplying Federal funds to be used for construction of any facilities for the project. This includes all construction money that involves whole or in partial financing and includes both payment in advance or in reimbursement.

If project circumstances are such that it is infeasible to implement the measures identified below, a phased identification and evaluation strategy that accounts for the individual project effects will be developed in accordance with the procedures for doing so detailed in 36 CFR Part 800.4(b)(2). The alternative procedures would provide a similar level of accounting regarding the effects to cultural resources in a manner not inconsistent with the standard process provided for at 36 CFR Part 800. The alternative procedures agreed to in the Programmatic Agreement would need to be completed prior to construction of any actions that are subsidized with Federal funds. Pursuant to the Section 106 process, the appropriate Member Agency will incorporate the following measures:...

84. The text on page 11-53 of Chapter 11, Mitigation Monitoring and Reporting Program under Mitigation Measure 5.1a has been revised as follows:

Mitigation Measure 5.1a: In order to maintain consistency with the Napa County General Plan, Napa County and Napa SD will approve the MST Local Options 1 and/or 2. This will provide approximately 530 AFY of recycled water that would be available for the existing users in the MST area. Trunk facilities may ~~be sized to~~ accommodate service of up to 1,400 AFY to existing agricultural irrigators only. Any expansion of service beyond the 1,400 AFY or provision of service to new land uses would be subject to approval by the County Planning Department and the Napa County Board of Supervisors.

-
85. The text on page 12-1, of Chapter 12, List of EIR/EIS Preparers, has been revised as follows:

Napa Sanitation District (Member Agency)

Michael Abramson	General Manager
Tim Healy	Assistant General Manager/ District Engineer
<u>Monica Oakley</u>	<u>Oakley Water Strategies</u>

CHAPTER 5

List of EIR/EIS Preparers

A list of persons who prepared various sections of the EIR/EIS, prepared significant background materials, or participated to a significant degree in preparing the EIR/EIS is presented below.

North Bay Water Reuse Authority (NBWRA)

Sonoma County Water Agency (CEQA Lead Agency)

Marc Bautista	Project Manager
Kevin Booker	Project Engineer
Chuck Weir	Program Manager (NBWRA)

Bureau of Reclamation (NEPA Lead Agency)

David White	Program and Project Manager
Douglas Kleinsmith	Environmental Specialist

NBWRA Member Agencies

Las Gallinas Valley Sanitary District

Marc Williams	General Manager
---------------	-----------------

Novato Sanitary District

Beverly James	Manager-Engineer
---------------	------------------

Sonoma Valley County Sanitation District

See Sonoma County Water Agency above.

Napa Sanitation District (Member Agency)

Michael Abramson	General Manager
Tim Healy	Assistant General Manager/ District Engineer
Monica Oakley	Oakley Water Strategies

NBWRA Supporting Agencies

North Marin Water District

Chris DeGabriele	General Manager
Drew McIntyre	Chief Engineer

Napa County

Hillary Gitelman	Director of Conservation, Development, and Planning
Felix Riesenber	Principal Water Resources Engineer

**TABLE 5-1
LIST OF PREPARERS**

Name	Qualifications	Participation
ESA		
James E. O'Toole	B.A., Geography; over 15 years experience in water and wastewater infrastructure projects, and environmental documentation for CEQA and NEPA	Project Manager
Asavari Devadiga	Pursuing Ph.D. (City and Regional Planning, UC Berkeley), M.S., Environmental Science and Policy, M.S., Environmental Pollution Control Technology, B.S., Microbiology; 8 years experience in water/wastewater and environmental planning	Deputy Project Manager; Growth Inducement; Alternatives; Climate Change
Cherie Kolin	B.S., Ecology and Systematic Biology; 2 years of experience	Project Coordinator; Public Services and Utilities; Recreation; Irreversible Commitment of Resources; Relationship of Uses and Productivity; Consultation
Katie Blank	B.S., Environmental Management and Protection; 1 year of experience	Aesthetics; Alternatives; Cumulative Impacts
Chris Rogers	B.S., Biology; 20 years of experience in permitting, regulatory compliance, wetland ecology and restoration planning, habitat assessments, endangered species evaluations, restoration and mitigation planning	Biological Resources
Natasha Dvorak	B.A., Biology; 3 years of experience	Biological Resources
Paul Garcia	B.S., Environmental Policy Analysis and Planning; 5 years of experience	Land Use and Agricultural Resources
Eric Schniewind	B.A., Geological Sciences; 13 years of experience as a geologist, hydrogeologist, and hydrologist	Geology, Soils and Seismicity
Heidi Koenig	B.A., Anthropology, M.A., Cultural Resources; Registered Professional Archaeologist; 8 years of experience specializing in California archaeology	Cultural and Paleontological Resources; Indian Trust Assets
Jack Hutchison	M.Eng., Transportation Engineering, B.S., Civil Engineering; 30 years of experience in a wide range of transportation analyses, from planning level impact analyses to operations and design evaluations	Traffic and Transportation
Matthew Fagundes	B.S., Environmental Studies, M.A., Physical Geography; 12 years of experience evaluating air quality and noise impacts to the environment	Air Quality; Noise
Nicole Yeto	B.A., Geography and Environmental Studies; AERMOD Air Dispersion Modeling Workshop; 2 years of experience	Air Quality; Noise
Lisa Bautista	20 years of experience	Technical Editing
Wes McCullough	B.A., Geography with GIS emphasis; 5 years of experience	GIS
Ron Teitel, Perry Jung	B.A., Geography; 20 years of experience B.F.A., Design; 20 years of experience	Graphics

