FINAL IRRIGABLE AREA SURVEY

This acreage tabulation is based on the ten-year irrigable area survey, which becomes effective at the beginning of the first year of the construction repayment period for the block (January 1, 1971).

1/--All units, unless designated otherwise, are farm units. A farm unit is a unit of land platted prior to October 1, 1962, as them referred to in the Columbia Basin Project Act.

2/--Land in Class 6 is regarded as nonirrigable.

3/--Land designated as high is land which, although arable, is classified as monirrigable because of higher elevation or location with respect to the turnout and measuring device provided for delivery of water from the Project irrigation system.

*--Includes area under high land contract.

#--Includes land having potential seepage problems for which construction of drainage works is not economically feasible, as evidenced by recorded agreement.

> The Final Irrigable Areas and Land Repayment classes of each Unit in Irrigation Block 881, as established and fixed by my certificate of Dec. 23,1970 are shown on the following 7 sheets of this Irrigable Area Map,

Date Dec. 23, 1970
