## **Bighorn Lake**

### **Area and Capacity Tables**

**U.S. Department of the Interior  
Bureau of Reclamation  
Technical Service Center  
Denver, Colorado**

**July 2007**

The tables for Bighorn Lake were generated by means of the area-capacity program ACAP, using the least squares method of curve fitting developed by the Bureau of Reclamation Technical Service Center. This program computes area at 1.0-, 0.1-, and 0.01-foot increments by linear interpolation between basic data contours. The respective capacities and capacity equations are then obtained by integration of the area equations. The initial capacity equation is tested over successive intervals to check whether it fits within an allowable error term. At the next interval beyond, a new capacity equation (integrated from the basic area equation over that interval) begins testing the fit until it too exceeds the error term. The capacity curve thus becomes a series of curves, each fitting a certain region of data. The final area equations are obtained by differentiation of the capacity equations. Capacity equations are of the form  $y = a_1 + a_2x + a_3x^2$  where y is capacity and x is the elevation above an elevation base. The capacity equation coefficients for the reservoir are shown below ( $\epsilon = 0.000001$ ).

### **Bighorn Lake 2007 Survey**

The Bighorn Lake survey in July 2007, near reservoir elevation 3,637, used the contour method to obtain the basic data for these tables. Close interval profiles of the underwater portion of the reservoir were collected by standard surveying techniques using a global positioning system and echo sounders. The above-water portion was determined from USGS quad contours and USDA aerial images of the reservoir water surface. The computed surface areas from elevation 3,645 and above were obtained from a 1982 resurvey. The 2007 survey and the reduction of the data were completed by personnel from Reclamation's Sedimentation and River Hydraulics Group of the Technical Service Center in Denver, Colorado. All data for these tables are tied to the project vertical datum that is near the National Geodetic Vertical Datum of 1929 and 2.6 feet less than the North American Vertical Datum of 1988.

BIGHORN LAKE  
2007 AREA-CAPACITY TABLES

(ACAP92) COMPUTED  
4/29/2010  
13:48:33

THE CAPACITY TABLE IS IN ACRE FEET

THE ELEVATION INCREMENT IS ONE TENTH FOOT

| ELEV. FEET | 0        | .1       | .2       | .3       | .4       | .5       | .6       | .7       | .8       | .9       |
