Public Scoping Open Houses for the Boise River Basin Feasibility Study, Elmore County, Idaho

The Bureau of Reclamation, in partnership with the Idaho Water Resource Board (IWRB), proposes to raise Anderson Ranch Dam 6 feet, raising the top of the reservoir pool from the present elevation of 4,196 feet to 4,202 feet, allowing the ability to capture and store approximately 29,000 additional acre-feet of water. This new space would allow Reclamation to capture additional water when available during wet years for supplemental supply and to hold over for use during dry years. Potential spaceholders include existing Reclamation contractors and IWRB, which could in turn contract water to existing Water District 63 water users and/or may offer water through the Idaho water supply bank’s Water District 63 rental pool.

Proposed dam structure modifications include:
- Raising the earthen embankment dam crest by 6 feet.
