

Reclamation Manual

Directives and Standards

Financial and Business Management System (FBMS) Project Types

Each work breakdown structure (WBS) element for the Bureau of Reclamation will start with “R”, followed by a letter indicating the project type of the WBS, and then a period in the third position. The project type governs general ledger postings and any settlement types required for transactions. FBMS allows additional project types; however, Reclamation only uses the project types listed in the below table. Note: The FBMS project types are different from the Reclamation project types (multipurpose, power, irrigation, etc.)

FBMS Project Type	Purpose
A	Assets Under Construction
B	BORWORKS
H	Heritage
K	Project Planning
L	Loans
N	Nonfederal Physical Property
P	Fixed Priced Reimbursable
Q	Fee for Service (settle down for Reclamation)
R	Reimbursable
S	Stewardship
X	Bureau Specific
Y	Research and Development
