

W. Shane Walker, Ph.D., P.E. (TX)

Presentation title: Beneficial Reuse of Polished Desalinated Produced Water in Texas

Shane is a professor in the Department of Civil, Environmental, and Construction Engineering at Texas Tech University, Shane serves as the Director of the Water and the Environment Research (WATER) Center and Director of the Texas Produced Water Consortium (TxPWC). Shane teaches courses in the fields of water and wastewater treatment (especially physical/chemical treatment processes), and his research focuses on advanced drinking water treatment, especially high recovery inland desalination, potable reuse, and beneficial use of desalinated produced water.
