To Whom it may concern,

As a resident of nearby Marble Canyon, I am very much looking forward to breathing clean air all the time, not just when the wind blows from the south and west. Please do not waste any more time and money keeping the aging and polluting NGS alive. This is an excellent opportunity to use the existing infrastructure and abundant Arizona sunshine to provide jobs and clean energy for the future! Thank you for your attention,

Matt Herrman  
Marble Canyon, AZ
