FINAL IRRIGABLE AREA SURVEY

This acreage tabulation is based on the ten-year irrigable area survey, which becomes effective at the beginning of the first year of the construction repayment period for the block (January 1, 1978).

- 1/--All units, unless designated otherwise, are Farm Units. A Farm Unit is a unit of land platted prior to October 1, 1962, as then referred to in the Columbia Basin Project Act.
  - 2/--lands in Class 6 are regarded as nonirrigable.
  - 3/--Land designated as High is land which, although arable, is classified as nonirrigable because of higher elevation or location with respect to the turnout and measuring device provided for delivery of water from the Project irrigation system.
  - 4/--Miscellaneous Water Delivery Unit--A unit, irrespective of ownership, containing land which was added to the block after October 1, 1962.
  - 5/--Special Miscellaneous Water Delivery Unit--A unit, irrespective of ownership, containing land which was added to the block after October 1, 1962, in which all, or a portion, of the unit is classified for sprinkler irrigation only or for any method other than the method of irrigation normally used.
- \*\*--Includes area under high land contract.

The Final Irrigable Areas and Land Repayment classes of each Unit in Irrigation Block 48, as established and fixed by my certificate of December 30, 1977, are shown on the following 3 sheets of this Irrigable Area Map.
