

# Anderson Ranch Reservoir Geotechnical Field Explorations

## Public Notice

The Bureau of Reclamation is providing public notice of field work that is planned to occur during the month of October 2023. Areas of several United States Forest Service campgrounds and boat ramps will be impacted by the work – the public is encouraged to pay attention to work areas and stay out for safety.

Work is planned to occur at the following sites:

- Evans Creek Campground
- Fall Creek Recreation Area
- Pine Airport Campground
- Curlew Creek Campground

Geotechnical crews will be performing exploratory drilling and operating equipment in the area for the Anderson Ranch Dam Raise Reservoir Rim analysis. Data collected will inform the design for the potential Anderson Ranch Dam Raise Project.

For more information, please contact Project Manager Holly Kunz at 208-519-9072 or visit <https://www.usbr.gov/pn/studies/boisefeasibility/andersonraise/index.html>.
