

LAS3B
Upper Crooked Fork / Boulder Creek

LAS3A
Crooked Fork

LAS4 LAS1A
Upper Lochsa River Tributaries
Post Office to Parachute Creeks

LAS2A
Lower Colt Killed Creek

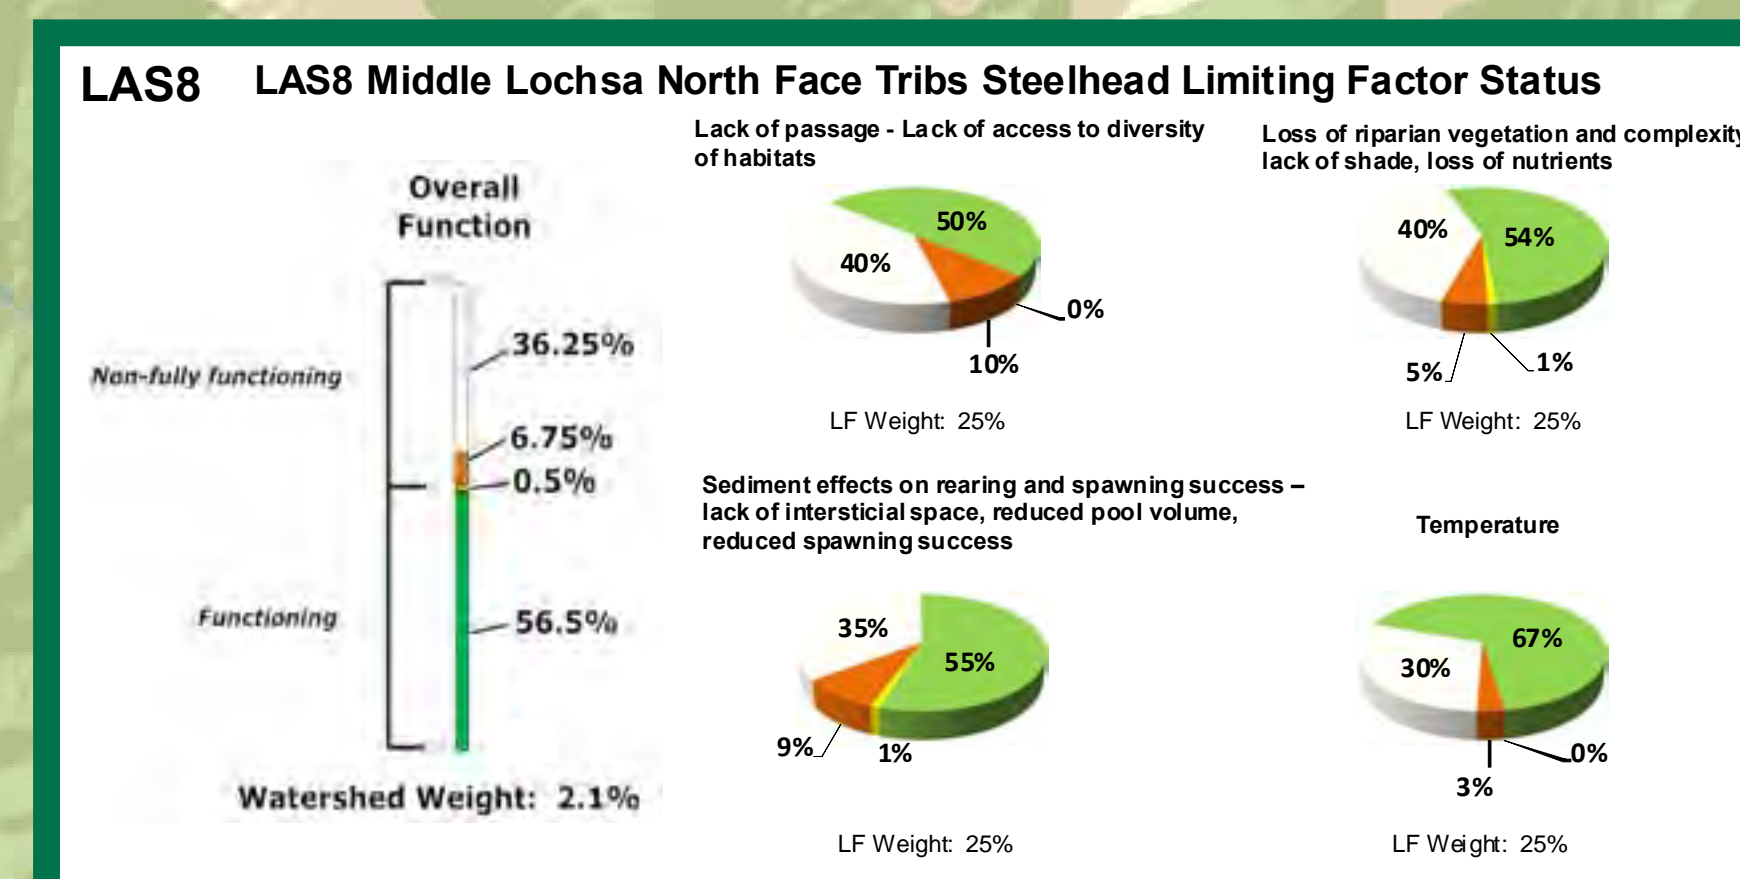

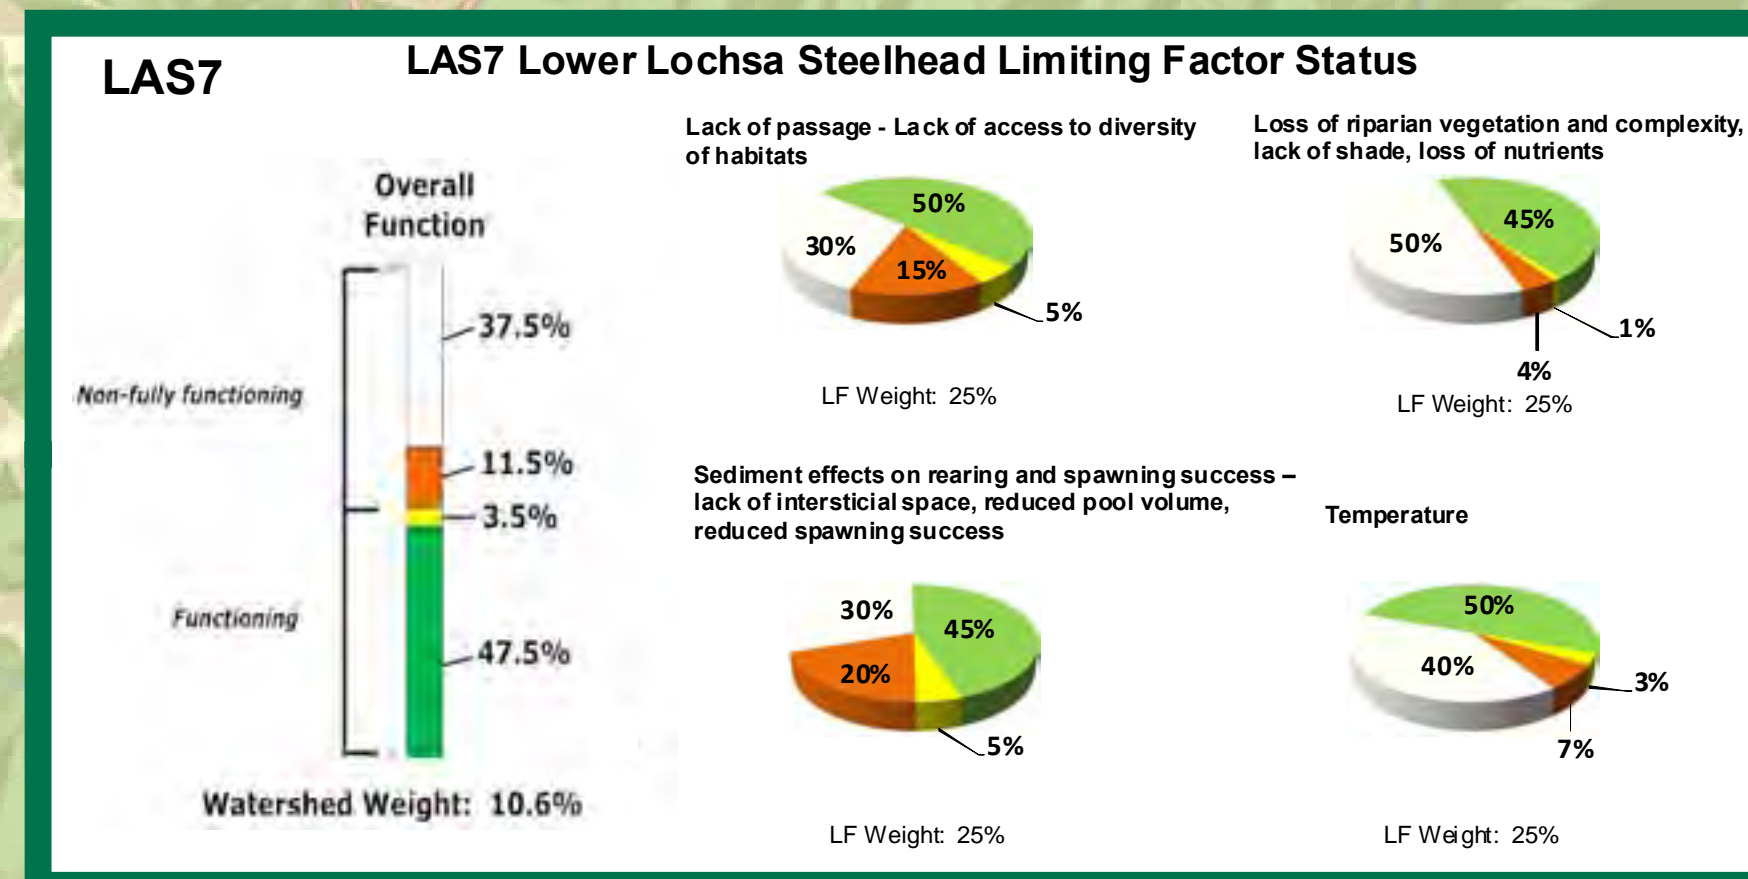

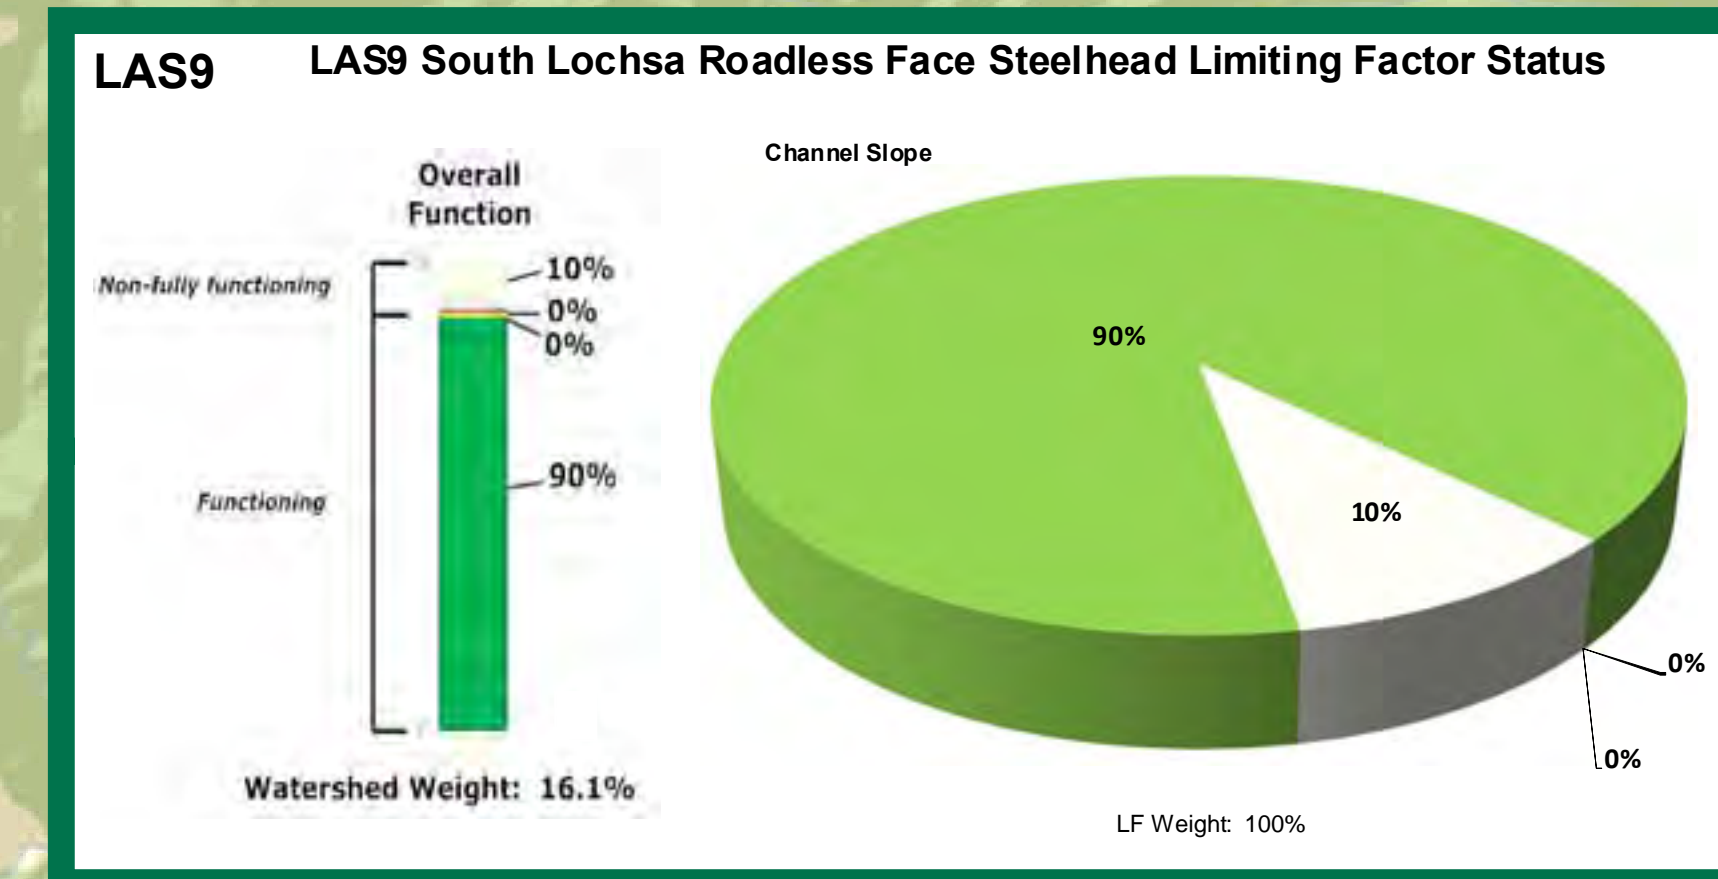

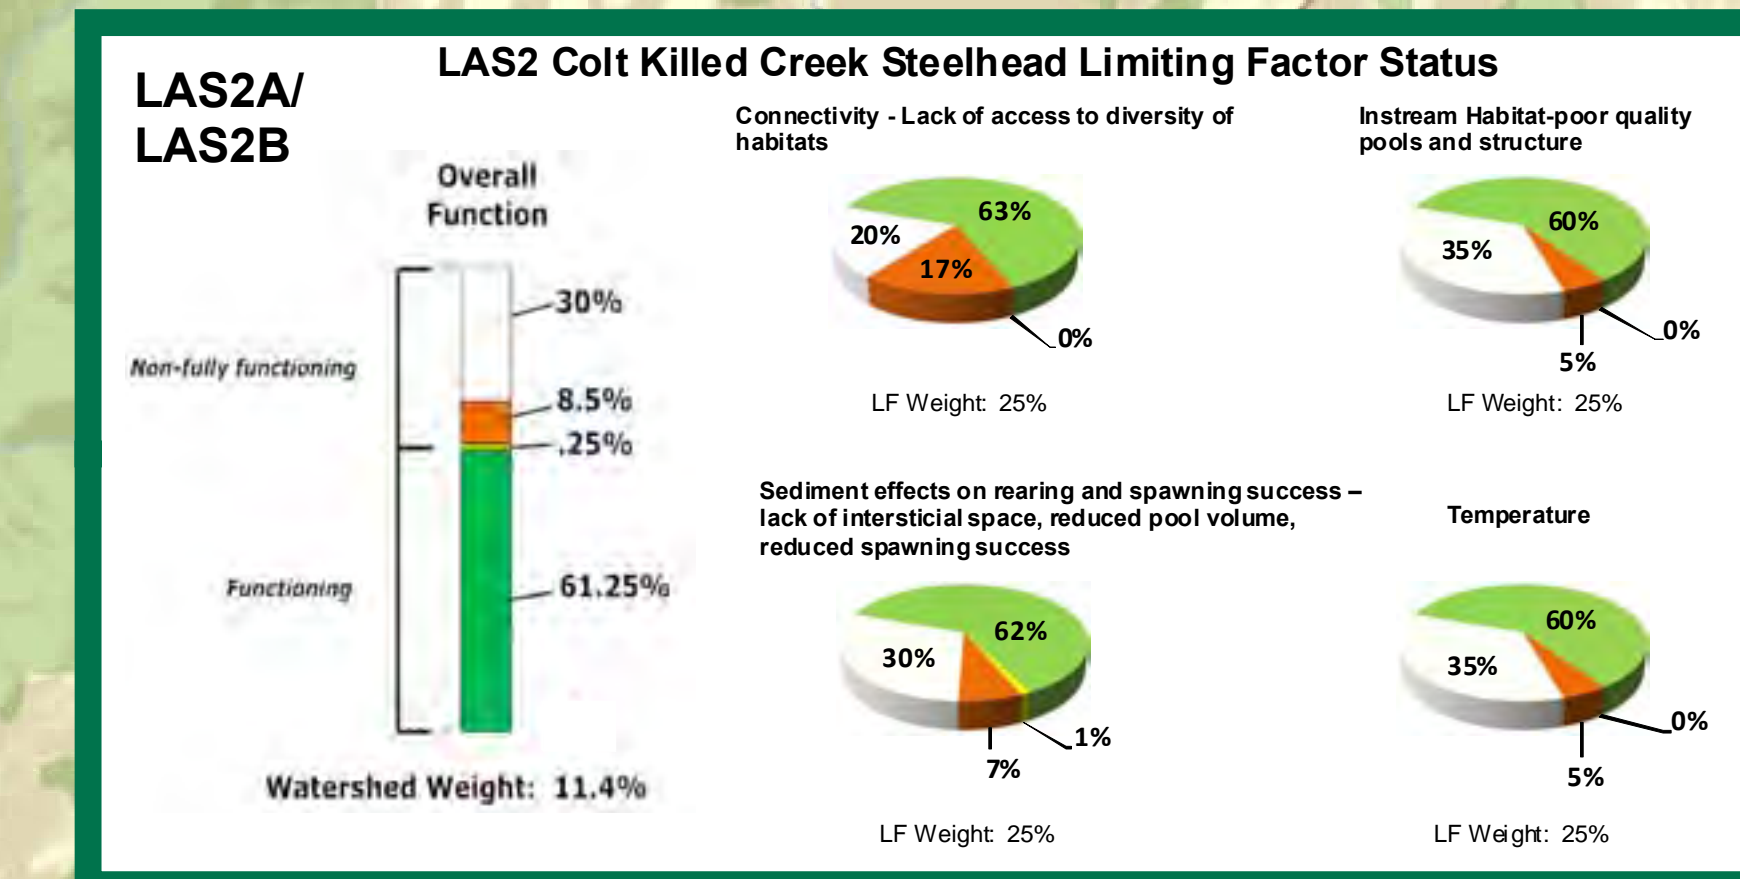

LAS2B
Big Sand Creek

LAS8
Middle Lochsa North Face Tributaries
Weir to Tick Creeks

