Directives and Standards

Detailed General Ledger (GL) Chart of Accounts

1. **Chart of Accounts.** The chart below includes the GL accounts the Bureau of Reclamation currently uses as of November 7, 2019. For a current version of Reclamation’s GL accounts, contact the Business Analysis Division. To obtain a complete list of the Department of the Interior GL accounts, contact the Reporting and Accounting Team in the Business Analysis Division. For a complete list of all Department of the Treasury U.S. Standard GL accounts, definitions, and additional information, refer to the [Treasury Financial Manual](#).

2. **Chart Headings.**
 - A. **Trading Partner.** An agency, department, or federal entity that is party to intragovernmental transactions with another agency, department, or federal agency.

 - B. **Auto Post.** The system is configured to post to the auto post GL based on the program being run. Do not manually post to these GLs.

 - C. **Reconciliation GL Accounts Ready for Input.** Reconciliation GL accounts retain the customer or vendor name and numbers for easy reporting. The Financial and Business Management System (FBMS) uses customer, vendor, and asset reconciliation GL accounts. A customer record or vendor record ties to only one reconciliation GL at a time. Reconciliation accounts also establish the integration of the accounts payable, accounts receivable and asset sub-ledger accounts into the general journal.

 - D. **Posting Block.** Posting block indicates those GLs blocked from posting.

 - E. **Deletion Flag.** Notates GLs marked for deletion.

ⁱ -Roll up expense Commitment Items (CI) (ending with 000) with NA do not receive posts except when FBMS posts work order settlements to them as indicated by Auto Post.
 -Although the CI displays NA for budgetary (4XXX.XXXXX) GLs, the 47*, 48*, and 49* GLs related to commitment and obligations will have a “real” BOC established by the proprietary accounts when automatically posted. All other budgetary GLs with NA in the CI will have CIs that come from actual budget document entries.
 -Reclamation maps CIs beginning with “9” to BOC 253 for budget object code requirement reporting and Digital Accountability and Transparency Act of 2014 reporting.
 -GL accounts 1350.B0000, 6330.0000 and 6330.00MAN have blank CIs because the user enters the correct CI on the transaction.
