In considering these revisions, investigations and studies were made of the lands in the block and the project as a whole with the object of determining the area, shape and boundaries of the various farm units in this block, having in mind the requirements of the Columbia Basin Project Act (57 Stat. 691) and of Chapter 275, Laws of Washington, 1943, as amended, one of the policies established by the Secretary of the Interior. Based on these studies and investigations all studied yields were brought forward into the filing of the farm unit plan. I find that these yields were arrived at not only sufficient for the support of the average family but also for additional income to be obtained by the owner, on the basis of the assessor’s estimate of the value of his farm. Accordingly, it is my determination, in conformity with the requirements of the Columbia Basin Project Act as amended, and Chapter 275, Laws of Washington, 1945, as amended, that the proposed farm unit plan for the lands located in the Columbia Basin Project Unit No. 9, State of Washington, is in order and should be approved. Therefore, I approve the farm unit plan for the lands described in the foregoing, and I hereby approve the same.

In witness whereof, I have hereunto set my hand and affixed my official seal the day and year above written.