**TABLE 5-1 (Continued)
LIST OF PREPARERS**

Name	Qualifications	Participation
ESA		
Anthony Padilla, Ricardo Ramirez	14 years of experience 7 years of experience	Production
Victor Mullins	M.L.S., Library and Information Science, B.A., English Literature; 8 years of experience	References; Administrative Record
CDM		
Andria Loutsch, AICP	B.S., Economics; 12 years experience	Project Manager, Oversight and Review
Chris Park, AICP, LEED AP	B.S., Natural Resources Planning & Interpretation, Masters in City and Regional Planning; 3 years of experience	Water Quality
James LaVelle, Ph.D.	B.A., Biological Sciences, M.A., Biology, M.S., Industrial and Environmental Toxicology, Ph.D., Biology; 24 years of experience	Water Quality
W. Don Vandertulip, P.E.	B.S., Civil Engineering, M.S., Sanitary Engineering; 35 years of experience	Water Quality
Jennifer Jones	B.A. Biology, M.S. Environmental Science; 15 years of experience	Hazardous Materials
Henry Boucher, P.E., BCEE, AICP	Sc.B., Materials Engineering, M.S., Environmental Engineering; 35 years of experience	Hazardous Materials
Carolyn Buckman, P.E.	B.S., Environmental Engineering, B.S., Planning, M.Eng., Environmental Engineering; 10 years of experience	Surface Hydrology
Michael Savage, P.E., D. WRE.	B.S., Soil and Water Science, M.S., Civil Engineering; 30 years of experience	Surface Hydrology
Stacy Porter	B.A., Environmental Studies; 4 years experience	Groundwater Resources
Brian Heywood, P.E.	B.S., Civil Engineering, M.S., Civil Engineering; 11 years of experience	Groundwater Resources
Gina Veronese	B.S., Agricultural Economics, M.S., Agricultural and Resource Economics; 7 years of experience	Socioeconomics, Environmental Justice
Anthony Skidmore, AICP	B.A., Sociology, M.P.A., Public Administration; 25 years of experience	Socioeconomics, Environmental Justice
Mike Podlech, Aquatic Biologist		
Mike Podlech	M.S., Aquatic Ecology, B.S., Environmental Science, 15 years of experience	Aquatic Biology
Rauch Communication Consultants Inc.		
Martin Rauch	B.A., History; 18 years of experience	Public Outreach
Muelrath Public Affairs		
Taylor McDaniel	M.A., Ecology, Culture and Sustainable Community; 10 years of experience	Public Outreach

- Climate Change, ES-16, ES-17, 1-7, 1-21, 1-23, 1-24, 1-25, 1-26, 1-29, 3.2-35, 3.2-36, 3.2-42, 3.8-7, 3.8-10, 3.8-12, 3.8-30, 3.8-41, 3.8-42, 4-55, 5-24, 5-42, 7-1, 7-2, 7-4, 7-5, 7-6, 7-7
- Construction Noise, ES-51, ES-52, ES-68, 3.5-1, 3.5-106, 3.5-110, 3.9-5, 3.9-8, 3.9-10, 3.9-12, 3.9-13, 3.9-14, 3.9-15, 3.9-16, 3.9-17, 3.9-18, 3.9-19, 3.9-20, 4-2, 4-35, 4-43, 5-26, 5-36, 11-35, 11-52
- Consultation, ES-18, ES-19, ES-20, ES-21, ES-22, ES-37, ES-38, ES-39, ES-41, ES-42, ES-55, ES-57, ES-59, ES-62, 1-5, 1-7, 3.4-17, 3.4-33, 3.5-49, 3.5-94, 3.5-100, 3.5-115, 3.5-132, 3.5-135, 3.7-15, 3.10-37, 3.12-1, 3.12-13, 3.12-27, 3.12-28, 3.12-29, 3.12-36, 3.12-37, 3.12-49, 3.13-22, 4-16, 4-18, 5-19, 5-38, 8-1, 8-6, 8-7, 8-8, 8-9, 8-10, 11-13, 11-16, 11-17, 11-20, 11-23, 11-24, 11-40, 11-44, 11-45, 11-48
- Contra Costa Goldfields, 3.5-16, 3.5-33, 3.5-48, 3.5-125, 3.5-129, 3.5-130
- Criteria Pollutants, ES-48, ES-50, ES-70, 3.8-1, 3.8-4, 3.8-5, 3.8-8, 3.8-13, 3.8-16, 3.8-17, 3.8-19, 3.8-23, 3.8-24, 4-46, 4-55, 6-8, 11-33
- Delta Smelt, 3.5-11, 3.5-35, 3.5-41, 3.5-47, 3.5-139
- Discharge, ES-26, ES-29, ES-32, ES-36, 1-13, 1-15, 1-25, 1-26, 1-27, 2-10, 2-32, 2-38, 2-44, 3.2-1, 3.2-3, 3.2-4, 3.2-5, 3.2-21, 3.2-22, 3.2-23, 3.2-24, 3.2-25, 3.2-26, 3.2-27, 3.2-28, 3.2-29, 3.3-5, 3.3-8, 3.3-12, 3.4-5, 3.4-8, 3.4-11, 3.4-12, 3.4-13, 3.4-17, 3.4-18, 3.4-19, 3.4-20, 3.4-26, 3.4-27, 3.4-43, 3.4-44, 3.4-46, 3.4-48, 3.4-50, 3.4-51, 3.4-53, 3.4-54, 3.4-56, 3.4-57, 3.4-58, 3.4-59, 3.4-60, 3.4-61, 3.4-62, 3.4-63, 3.4-65, 3.4-67, 3.5-2, 3.5-3, 3.5-50,

