As 2021  
comes to an  
end, thank  
you...

**“Stansbury ... helped pen a water agreement in the Pacific Northwest's Yakima basin that many experts consider among the most successful in the country at balancing agricultural water needs with environmental and endangered species protections for fish.”**

*Source: 11/16/21 E&E Daily article regarding Melanie Stansbury's victory in New Mexico congressional special election.*

**“This year's releases have been a great success with increased survival rates ranging from 89% to 95%,” said Joe Blodgett, Yakima/Klickitat Fisheries Program Project Coordinator. “We're really seeing that an adaptive management approach will result in maintaining bull trout viability while the Yakima Basin Integrated Plan works to restore degraded spawning and rearing habitat.”**

*Source: Bureau of Reclamation News Release, 5/28/21 regarding bull trout reintroduction in upper basin.*

**“The Yakima Basin Integrated Plan is the model for the West,” Touton told Cantwell. “It balances the needs of agriculture along with the restoration of the largest salmon run in the continental United States and values the cultural significance of the Yakama Nation, and so moving forward, we need to be able to support this type of activities.”**

*Source: Spokesman Review, 9/21/21 regarding Camille Touton's nomination for Bureau of Reclamation Commissioner.*
