

# Anderson Ranch Reservoir Geotechnical Field Explorations

## Public Notice

The Bureau of Reclamation is providing public notice of field work that is planned to occur between May 9, 2023–Aug. 3, 2023. Areas of several United States Forest Service campgrounds, boat ramps, and the Idaho Transportation Department’s Pine Airstrip will be impacted by the work. The public is encouraged to stay out of areas of active construction for safety.

Work is planned to occur in following order, but subject to change

- Elk Creek Boat Ramp and Evans Creek Campground, May 9–18.
- Fall Creek Recreation Area, May 23–June 1.–
- Evans Creek Campground, Pine Airport Campground, and Pine Airstrip, June 6–15.
- Pine Airstrip, June 20–29.
- Curlew Creek Boat Ramp and Campground, July 25–Aug. 3.

Geotechnical crews will perform exploratory drilling and operate equipment in the area. The temporary closure is necessary for crews to complete work for the Anderson Ranch Dam Raise Reservoir Rim analysis. Data collected will inform the design for the potential Anderson Ranch Dam Raise Project.

For more information, please contact Project Manager Holly Kunz at 208-519-9072.