3.5-53, 3.5-73, 3.5-74, 3.5-75, 3.5-76, 3.5-77, 3.5-78, 3.5-79, 3.8-10, 3.8-14, 3.12-2, 4-3, 4-13, 4-22, 4-24, 4-28, 4-35, 4-36, 4-39, 4-40, 4-43, 4-54, 4-55, 5-12, 5-16, 5-19, 6-4, 6-8, 6-9, 6-20, 6-22, 6-23, 6-24, 6-25, 6-26, 6-27, 6-29, 6-30, 6-31, 6-33, 6-34, 10-1, 11-7, 11-8, 11-10, 11-13

Discovery of Human Remains, ES-61, 3.12-39, 3.12-40, 3.12-41, 3.12-46, 11-47, 11-48

Disruption to Access, ES-46, ES-47, 3.7-20, 3.7-24, 3.7-25, 3.7-27, 3.7-28, 3.7-29, 11-30, 11-31

Drainage Pattern, ES-26, ES-29, 3.2-6, 3.2-7, 3.2-9, 3.2-11, 3.2-15, 3.2-17, 3.2-18, 3.2-20, 3.2-21, 3.2-34, 3.2-35, 3.4-18, 3.4-26, 3.5-32, 4-49, 5-23, 5-35, 5-36, 6-9, 6-24, 11-4, 11-8

Emergency Service Provider, ES-45, ES-55, 3.7-19, 3.11-15, 3.11-24, 3.11-44, 4-47, 6-15, 11-27, 11-29, 11-41, 11-42

Energy, ES-17, 1-20, 1-21, 1-22, 1-23, 1-24, 1-25, 1-26, 2-55, 3.1-4, 3.4-3, 3.8-10, 3.8-11, 3.8-30, 3.8-31, 3.9-1, 3.9-2, 3.11-37, 3.11-38, 3.11-39, 3.11-40, 4-2, 4-17, 4-21, 4-36, 4-57, 5-19, 5-26, 5-29, 5-32, 5-38, 6-20, 6-23, 6-31, 7-1, 7-5, 7-6, 9-1

Environmental Justice, ES-20, ES-64, ES-65, 3.15-1, 3.15-5, 3.15-6, 3.15-7, 3.15-12, 3.15-13, 3.15-16, 3.15-18, 3.15-21, 3.15-33, 3.15-34, 3.15-35, 3.16-21, 8-8, 8-11

Erosion, ES-16, ES-24, ES-29, ES-49, ES-68, 3.1-7, 3.1-10, 3.1-14, 3.1-15, 3.1-19, 3.1-27, 3.1-28, 3.1-29, 3.1-30, 3.1-31, 3.1-41, 3.4-18, 3.4-19, 3.4-20, 3.4-26, 3.5-1, 3.5-33, 3.5-65, 3.8-22, 4-2, 4-13, 4-19, 4-22, 4-27, 4-30, 4-31, 4-32, 4-34, 4-35, 4-38, 4-40, 4-43, 4-44, 5-24, 5-25, 5-28, 5-29, 5-30, 5-31, 5-34, 5-35, 5-36, 5-38, 5-42, 6-8, 11-2, 11-3, 11-4, 11-7, 11-8, 11-33, 11-52

Executive Summary, ES-1, 1-6

Farmland, ES-43, 3.5-3, 3.5-121, 3.6-1, 3.6-2, 3.6-7, 3.6-8, 3.6-10, 3.6-13, 3.6-25, 3.6-27, 3.6-28, 3.6-29, 3.6-31, 3.6-32, 3.6-34, 3.6-35, 3.14-1, 4-45, 4-54, 5-3, 5-23, 5-29, 5-31, 5-37, 5-42, 6-13, 8-10, 11-25

Feasibility Report, ES-4, ES-18, ES-21, ES-22, 1-11, 1-12, 1-27, 1-29, 4-22, 6-2

Federal Endangered Species Act, ES-20, ES-21, 3.5-49, 8-7, 8-8

Fire, ES-44, ES-46, ES-55, 1-17, 1-24, 3.6-19, 3.7-19, 3.7-20, 3.7-21, 3.7-35, 3.8-10, 3.8-11, 3.10-7, 3.10-10, 3.10-12, 3.10-13, 3.10-18, 3.10-29, 3.10-33, 3.10-37, 3.10-39, 3.11-1, 3.11-3, 3.11-5, 3.11-7, 3.11-9, 3.11-11, 3.11-13, 3.11-15, 3.11-17, 3.11-18, 3.11-19, 3.11-20, 3.11-21, 3.11-22, 3.11-24, 3.11-25, 3.11-26, 3.11-27, 3.11-28, 3.11-29, 3.11-30, 3.11-35, 3.11-44, 3.11-45, 3.11-46, 3.13-21, 4-47, 5-25, 5-27, 5-28, 5-29, 5-31, 5-32, 5-36, 5-37, 5-38, 5-41, 6-8, 6-15, 11-27, 11-30, 11-40, 11-41, 11-42

