141 4. Article 7 of the Existing Contract, entitled RATES AND METHOD OF
142 PAYMENT FOR WATER, is amended as follows:

143 (a) The heading of the Existing Contract is amended and replaced in its
144 entirety with RATES, METHOD OF PAYMENT FOR WATER AND ACCELERATED
145 REPAYMENT OF FACILITIES.

146 (b) Subdivision (a) of Article 7 of the Existing Contract is amended and
147 replaced in its entirety with the following new subdivision (a):

148 (a) Notwithstanding the Contractor's full prepayment of the
149 Repayment Obligation pursuant to section 4011, subsection (a)(2)(A) and subsection (a)(3)(A) of
150 the WIIN Act, as set forth in Exhibit D, and any payments required pursuant to section 4011,
151 subsection (b) of the WIIN Act, to reflect the adjustment for the final cost allocation as described
152 in this Article, subsection (b), the Contractor's Project construction and other cost obligations
153 shall be determined in accordance with: (i) the Secretary's ratesetting policy for Irrigation Water
154 adopted in 1988 and the Secretary's then-existing ratesetting policy for M&I Water, consistent
155 with the WIIN Act; and such ratesetting policies shall be amended, modified, or superseded only
156 through a public notice and comment procedure; (ii) applicable Federal Reclamation law and
157 associated rules and regulations, or policies; and (iii) other applicable provisions of this Contract.
158 Payments shall be made by cash transaction, electronic funds transfers, or any other mechanism
159 as may be agreed to in writing by the Contractor and the Contracting Officer. The Rates and

Charges applicable to the Contractor upon execution of this Contract are set forth in Exhibit "B," as may be revised annually.

(1) The Contractor shall pay the United States as provided for in this Article of this Contract for all Delivered Water at Rates and Charges in accordance with policies for Irrigation Water and M&I Water. The Contractor's Rates shall be established to recover its estimated reimbursable costs included in the operation & maintenance component of the Rate and amounts established to recover deficits and other charges, if any, including construction costs as identified in the following subdivisions.

(2) In accordance with the WIIN Act, the Contractor's allocable share of Project construction costs will be repaid pursuant to the provisions of this Contract.

(A) The amount due and payable to the United States, pursuant to the WIIN Act, shall be the Repayment Obligation. The Repayment Obligation has been computed by the Contracting Officer in a manner consistent with the WIIN Act and is set forth as a lump sum payment (M&I and Irrigation) and as four (4) approximately equal annual installments (Irrigation Only) to be repaid no later than three (3) years after the effective date of this Contract as set forth in Exhibit D. The Repayment Obligation is due in lump sum by **January 30, 2021** as provided by the WIIN Act. The Contractor must provide appropriate notice to the Contracting Officer in writing no later than thirty (30) days prior to **January 30, 2021** if electing to repay the amount due using the lump sum alternative. If such notice is not provided by such date, the Contractor shall be deemed to have elected the installment payment alternative, in which case, the first such payment shall be made no later than **January 30, 2021**.

The second payment shall be made no later than the first anniversary of the first payment date.

The third payment shall be made no later than the second anniversary of the first payment date.

The final payment shall be made no later than **December 1, 2023**. If the installment payment option is elected by the Contractor, the Contractor may pre-pay the remaining portion of the Repayment Obligation by giving the Contracting Officer sixty (60) days written notice, in which case, the Contracting Officer shall re-compute the remaining amount due to reflect the pre-payment using the same methodology as was used to compute the initial annual installment payment amount, which is illustrated in Exhibit D. Notwithstanding any Additional Capital Obligation that may later be established, receipt of the Contractor's payment of the Repayment Obligation to the United States shall fully and permanently satisfy the Existing Capital Obligation.

(B) Additional Capital Obligations that are not reflected in the schedules referenced in Exhibit D and properly assignable to the Contractor, shall be repaid as prescribed by the WIIN Act without interest except as required by law. Consistent with Federal Reclamation law, interest shall continue to accrue on the M&I portion of the Additional Capital Obligation assigned to the Contractor until such costs are paid. Increases or decreases in the Additional Capital Obligation assigned to the Contractor caused solely by annual adjustment of the Additional Capital Obligation assigned to each Project contractor by the Secretary shall not be considered in determining the amounts to be paid pursuant to this subdivision (a)(2)(B), however, they will be considered under subdivision (b) of this Article. A separate agreement shall be established by the Contractor and the Contracting Officer to accomplish repayment of

the Additional Capital Obligation assigned to the Contractor within the timeframe prescribed by the WIIN Act, subject to the following:

(1) If the collective Additional Capital Obligation properly assignable to the contractors exercising conversion under section 4011 of the WIIN Act is less than five million dollars (\$5,000,000), then the portion of such costs properly assignable to the Contractor shall be repaid not more than five (5) years after the Contracting Officer notifies the Contractor of the Additional Capital Obligation; Provided, That the reference to the amount of five million dollars (\$5,000,000) shall not be a precedent in any other context.

