

Project Title: Physiological Tolerances of Fishes of the Sacramento-San Joaquin Delta, California

WOID: X1158, ID: 1158

Following a request by the Bureau of Reclamation's Research and Development (R&D) Office to consider returning funds for projects that had not been initiated or that were likely not to be completed within the fiscal year, I considered my workload and possible scheduling conflicts and, ultimately, contacted Miguel Rocha (R&D, Denver, CO) and requested the funds for this project be returned to the R&D Office. A considerable amount of work (literature review, draft writing and summarization, figure development), not supported by R&D funds, has been completed for this project.