Flooding, ES-17, ES-26, ES-27, ES-28, ES-68, 3.2-1, 3.2-3, 3.2-4, 3.2-5, 3.2-6, 3.2-7, 3.2-21, 3.2-22, 3.2-23, 3.2-24, 3.2-25, 3.2-26, 3.2-27, 3.2-28, 3.2-29, 3.2-30, 3.2-35, 3.2-36, 3.2-41, 3.3-17, 3.3-29, 3.3-30, 3.3-31, 3.3-32, 3.3-43, 3.4-1, 3.4-19, 3.5-5, 4-49, 5-25, 5-29, 5-31, 5-35, 5-36, 5-39, 5-41, 5-42, 6-8, 6-9, 6-11, 7-2, 7-4, 7-5, 11-6

- Geology, ES-24, ES-25, 3.1-1, 3.1-11, 3.1-16, 3.1-18, 3.1-19, 3.1-40, 3.1-41, 3.1-42, 3.1-43, 3.3-2, 3.3-4, 3.3-7, 3.3-11, 3.3-14, 3.12-52, 3.12-54, 4-35, 4-36, 4-37, 5-24, 5-26, 5-28, 5-39, 5-42, 11-1
- GHG emission, ES-51, ES-70, 3.8-9, 3.8-10, 3.8-13, 3.8-14, 3.8-30, 3.8-31, 3.8-32, 3.8-33, 3.8-34, 3.8-35, 3.8-36, 3.8-37, 3.8-38, 3.8-39, 3.8-40, 4-14, 4-15, 4-46, 4-55, 7-1, 7-2, 7-4, 11-34
- Green Sturgeon, 3.5-13, 3.5-31, 3.5-35, 3.5-48
- Greenhouse gas, ES-17, ES-70, 1-21, 1-23, 1-24, 1-25, 1-26, 1-29, 3.8-7, 3.8-10, 3.8-11, 3.8-12, 3.8-13, 3.8-23, 3.8-30, 3.8-41, 3.8-42, 4-17, 4-25, 4-26, 4-46, 4-55, 5-23, 5-24, 5-35, 7-1, 7-6
- Groundwater Basin, 3.3-2, 3.3-4, 3.3-5, 3.3-9, 3.3-14, 3.3-15, 3.3-21, 5-14, 5-16, 7-4
- Groundwater Quality, ES-5, ES-28, ES-31, ES-69, 1-8, 1-13, 3.3-1, 3.3-4, 3.3-5, 3.3-8, 3.3-12, 3.3-15, 3.3-16, 3.3-17, 3.3-18, 3.3-20, 3.3-32, 3.3-33, 3.3-34, 3.3-35, 3.3-36, 3.3-37, 3.4-43, 3.4-44, 3.4-45, 3.4-46, 3.4-68, 4-25, 4-50, 6-11, 7-4, 11-8
- Groundwater Recharge, ES-28, 1-14, 3.3-11, 3.3-17, 3.3-37, 3.3-38, 3.3-39, 3.3-40, 3.3-41, 3.3-42, 3.11-42, 4-25, 4-42, 4-50, 5-15, 5-23, 5-24, 6-11
- Growth, ES-5, ES-16, ES-17, ES-42, ES-70, ES-71, 1-7, 1-12, 1-13, 3.3-2, 3.3-5, 3.3-8, 3.3-11, 3.3-22, 3.4-3, 3.4-65, 3.5-36, 3.5-135, 3.6-33, 3.11-12, 3.11-15, 3.15-6, 3.15-34, 3.16-15, 3.16-18, 4-3, 4-13, 4-23, 4-24, 4-25, 5-1, 5-2, 5-3, 5-10, 5-12, 5-13, 5-15, 5-17, 5-18, 5-19, 5-20, 5-22, 5-23, 5-24, 5-26, 5-28, 5-29, 5-30, 5-31, 5-35, 5-36, 5-37, 5-40, 5-41, 5-43, 5-45, 6-23, 7-4, 11-24, 11-53
- Hazard, ES-24, ES-48, ES-53, ES-54, ES-55, 3.1-1, 3.1-6, 3.1-7, 3.1-8, 3.1-10, 3.1-14, 3.1-17, 3.1-18, 3.1-20, 3.1-22, 3.1-23, 3.1-24, 3.1-25, 3.1-27, 3.1-37, 3.1-42, 3.1-43, 3.2-6, 3.2-7, 3.7-9, 3.7-10, 3.7-29, 3.8-14, 3.10-1, 3.10-10, 3.10-11, 3.10-12, 3.10-13, 3.10-14, 3.10-15, 3.10-22, 3.10-33, 3.10-34, 3.10-35, 3.10-36, 3.10-37, 3.10-38, 3.11-24, 3.11-25, 4-45, 4-48, 4-49, 5-24, 5-25, 5-27, 5-29, 5-30, 5-31, 5-35, 5-36, 5-41, 5-42, 6-8, 6-14, 6-26, 8-10, 11-2, 11-31, 11-37, 11-38, 11-40
- Hazardous Materials, ES-16, ES-29, ES-53, ES-54, ES-55, ES-68, 3.1-42, 3.4-19, 3.4-20, 3.4-26, 3.5-90, 3.10-1, 3.10-2, 3.10-3, 3.10-4, 3.10-5, 3.10-7, 3.10-9, 3.10-10, 3.10-11, 3.10-12, 3.10-13, 3.10-14, 3.10-15, 3.10-16, 3.10-17, 3.10-18, 3.10-19, 3.10-20, 3.10-21, 3.10-22, 3.10-23, 3.10-24, 3.10-25, 3.10-26, 3.10-27, 3.10-28, 3.10-29, 3.10-30, 3.10-31, 3.10-32, 3.10-38, 3.11-8, 3.11-10, 3.11-11, 4-27, 4-34, 4-35, 4-36, 4-37, 4-43, 4-44, 4-47, 5-25, 5-26, 5-29, 5-30, 5-32, 5-35, 5-36, 5-40, 5-42, 5-43, 6-8, 6-14, 6-26, 11-7, 11-8, 11-37, 11-38, 11-39, 11-40, 11-52
- Historic Resources, ES-70, 3.12-20, 3.12-30, 3.12-31, 3.12-42, 3.12-43, 3.12-48, 4-56, 5-29, 5-31, 6-16
- Hydrology, ES-20, ES-26, ES-27, 3.2-1, 3.2-6, 3.2-7, 3.2-41, 3.2-43, 3.3-44, 3.3-45, 3.4-1, 3.5-59, 3.6-33, 4-20, 5-28, 5-33, 5-38, 6-9, 6-10, 6-13, 6-26, 6-27, 7-2, 7-5, 7-6, 7-7, 8-8, 11-4
- Impacts on Burrowing Owl, ES-38, 3.5-101, 3.5-102, 3.5-103, 3.5-104, 3.5-105, 3.5-106, 11-18

