Good evening Lesa and Team - We had a good discussion today at RLT about the SOH Vision statement you prepared. The RLT approved the vision with only minor modification - see below.

Reclamation embraces safety excellence by empowering employees and integrating safety into our mission, achieving a culture which results in a safe environment for our employees, contractors, visitors and the public.

The last thing that we have to do is confirm with Denver that the Partnership Committee has seen the statement and concurs. Once this is complete, I believe Bruce will determine that the team has completed its task.

As far as the changes you recommended to the Reclamation Vision Statement, the RLT has determined that the statement was developed with a broad range of input. When this statement is updated, safety will certainly be one of the lenses that will be utilized in the process. However, the statement will not be changed at this time.

Should you wish to discuss this feedback with me, please don't hesitate to call. Thank you for the time and energy you put into developing the excellent SOF vision statement.

Thanks
Lorri