LAS9
Middle Lochsa South Face Tributaries
Lottie to Robin Creeks

LAS6
Lochsa Mainstem

LAS7
Lower Lochsa River
Deadman Creek to Pete King Creek

Assessment Units for Steelhead

- LAS2 Assessment Unit for 2013 and beyond
- LAS7 Assessment Unit for 2009
- Lochsa Subbasin

Pie Chart Key

- Conditions 2006
- Conditions 2007-2012
- Identified Potential 2013-2018
- Remaining Potential 2013-2018
- Undefined/Pending Definition

Pies and Charts:
Pies and bars were generated from estimates of the habitat condition of key limiting factors associated with habitat actions planned to be completed for the FCRPS BOP through 2012. The pies and bars only represent conditions for the sum of the FCRPS BOP (2007-2018); do not include conditions associated with habitat actions completed by other parties within this time period, and, therefore, may not represent the status of these key limiting factors for other than FCRPS BOP purposes.

Details:
Stacked bars and values of Overall Function (%) represent differences between functioning (green) and non-fully-functioning (red) key limiting factors aggregated for each assessment unit.

Size of each pie is relative to the Intrinsic Potential of each Assessment Unit within the population as defined for Recovery Plans by the Interior Columbia Basin Technical Recovery Team. The intrinsic potential weighting factor (Watershed Weight) is denoted below each pie.

Pie slices and values indicate the relative proportion of each limiting factor that comprise the non-fully-functioning (red) part of the bar. Zero values indicate a limiting factor was identified for FCRPS BOP purposes, but habitat condition values have not yet been assigned.