- Impacts on Nesting Birds, ES-39, 3.5-106, 3.5-107, 3.5-108, 3.5-109, 3.5-110, 3.5-111, 11-18
- Impacts on Salt Marsh Harvest Mouse, ES-39, 3.5-112, 3.5-113, 3.5-114, 3.5-115, 3.5-116, 11-20
- Land Use, ES-5, ES-6, ES-20, ES-42, ES-43, ES-44, ES-46, ES-68, ES-69, ES-70, 1-12, 2-4, 2-9, 3.1-19, 3.2-4, 3.3-16, 3.3-21, 3.4-1, 3.4-28, 3.6-1, 3.6-2, 3.6-7, 3.6-8, 3.6-9, 3.6-10, 3.6-12, 3.6-13, 3.6-15, 3.6-16, 3.6-17, 3.6-18, 3.6-19, 3.6-20, 3.6-21, 3.6-22, 3.6-23, 3.6-24, 3.6-26, 3.6-27, 3.6-29, 3.6-30, 3.6-31, 3.6-32, 3.6-33, 3.6-34, 3.6-35, 3.6-36, 3.6-37, 3.7-20, 3.7-23, 3.7-35, 3.9-4, 3.9-7, 3.9-8, 3.9-30, 3.10-1, 3.10-14, 3.10-19, 3.14-1, 3.14-5, 3.14-6, 3.14-10, 3.14-13, 3.14-14, 3.14-16, 3.14-20, 3.14-30, 3.14-36, 3.14-39, 3.14-42, 3.16-4, 3.16-15, 4-13, 4-20, 4-22, 4-24, 4-26, 4-35, 4-36, 4-37, 4-43, 4-44, 4-47, 4-54, 5-2, 5-3, 5-5, 5-17, 5-18, 5-19, 5-20, 5-23, 5-24, 5-25, 5-27, 5-28, 5-29, 5-30, 5-32, 5-33, 5-34, 5-35, 5-36, 5-37, 5-39, 5-41, 5-45, 6-3, 6-8, 6-13, 6-26, 8-2, 8-8, 8-10, 8-11, 9-1, 11-25, 11-30, 11-52, 11-54

APPENDIX A

Distribution List

The Distribution List consists of agencies, organizations, and individuals that received the hard copy or a CD of the Draft EIR/EIS. The list includes the entities who received the Notice of Availability (NOA) and/or a postcard informing the public release of the Draft EIR/EIS. Entities who commented on the Draft EIR/EIS are marked with an asterisk.

DISTRIBUTION LIST FOR RECIPIENTS OF HARD COPY OR A CD OF DRAFT EIR/EIS

Last Name	First Name	Groups or Affiliation	Address	City	State	Zip	Document Received
Anderson	Dain	Marin Municipal Water District, Environmental Services Coordinator	220 Nellen Avenue	Corte Madera	CA	94925	CD

APPENDIX B

Consultation

The enclosed record of consultation consists of formal correspondence from regulatory agencies.

UNITED STATES DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration

NATIONAL MARINE FISHERIES SERVICE

Southwest Region

501 West Ocean Boulevard, Suite 4200
Long Beach, California 90802- 4213

May 6, 2010

In response, refer to:
2009/04759:AEM

Donald R. Glaser
Regional Director
U.S. Department of the Interior
Bureau of Reclamation, Mid-Pacific Regional Office
2800 Cottage Way
Sacramento, California 95825-1898

Dear Mr. Glaser:

Thank you for your letter of August 25, 2009, requesting initiation of consultation with NOAA's National Marine Fisheries Service (NMFS) pursuant to section 7 of the Endangered Species Act (ESA) as amended (16 U.S.C. 1531 *et seq.*) regarding the North Bay Water Recycling Program (NBWRP) in areas of Marin, Sonoma, and Napa counties, California. This response also serves as a consultation pursuant to the Fish and Wildlife Coordination Act of 1934 (FWCA), as amended. The Bureau of Reclamation (Reclamation) proposes to provide funding to the North Bay Water Recycling Authority's (NBWRA) Member and Cooperating Agencies under the Title XVI Water Recycling and Reuse Program to implement Phase 1 actions of the North San Pablo Bay Restoration and Reuse Project (Reclamation File No. MP-150 ENV-7.00).

