

Manmeet (Meeta) Pannu, Ph.D.,

Presentation Title: Separation and Destruction of Per- and Polyfluoroalkyl Substances (PFAS) from Potable Reuse Reverse Osmosis Concentrate (ROC)

Manmeet (Meeta) Pannu, Ph.D., is a Senior Scientist in the Research and Development Department at the Orange County Water District (OCWD). A soil scientist by training, she has more than 20 years of experience conducting field- and laboratory-scale research involving soil, water, remediation, and the fate and transport of emerging contaminants. Dr. Pannu leads research on PFAS occurrence and treatment, including evaluations of GAC, IX and novel adsorbents to support practical treatment solutions for protecting drinking-water supplies at the district.
