

Andrew Tiffenbach

Andrew Tiffenbach is a civil engineer with the Bureau of Reclamation's Research and Development Office based in Denver, CO. Andrew currently serves as Reclamation's Water Treatment Research Coordinator, administering external grant funding provided through the Desalination and Water Purification Research Program and overseeing internal water treatment research. Prior to joining the Research and Development Office in 2022, he worked in Reclamation's Technical Service Center for 19 years on a variety of water treatment research and design projects.