NMFS has reviewed the Biological Assessment/Fisheries Biological Assessment (BA) provided with Reclamation's letter of August 25, 2009, the draft Environmental Impact Report/Environmental Impact Statement (Draft EIR/EIS) for the North San Pablo Bay Restoration and Reuse Project (North Bay Water Recycling Water Project) (ESA 2009), and additional information received via telephone conversations and electronic mail in January and February, 2010. Reclamation's proposed action for this consultation consists of projects collectively referred to as Phase 1 projects in the draft EIR/EIS for the NBWRP. Phase 1 projects were assessed in the draft EIR/EIS and they have been identified by NBWRA Member Agencies as priority projects within their individual service areas. In addition to the Phase 1 projects, the draft EIR/EIS presents three Alternatives which are incrementally larger than Phase 1 actions and are expected to be implemented in the future. However, only Phase 1 projects have been approved by the NBWRA's Member Agency Board members and approved for funding. Therefore, Reclamation only proposes to fund Phase 1 projects at this time and has requested that NMFS only consult on Phase 1 projects (D. Kleinsmith and J. O'Toole, personal communication, February 2010).

Projects included in Phase 1 of the NBWRP will expand the use of recycled water in Marin, Sonoma, and Napa counties by expanding water reuse facilities at four Member Agencies: (1) Las Gallinas Valley Sanitation District (LGVSD) in Marin County; (2) Novato Sanitation District (Novato SD) in Marin County; (3) Sonoma Valley County Sanitation District (SVCSD) in Sonoma County; and (4) Napa Sanitation District (Napa SD) in Napa County. Among them, they serve 13 water recycling service areas that cover approximately 318 square miles of land. All of the Member Agencies currently either have tertiary treatment capability or are in the process of developing tertiary treatment capability by 2010. Phase 1 projects will expand recycled water production capabilities of Member Agencies through facility upgrades. These projects include: (1) construction and installation of new pipelines to deliver recycled water; (2) construction of additional storage and pumping facilities; and (3) capacity upgrades at existing wastewater treatment plants (WWTP).

Phase 1 projects of the NBWRP includes actions in or near Miller Creek, Novato Creek, Rodgers Creek, Carriger Creek, Sonoma Creek, Schell Creek, Huichica Creek, Tulucay Creek, Sarco Creek, Kreuse Creek, Murphy Creek, Arroyo Avichi Creek, Fowler Creek, Napa River and their tributaries, Schell Slough, and San Pablo Bay. Construction activities are scheduled to be restricted to the period between June 15 and November 1 in wetted stream channels, or April 15 through November 1 if the stream channel is dry. The project elements proposed in individual service areas may be found in detail within the BA and draft EIS/EIR for this project.

Compared to 2002 values, Phase 1 projects will provide an additional 46 miles of new pipeline, 1,873 HP of pumping capacity, treatment facilities providing 6.4 million gallons per day (mgd) of tertiary capacity, 65 acre-feet (AF) of storage, and 3,757 acre-feet per year (AFY) of recycled water. Recycled water will be produced by tertiary treatment of effluent using a variety of filtration and disinfection methods pursuant to Article 4 in Title 22 of the California Code of Regulations, which sets water quality standards and treatment reliability criteria for recycled water. Tertiary treated water produced by each Member Agency will be used within their individual service area for various irrigation needs, including, but not limited to, urban landscaping, dairy and pasture, orchards, farms, and vineyards. Facility upgrades at SVCSD will also provide recycled water to the Napa Salt Marsh area for habitat enhancement. Treated effluent from the Member Agency WWTPs is also discharged into sloughs or major tributaries, where it ultimately flows into San Pablo Bay, or effluent is discharged directly into San Pablo Bay. The construction of new pumping and storage facilities will occur above the higher high water mark. All facilities are designed to meet the flow and water quality limits of Member Agencies' existing Waste Discharge Permit issued by Regional Water Quality Control Boards. Furthermore, the NBWRA Member Agencies have proposed conservation measures applicable to the control the control of sediment, hydrocarbon, and turbidity in nearby waterways during construction and installation of pipelines. These measures may be found in detail within the BA for this project. Pertinent measures associated with waterways include the following:

1. Trenchless construction methods will be utilized for installing underground pipelines that cross streams that may contain ESA-listed species or critical habitat.
2. A qualified biological monitor will be on site during all underground pipeline

- construction near streams where ESA-listed species or critical habitat may occur. The biological monitor will halt construction if contaminants are introduced to the stream.
3. Silt fencing will be installed in all areas where construction occurs within 100 feet of streams where ESA-listed species or critical habitat may occur.
 4. A spill prevention plan for potentially hazardous materials will be prepared and implemented.
 5. Equipment and materials will be stored at least 50 feet from waterways.
 6. Proper and timely maintenance for vehicles and equipment used during construction will be provided to reduce the potential for mechanical breakdowns leading to a spill of materials into waterways.
 7. In the event that directional drilling is used for pipeline installation, a Frac-Out Contingency Plan shall be prepared and approved by NMFS prior to construction.

Reclamation has requested NMFS' concurrence with its determination that proposed Phase 1 projects are not likely to adversely affect ESA-listed species.

