I support closing NGS

1 message

Joseph Karas <joseph.f.karas@asu.edu> Mon, May 15, 2017 at 2:07 PM

To: ngs@usbr.gov

The urgency of climate change means we must permanently retire carbon-emitting coal plants as quickly as possible.

While I understand that there are many many more issues at play in the case of NGS, I believe that the climate argument for closing the plant upstages all others. Far better to invest in development and industry on Tribal land that conserves the land and environment, rather than threatens it.

Sincerely,

--

Joe Karas
