

Appendix D: Migratory Bird List for the Tahoe National Forest (BCR's 9 and 15, USFWS 2008)

Species [nb=non-breeding in BCR]	Sierra Nevada, BCR 15	Great Basin, BCR 9	(1=breeding, 2= migratory/transient, 3=unknown, 0=not on Forest)	COMMENTS?
Snowy plover		X	0	would be accidental on TNF transient at best
Yellow billed cuckoo		X	0	no modern records in the Tahoe NF area
Virginia's warbler		X	0	could occur but would be a 150 mile range expansion from the Inyo NF
Black-chinned sparrow		X	0	No records of breeding are recorded on the Tahoe NF, it is safe to assume the Sierraville R.D. is not appropriate habitat
Black Rosy-finch		X	0	eastern nevada bird
Lewis' woodpecker	X	X	1	burned forest exists and breeding is assumed on the Tahoe N.F.
Peregrine falcon	X	X	1	Have been cross-fostered on the TNF, possible foraging and presence is assumed on National Forest Lands
Flammulated owl	X	X	1	Known to occur on the TNF
California spotted owl	X		1	Known to occur on the TNF
Williamson's sapsucker	X	X	1	Known to occur on the TNF
Olive-sided flycatcher	X		1	Known to occur on the TNF
Bald eagle	X	X	1	Known to occur on the TNF
Calliope hummingbird	X	X	1	breeds on the Tahoe N.F., meadows with forbs such as paintbrush or open conifer with flowering plants (e.g. penstemon and ribes spp) restoring aspen may benefit this species
Willow flycatcher	X	X	1	Breeding occurs on the Tahoe N.F.
Cassin's finch	X		1	open canopy forest with herbaceous and conifer seed sources
White-headed woodpecker		X	1	Breeding known to occur in forested habitats on th TNF
Golden eagle		X	1	Known to breed on the TNF
Brewer's sparrow		X	1	Known to occur on the TNF
Eared grebe (nb)		X	1	Known to occur on the TNF
Sage sparrow		X	1	Suitable habitat on the eastside of the Tahoe National Forest
Pinyon jay		X	1	Common on west side, uncommon on east side
Green-tailed towhee		X	1	uncommon but breeds throughout the forest in montane chaparral as well as eastside juniper/sagebrush areas
Long-billed curlew		X	2	possible rare breeder, more likely migratory or transient
Black swift	X	X	2	breeding birds may forage on the TNF, but more likely transient or migrant
Tri-colored blackbird		X	2	uncommon, detections within the Sierra Valley on eastside of the Tahoe NF
Marbled godwit (nb)		X	2	rare transient
Loggerhead shrike		X	2	rare migrant/winter visitor
Yellow rail		X	2	no modern records in the Tahoe NF area
Ferruginous hawk		X	2	breeds in Great Basin east of Sierraville, migrant or transient most likely
Sage thrasher		X	2	Possible habitat on the eastside of the Tahoe N.F., but no current records of breeding sagebrush/bitterbrush habitat that they would require