Endangered Species Act

Available information indicates that the following listed Distinct Population Segments (DPS) or Evolutionarily Significant Units (ESU) of salmon, steelhead, and sturgeon and their designated critical habitats may occur in the project area:

- Central California Coast steelhead DPS (*Oncorhynchus mykiss*)**
 - threatened (71 FR 834, January 5, 2006)
 - critical habitat (70 FR 52488, September 2, 2005)
- North American Green Sturgeon southern DPS (*Acipenser medirostris*)**
 - threatened (71 FR 17757, April 7, 2006)
 - critical habitat (74 FR 52300, November 9, 2009)
- Sacramento River winter-run Chinook salmon ESU (*Oncorhynchus tshawytscha*)**
 - endangered (70 FR 37160, June 28, 2005)
 - critical habitat (58 FR 33212, June 16, 1993)
- Central Valley spring-run Chinook salmon ESU (*Oncorhynchus tshawytscha*)**
 - threatened (70 FR 37160, June 28, 2005)
- Central Valley steelhead DPS (*Oncorhynchus mykiss*)**
 - threatened (71 FR 834, January 5, 2006)

Listed salmon and steelhead occur seasonally near several Phase 1 project sites. San Pablo Bay serves primarily as a migration corridor for adult and juvenile salmonids between the ocean and their natal streams. Winter-run Chinook salmon, Central Valley spring-run Chinook salmon, and Central Valley steelhead migrate through San Pablo Bay to and from their natal streams in the Central Valley. Central California Coast (CCC) steelhead also migrate through San Pablo Bay and they are known to spawn and rear in the following San Pablo Bay tributaries where Phase 1 projects will occur: Miller Creek, Novato Creek, Rodgers Creek, Carriger Creek, Sonoma Creek, Schell Creek, Huichica Creek, Tulucay Creek, Murphy Creek, Sarco Creek, Fowler Creek, and

Napa River and their tributaries. Adult salmon and steelhead migration takes place primarily during the winter and early spring months. Juvenile salmon and steelhead migrate downstream from their natal streams, through San Pablo Bay to the ocean primarily during the late winter and spring months. Adult and juvenile CCC steelhead, winter-run Chinook, spring-run Chinook, and Central Valley steelhead may be present during the ongoing operations and construction of Phase 1 projects. More information regarding the life history of salmon and steelhead can be found in Busby *et al.* (1997 and 1996, respectively).

The southern distinct population segment (DPS) of North American green sturgeon spawn in the deep turbulent sections of the upper reaches of the Sacramento River. Adult green sturgeon return from the ocean every one to two years to spawn, and generally show fidelity to their upper Sacramento River spawning sites. They migrate through San Pablo bay into Sacramento River to spawn. Their spawning period is from March to July, with a peak in mid-April to mid-June (Moyle *et al.* 1992). As juvenile green sturgeon age, they migrate downstream and live in the lower delta and bays, spending from three to four years there before entering the ocean. Juvenile and adult green sturgeon may be present in the project area during ongoing operations and construction of the project. The life history of green sturgeon in California is summarized in Adams *et al.* (2002) and NMFS (2005).

NMFS has evaluated the proposed project for potential adverse effects to listed anadromous salmonids and threatened green sturgeon and designated critical habitat. The proposed project may affect listed fish and critical habitat through degradation of water quality during construction activities and the future operation of the projects. Construction activities are proposed to occur during the period between June 15 and November 1 near wetted streams and April 15 to November 1 near dry channels. Construction of storage and pumping facilities, and upgrades to existing treatment facilities will not take place in-water or directly adjacent to waterways. The only construction activities in or near stream channels are associated with pipeline crossings. For pipeline crossings of streams, the project proposes to use jack and bore tunneling or directional drilling. These methods are collectively referred to as trenchless techniques and are explained in more detail in the draft EIR/EIS for the project. Trenchless techniques are less intrusive than open trench methods since there is no surface disturbance. However, directional drilling uses a mud slurry during the drilling operation to lubricate the drilling head and stabilize the bore path that, if released into the waterway, can be harmful to fish. The mud slurry usually consists of a mixture of freshwater and bentonite clay-- a naturally occurring clay mineral that forms a mud when mixed with water. Frac-out, or the inadvertent release of mud slurry into the surrounding area and waterways, can expose fish to very fine clay particles. Exposure to these fine particles may result in short-term disruptions in feeding, migration, or spawning activities. To reduce the potential for Frac-outs to occur, contractors will review geotechnical information at each stream crossing and explore site conditions to establish suitable drilling locations prior to pipeline installation. Furthermore, NBWRP contractors will provide a Frac-out contingency plan to NMFS prior to directional drilling activities. With the incorporation of local geotechnical

information, the Frac-out contingency plan, and the proposed timing of activities, the potential adverse effects of the pipeline crossing construction activities to streams and listed fish are discountable.

The future operation of the NBWRP projects may have indirect effects to listed anadromous salmonids and sturgeon through changes to the quantity and quality of freshwater effluent discharged by Member Agency WWTPs and application of recycled water near streams. NBWRP Member Agencies currently operate WWTPs which discharge freshwater to San Pablo Bay, Schell Slough, and tidally influenced portions of Miller Creek and Napa River from September through May when CCC steelhead, winter-run Chinook, spring-run Chinook, Central Valley steelhead, and green sturgeon may be present. Effluent from these WWTPs contain contaminants such as, metals, cyanide, and conventional pollutants, which at high levels, can alter fish behavior and effect sensory systems involved in growth, reproduction, and survival. Contaminants can also affect prey sources through contamination or reduced availability. The NBWRP is anticipated to have beneficial effects by reducing the amount of effluent discharged from the Member Agency WWTPs because a portion of water that would have been discharged would be reused for recycled water applications. Thus, with the completion of the NBWRP, the amount of contaminants and freshwater released into these waterways with listed fish species will be reduced and assist in preserving their saline water quality properties. For the above reasons, NMFS anticipates that indirect effects to listed anadromous salmonids and sturgeon associated with future wastewater discharge changes at Member Agency WWTPs will result in improvements over existing baseline conditions.

