

Assessment Units for Chinook

- EFC1, LRC1, LRC2, LMC1, LMC2, LMC3, LMC4, LMC5, LMC6, YFC1, YFC2, YFC3, PRC1, PRC2, UMC1, UMC2

Legend:

- Conditions 2006
- Conditions 2007-2012
- Identified Potential 2013-2018
- Remaining Potential 2013-2018
- Undefined/Pending Definition

Plots and Charts:

Plots and bars were generated from estimates of the habitat condition of key limiting factors associated with habitat actions planned to be completed for the FCRP BICP through 2012. The plots and bars only represent conditions for the term of the FCRP BICP (2007-2012). Do not include conditions associated with habitat actions completed by other parties within this time period, and, therefore, may not represent the status of these key limiting factors for other than FCRP BICP purposes.

Details:

Slices and values of Overall Function (%) represent differences between functioning (green) and non-fully functioning (red) key limiting factors aggregated for each assessment unit.

Size of each pie is relative to the Intrinsic Potential of each Assessment Unit within the population as defined by Recovery Plans by the Interior Columbia Basin Technical Recovery Team. The intrinsic potential weighting factor (Watershed Weight) is denoted below each pie.

Pie slices and values indicate the relative proportion of each limiting factor that comprise the non-fully functioning (red) part of the bar. Zero values indicate a limiting factor was identified for FCRP BICP purposes, but habitat condition values have not yet been assigned.
