July 2015

Mission Statements

The U.S. Department of the Interior protects America's natural resources and heritage, honors our cultures and tribal communities, and supplies the energy to power our future.

The mission of the Bureau of Reclamation is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public.

REPORT DOCUMENTATION PAGE						*Form Approved OMB No. 0704-0188*
T1. REPORT DATE July 2015		**T2. REPORT TYPE** Research				**T3. DATES COVERED**
T4. TITLE AND SUBTITLE Use of a Continuous Simulation, Process-based Model to Predict Sediment Inflow in Unsurveyed Reservoirs.						**5a. CONTRACT NUMBER** 15XR0680A1- RY1541DS201518653
						5b. GRANT NUMBER
						5c. PROGRAM ELEMENT NUMBER 1541 (S&T)
6. AUTHOR(S) Joel G. Murray						**5d. PROJECT NUMBER** 8653
						5e. TASK NUMBER
						5f. WORK UNIT NUMBER 86-68260
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Bureau of Reclamation, Technical Service Center, Denver, CO 80225						**8. PERFORMING ORGANIZATION REPORT NUMBER**
9. SPONSORING / MONITORING AGENCY NAME(S) AND ADDRESS(ES) Research and Development Office U.S. Department of the Interior, Bureau of Reclamation, PO Box 25007, Denver CO 80225-0007						**10. SPONSOR/MONITOR'S ACRONYM(S)** R&D: Research and Development Office BOR/USBR: Bureau of Reclamation DOI: Department of the Interior
						11. SPONSOR/MONITOR'S REPORT NUMBER(S)
12. DISTRIBUTION / AVAILABILITY STATEMENT Final report can be downloaded from Reclamation's website: https://www.usbr.gov/research/						
13. SUPPLEMENTARY NOTES						
14. ABSTRACT *(Maximum 200 words)* Multiple continuous simulation, process-based models were evaluated to determine their efficacy for predicting annual sediment inflow in unsurveyed reservoirs. Preliminary results from SWAT2005 indicate that the model is capable of reasonably estimating sedimentation volumes; however, further model calibration is necessary.

PEER REVIEW DOCUMENTATION

Project and Document Information

Project Name: Use of a Continuous Simulation, Process-based Model to Predict Sediment Inflow in Unsurveyed Reservoirs

WOID: Z8653

Document: Final Report

Document Author: Joel G. Murray

Document Date: 07/07/2015

Peer Reviewer: Kurt Wille

Review Certification

Peer Reviewer: I have reviewed the assigned items/sections(s) noted for the above document and believe them to be in accordance with the project requirements, standards of the profession and Reclamation policy.