Regarding the application of recycled water near waterways, Phase 1 of the NBWRP will use recycled water for irrigation in areas adjacent to waterways where listed anadromous salmonids and green sturgeon may be present. This may affect listed fish and their habitat by introducing contaminants found in recycled water to nearby waterways. As discussed above, recycled water may contain contaminants that, at high levels, can alter fish behavior and effect sensory systems and prey sources. However, past water quality records show that Member Agency pre-treated effluent contaminant concentrations are below thresholds that are harmful to fish. Additionally, Phase 1 of the NBWRP will result in upgrades to Member Agency treatment capacities so that recycled water would be treated to tertiary-treatment standards that are expected to further reduce these contaminant concentrations. Thus, recycled wastewater applied near waterways is expected to have low contaminant levels and NMFS anticipates that the effects of using recycled water for irrigation will be insignificant.

Regarding designated critical habitat, Phase 1 projects include pipeline crossings on the following waterways designated as critical habitat for CCC steelhead: Rodgers Creek, Carriger Creek, Sonoma Creek, Schell Creek, Huichica Creek, Tulucay Creek, Murphy Creek, Sarco Creek, Fowler Creek, and Napa River. In addition, Member Agency WWTP outfall locations are located in San Pablo Bay, Schell Slough, and tidally influenced portions of Miller Creek and Napa River which are designated critical habitat for the southern DPS of North American Green Sturgeon. San Pablo Bay is also designated as critical habitat for Sacramento River winter-run Chinook salmon and CCC steelhead. Primary constituent elements (PCE) of designated critical

habitat for CCC steelhead, winter-run Chinook and the southern DPS of green sturgeon include: water quantity, water depth, water flow, food resources, migratory corridor, sediment quality, floodplain connectivity, natural cover, salinity conditions, and water quality. Potential effects to designated critical habitat include short-term disturbance to the streambed from construction activities and changes in the quantity and quality of effluent from Member Agencies' ongoing WWTP operations. Construction near streams is not expected to degrade critical habitat PCEs due to the use of jack and bore tunneling or directional drilling for pipeline crossings. These techniques are expected to avoid disturbance to the banks and beds of streams designated as critical habitat. Ongoing operations of NBWRP Member Agencies may result in the introduction of contaminants in areas designated as critical habitat. However, contaminant levels in WWTP effluent and recycled water used for irrigation are expected to be minor given current treatment standards and upgrades to Member Agency treatment capacities. Furthermore, decreasing the amount of freshwater released from WWTPs into saline areas will reduce the potential for saltwater communities to be converted to freshwater or brackish communities. Thus, the project is expected to improve critical habitat near WWTP discharge locations by decreasing the amount of contaminants and freshwater discharged into these waterways. The expected levels of disturbance from operations and construction on designated critical habitat are minor and are not expected to affect migration, rearing, or spawning of CCC steelhead, green sturgeon, or Sacramento River winter-run Chinook. Overall, the project is not expected to result in adverse impacts to designated critical habitat. No ongoing impacts to designated critical habitat are expected from this project.

Based upon the best available information, NMFS concurs with Reclamation's finding that the proposed project is not likely to adversely affect ESA-listed fish species under the jurisdiction of NMFS. Regarding designated critical habitat, NMFS has determined the proposed project is not likely to adversely affect PCEs associated with CCC steelhead, Sacramento River winter-run Chinook salmon, and the southern DPS of green sturgeon designated critical habitat. This concludes consultation in accordance with 50 CFR §402.13(a) for the proposed Phase 1 actions of the North San Pablo Bay Restoration and Reuse Project (North Bay Water Recycling Program [NBWRP]) in Marin, Sonoma, and Napa Counties, California. However, further consultation may be required if: (1) new information becomes available indicating that listed species or critical habitat may be affected by the project in a manner or to an extent not previously considered; (2) current project plans change in a manner that causes an effect to listed species or critical habitat in a manner not previously considered; or (3) a new species is listed or critical habitat designated that may be affected by the action.

Fish and Wildlife Coordination Act

The purpose of the Fish and Wildlife Coordination Act (FWCA) is to ensure that wildlife conservation receives equal consideration, and is coordinated with other aspects of water resources development [16 U.S.C. 661]. The FWCA establishes a consultation requirement for federal departments and agencies that undertake any action that proposes to modify any stream or other body of water for any purpose, including navigation and drainage [16 U.S.C 662(a)]. Consistent with this consultation requirement, NMFS provides recommendations and comments

to federal action agencies for the purpose of conserving fish and wildlife resources. NMFS has no FWCA recommendations to offer regarding this project, because the project contains adequate measures to protect aquatic habitat.

If you have any questions regarding these consultations or require additional information, please contact Amanda Morrison of my staff at (707) 575-6083, or by electronic mail at Amanda.Morrison@noaa.gov.

Sincerely,

Rodney R. McInnis
Regional Administrator