(2) If the collective Additional Capital Obligation properly assignable to the contractors exercising conversion under section 4011 of the WIIN Act is equal to or greater than five million dollars (\$5,000,000), then the portion of such costs properly assignable to the Contractor shall be repaid as provided by applicable Federal Reclamation law and Project ratesetting policy; Provided, That the reference to the amount of five million dollars (\$5,000,000) shall not be a precedent in any other context.

(c) Article 7 of the Existing Contract is amended to add a new subdivision (b); subdivisions (b) through (n) of Article 7 of the Existing Contract are redesignated as subdivisions (c) through (o):

(b) In the event that the final cost allocation referenced in Section 4011(b) of the WIIN Act determines that the costs properly assignable to the Contractor are greater than what has been paid by the Contractor, the Contractor shall be obligated to pay the remaining allocated costs. The term of such additional repayment contract shall be not less than one (1) year and not more than ten (10) years, however, mutually agreeable provisions regarding

the rate of repayment of such amount may be developed by the Contractor and Contracting Officer. In the event that the final cost allocation indicates that the costs properly assignable to the Contractor are less than what the Contractor has paid, the Contracting Officer shall credit such overpayment as an offset against any outstanding or future obligations of the Contractor, with the exception of Restoration Fund charges pursuant to section 3407(d) of Public Law 102-575.

5. Article 12 of the Existing Contract, entitled CONSTRAINTS ON THE AVAILABILITY OF WATER, is amended as follows:

EXHIBIT C

GUIDELINES FOR DETERMINING IF PROJECT WATER
IS PUT TO USE AS IRRIGATION WATER

A. Objective:

1. Achieve the proper use of Project Water irrespective of landholding size.
2. Obtain reimbursement to the Reclamation Fund for Project Water at the appropriate Rates.

B. Focus:

1. Usually, the Rates for Irrigation Water are significantly less than the Rates for M&I Water. Contractors that have both irrigation and M&I as purposes of use in their contracts have to determine the appropriate Rates to charge their customers for Project Water. That determination becomes more difficult for smaller landholdings because activities on a rural residence may appear to be like activities on a farm or ranch.
2. To qualify as Irrigation Water, Project Water must be used to irrigate land primarily for the production of commercial agricultural crops or livestock, and domestic and other uses that are incidental thereto.

C. Criteria to consider:

1. Existence of a business or development plan; and
2. Commercial crop or livestock sales or barter; and/or
3. Commercial improvements to land, including but not limited to buildings (barns, storage facilities, workshop, livestock shed), irrigation system, leveling, corrals, fencing, fruit or nut trees, vines, etc.); and
4. Related enterprises involving the landholder. For example, Project Water diverted to irrigate pasture for horses used in a commercial cattle operation would be at the Rates for Irrigation Water in contrast to Project Water diverted to irrigate pasture for horses used only for personal enjoyment which would be at the Rates for M&I Water.

D. Decision:

1. The Contractor shall be responsible for ascertaining whether Project Water delivered is put to use as Irrigation Water or M&I Water. In the past, Reclamation's focus has been on landholdings operated in units of less than two acres. More recently, that focus has been on landholdings operated in units of less than five acres.
2. The guidelines recognize that the Contractor continues to survey all landholdings during the term of its contract to determine if landholders are paying the appropriate Rates for Project Water. The Contractor will require a new application requesting Project Water at the Rates for Irrigation Water when there is a change in the purpose of use or ownership of any landholdings after the date of execution of this Contract.

E. Review:

A decision made by the Contractor may be reviewed by Reclamation. If Reclamation does not agree with the Contractor's decision, Reclamation shall provide notification, in writing, to the Contractor explaining specifically why Reclamation believes the decision made by the Contractor to deliver Irrigation Water to the landholding was not done so in accordance with these guidelines. Within 30 days of receipt of such notification, Reclamation and the Contractor shall meet and confer to determine what corrective actions should be taken to resolve the disagreement in accordance with these guidelines. If Reclamation and the Contractor cannot resolve the disagreement within 90 days of that notification, Reclamation shall, thereafter, provide its final determination, in writing to the Contractor. The Contractor retains the right to appeal up to and including the Commissioner of Reclamation any final decision they are in disagreement with.

F. Documentation:

These guidelines presume a landholding is only eligible to receive Project Water at the Rates for M&I Water unless documentation is provided to the Contractor to show it qualifies for Irrigation Water or an application by a landholder requesting new service for Irrigation Water is approved by the Contractor. The Contractor shall retain such documentation for a period of six years after the initial determination is made that Project Water is being used for irrigation purposes or after a landholder no longer is using Project Water for irrigation purposes, whichever is longer.
