

**Chart Legend**

- Initial Condition, 2012
- Estimated Improvements for 2012-18 Actions
- Remaining Improvement Potential, 2012-18
- Improvement Potential after 2018
- Undefined/Pending Definition

**Bars and Pie Charts:** Bars and pie charts were generated from estimates of the habitat condition of key limiting factors associated with habitat actions completed from 2007 to 2011 evaluated by the 2007, 2009, and 2012 expert panels for 2012 to 2018 actions completed by the 2007, 2009, and 2012 expert panels. The pie and bars only represent conditions for the term of the FCRPS BiOp (2007-2018), do not include conditions associated with habitat actions completed without FCRPS BiOp expiration date. White represents improvement potential beyond the 2018 FCRPS BiOp expiration date. Pie size is proportional to relative importance of the limiting factor within the assessment unit. Limiting Factor (LF) Weight is denoted below each pie. Zero values (purple) indicate a limiting factor was identified for FCRPS BiOp purposes, but habitat condition values have not yet been assigned.

**Stacked Bars and Values of Overall Function (%)** represent differences between functioning (green) and non-fully functioning (yellow) key limiting factors aggregated for each assessment unit. Width of each bar is relative to the Intrinsic Potential of each Assessment Unit within the population as defined for Recovery Plans by the Interior Columbia Basin Technical Recovery Team and adjusted by each Expert Panel based on best "current condition" information where applicable. The Intrinsic Potential weighting factor (Assessment Unit Weight) is denoted below each bar.

**Sources:** Baseline data provided by National Oceanic and Atmospheric Administration (NOAA).
