

Eric Dole, P.E., PSAP

Garver

Eric is the Water and Energy Practice Leader where he specializes in delivering sustainable infrastructure solutions through optimized hydraulic systems and optimized treatment processes. His process mechanical expertise can be seen in his patented designs for two zero liquid discharge brine management systems, of which one was awarded the 2011 AZ Water Reuse Project of the Year Award and the other was selected for RO concentrate treatment in the Bureau of Reclamation Desalination Pitch to Pilot Research Project that he will be presenting in this workshop.
