Fwd: Peabody Coal Fat Cat vs Climate Action

1 message

Andrew Lane <aslane1@asu.edu> Tue, May 16, 2017 at 12:40 PM

To: NGS@usbr.gov

Greetings Good and Honorable Folks,

I am a Major Andrew Lane in the Army Reserve just Graduated from Arizona State University with a Master's of Sustainability. I came down in my Army Dress Blues yesterday to the Heard Museum and spoke to everyone on promoting Solar and Wind at NGS. I would love to come visit you all at Dol and explain Climate Reality as well as Chemical Reality to you you all and I can even bring Chipotle for up to 30 people with all the fixings that you all can enjoy while I talk and present. As you can see below in my email to ASU President Michael Crow this morning I explained what happened yesterday outside the Museum with the Fat Cat Fossil Fool from Peabody. That is my assumption as he would not tell me where he worked or his name because he is obviously an ignorant chicken who is scientifically challenged. Isn't it funny how most all humans use high tech devices like automobiles, airplanes, smart phones, televisions, and choose to ignore Science when it is Inconvenient.

Speaking of that Al Gore is about to release a sequel to "Inconvenience" The Alt right wants to dismiss and discount Al Gore, but what Gore predicted in "Inconvenient Truth" about NYC underwater came true now didn't it? Hurricane Sandy did just that!

I have devoted my adult life to trying to teach the humans to take care of the Earth...so the Earth will take care of all the Humans.

I Pledged to the Sierra Club a few months ago that I would appear in my Army Dress Blues to talk about Science Fact concerning Climate Change etc. I made it to the Phoenix Climate March to speak just a few weeks ago as well, photo attached.

Constantly trying to understand how the fossil fuel fan clubs are so capable of lying and denying it hit me yesterday that:

Today on YouTube it is easy to find a teenager or younger prove in a Junior High Lab how how

greenhouse gases like CO2 insulate heat. In fact even 5th Grader Emily Short demonstrates it all quite clearly in her kitchen.

Evil Prevails...When the Good do Nothing!

Are you still contributing to the 110 BILLION TONS of Green House Gases we add to the Earth's Atmosphere each and

every day? This American has slashed his carbon footprint as well as that of his Family of 4. Ask me how doing so saves Money, Cleans the Air and Water all while creating Millions and Millions of much Safer Jobs! Sustainably Yours,

Andrew Lane

Greetings Good and Honorable Sir,

I really hope you and you Staff all had a Great Mother's Day Weekend.

Yesterday afternoon I made it to the Navajo Generating Station Public Hearing hosted by the Department of the Interior at the Heard Museum. I spoke for my allotted 3-4 minutes thanking the Navajo, Hopi, and DoI for the opportunity, the Navajo for their efforts, without which we may not have defeated Japan as easily in WWII with the Code Talkers. The room was filled with Peabody Employees from NGS and Friends of Coal. Of course I spoke primarily on Climate Reality and the need for Climate Action including NGS needing to make and run Solar and Wind Energy using the massive Grid Connection they have there I bragged about Tesla's latest 13 Megawatts and Battery Storage on the Hawaii Island of Kuwai' which now provides all electricity on the island and displaces 1.6 million gallons of diesel annually. I also told how by the end of the year ASU will be 150% powered by the Sun thanks mainly to the efforts of Dr Michael Crow. I mentioned how the Pentagon is going Green in a Big Way as well as USMC General(Ret) now US Secretary of Defense James Mattis recently pronounced his belief in Climate Change and the need for Climate Action at his recent Senate Confirmation Hearing, "If confirmed, I will ensure that the Department of Defense plays its appropriate role within such a response by addressing national security aspects...I agree that the effects of a changing climate – such as increased maritime access to the Arctic, rising sea levels, desertification, among others- impact our security situation." Continuing, "Climate Change is impacting stability in our areas of the world where our troops are operating today. It is appropriate for the combatant commands to incorporate the drivers of instability that impact the security environment in their areas, into their planning." "Climate Change can be a driver of instability and the Department of Defense must pay attention to potential adverse impacts generated by this phenomenon."

I explained Ocean Acidification and Global Warming as well as how primary school kids are proving the Green House

Effect of CO2 on YouTube quite regularly these days.

Afterward in the small SE parking lot who I now believe to be a Fossil Fool Fat Cat Executive from Peabody Coal tried to

explain how my Electric Car runs on Coal and that all my Climate Science is just wrong, I asked him which part and he

said all of it. I responded with ASU Solar and asked him if I was wrong about that? He said yes and I then said so

President Crow is wrong? He declined to answer that but said he was friends with Dr Crow. I said well ask him about Climate Reality and ASU's Solar then and tell him Major Andrew Lane sent you as he will likely remember me. I asked him if General Mattis is wrong and the Fat Cat said yes if he talks about climate Action etc. He told me I was a disgrace to the Uniform and a disgrace to ASU. I responded that he was a disgrace to the human race denying science and actively and majorly contributing to the destruction of one's own home planet.

The Honorable Ben Nuvamsa former Chief of the Hopi was there very close and saw most of this likely the harassment I faced by the undercover Federal Agent who tried to kick me off the property as he also did not like my scientific message either. I am beginning to think America may in for another Civil War as most do not comprehend the horrors of war and the inability for anyone to talk sense to many on the right may build up and explode. Obviously Conald Trump is clearly deranged and psychotically narcissistic, yet there seem to be a decent amount of Trumpkins who still sing his praises and think Conald is the only one capable of telling the truth in DC!

I wanted to ask again for President Crow's Urgent Climate Message but also see what ASU can do to help the Hopi and the Navajo move on from Coal. Obviously the Wind and Sun resources and the need for Tesla to build more factories can easily replace the NGS and employ even more people in far safer and cleaner jobs. From his Card I was so glad to see the Honorable Ben Nuvamsa's KIVA Institute, LLC has a primary goal of Renewable Energy.

Evil Prevails...When the Good do Nothing!

Are you still contributing to the 110 BILLION TONS of Green House Gases we add to the Earth's Atmosphere each and every day? This American has slashed his carbon footprint as well as that of his Family of 4. Ask me how doing so saves Money, Cleans the Air and Water all while creating Millions and Millions of much Safer Jobs!

Sustainably Yours,
Andrew Lane
