U.S. Department of the Interior
Mission Statements

Department of the Interior
The Department of the Interior conserves and manages the Nation’s natural resources and cultural heritage for the benefit and enjoyment of the American people, provides scientific and other information about natural resources and natural hazards to address societal challenges and create opportunities for the American people, and honors the Nation’s trust responsibilities or special commitments to American Indians, Alaska Natives, and affiliated island communities to help them prosper.

Bureau of Reclamation
The mission of the Bureau of Reclamation is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public.

I. Introduction
In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), the U.S. Bureau of Reclamation (Reclamation), Provo Area Office conducted an Environmental Assessment (EA) (see attached) in 2015 to determine the potential effects to the human and natural environment of executing a five-year contract to allow the Metropolitan Water District of Salt Lake and Sandy (MWDSLS or District) the option of storing up to 4,000 acre-feet (AF) of Ontario Drain Tunnel (ODT) water in Deer Creek Reservoir, on a space-available basis. Deer Creek Reservoir is a carriage and storage facility that is part of the Provo River Project (PRP) and is owned by Reclamation and operated by the Provo River Water Users Association (PRWUA or Association). ODT is a carriage feature that is owned and maintained by the Jordanelle Special Service District (JSSD).

A final EA and Finding of No Significant Impact (FONSI) were published in May 2015. Reclamation then entered into contract No. 15-WC-40-568 in 2015 that authorized the carriage of the non-project water in Deer Creek Reservoir for a five-year term. Said contract expired in 2020 and two new contract actions are now proposed; a short-term contract to allow the MWDSLS to store up to 500 AF in Deer Creek for one year, and a long-term contract which would continue to allow the District storage of up to 4,000 AF of ODT water annually in Deer Creek Reservoir for up to forty (40) years.

The proposed long-term contract action was submitted to be published in the Federal Register in January 2021. As the requested action is for 40 years, a short-term contract does not require separate publication, because it falls within the same general action. Resolution No. 1914 to enter into a carriage contract with the United States was approved by the MWDSLS Board of Directors on January 25, 2021. On January 15, 2021, Reclamation received a letter from the Provo River Water Users Association approving the requested action for the District’s carriage contract.

The purpose of this FONSI is to determine whether the new contracts meet the requirements of NEPA and are covered within the scope of the 2015 EA.

II. Alternatives
The EA analyzed two alternatives: the No Action and the Proposed Action.

No Action
Under the No Action Alternative, ODT water would be discharged into Jordanelle Reservoir and be delivered down the Provo River into Deer Creek and into the Salt Lake Aqueduct on a run-of-the-river basis, as has been occurring for many years prior to the original Proposed Action.

Proposed Action
The EA analyzed the Proposed Action which consisted of Reclamation issuing a five-year contract authorizing the storage of up to 4,000 acre-feet of ODT water in Deer Creek Reservoir, on a space-available basis, which it would deliver later in the year when runoff from the canyons east of Salt Lake has declined. The new contracts (i.e., the modified Proposed Action) include a short-term contract for the term of November 1, 2020 through October 31, 2021, to allow for the storage of up to 500 AF, and a long-term contract, beginning on November 1, 2021, for storing
up to 4,000 AF of ODT water in Deer Creek Reservoir. The full list of terms and conditions of the contract can be found in the attached draft contract.

The EA discussed the option of negotiating a long-term contract once the five-year contract had expired. Importantly, the modified Proposed Action does not include an increase in the total amount of water stored (up to 4,000 AF per year); instead, it allows what has been in practice for the previous five years to continue. Finally, the modified Proposed Action would not require modifying the existing outlet works, facilities, or system operations. There is no ground disturbance component to the Proposed Action or the modified Proposed Action, and no change in the use of project water would occur.

III. Environmental Commitments
Environmental commitments integral to the modified Proposed Action are as follows:

1. Protection of Water and Air Quality – The Association, without expense to the United States, will care for, operate and maintain transferred works in a manner that preserves the quality of the water at the highest feasible level as determined by the United States. The Association will care for, operate and maintain reserved works in a manner that preserves the quality of the water at the highest feasible level as determined by the United States. The United States and the Association do not warrant the quality of the water delivered to the District and are under no obligation to furnish or construct water treatment facilities to maintain or improve the quality of water delivered to the District.

The District will comply with all applicable water and air pollution laws and regulations of the United States and the State of Utah; and will obtain all required permits or licenses from the appropriate Federal, State, or local authorities necessary for the delivery of water by the District; and will be responsible for compliance with all Federal, State, and local water quality standards applicable to surface and subsurface drainage and/or discharges generated through the use of Federal or Association facilities or project water provided by the Association within its Project Water Service Area.

This article will not affect or alter any legal obligations of the Secretary to provide drainage or other discharge services.

2. Contamination or Pollution of Federal Property – The Association and District shall not allow contamination or pollution of Federal project lands, project waters, or project works of the United States or administered by the United States and for which the Association has the responsibility for care, operation, and maintenance by its employees or agents. The Association and the District shall also take reasonable precautions to prevent such contamination or pollution by third parties. The Association and the District shall comply with all applicable Federal, State, and local laws and regulations and Reclamation policies and instructions existing, or
hereafter enacted or promulgated, concerning any hazardous material that will be
used, produced, transported, stored, released, or disposed of on or in Federal project
lands, project waters, or project works.

“Hazardous material” means (1) any substance falling within the definition of
“hazardous substance,” “pollutant or contaminant,” or “hazardous waste” under the
Comprehensive Environmental Response, Compensation and Liability Act
(42 U.S.C. § 9601(14), (29), and (33)); (2) oil, as defined by the Clean Water Act
(33 U.S.C. § 1321(a)) and the Oil Pollution Act (33 U.S.C. § 2701(23)); (3) thermal
pollution, refuse, garbage, sewage effluent, industrial waste, mine or mill tailings,
mineral salts, pesticides, and other solid waste, and (4) any other substance regulated
as hazardous or toxic under Federal, State, local, or Tribal law.

Upon discovery of any event which may or does result in contamination or pollution
of Federal project lands, project water, or project works, the Association shall
immediately undertake all measures necessary to protect public health and the
environment, including measures necessary to contain or abate any such
contamination or pollution, and shall report such discovery with full details of the
actions taken to the United States. Reporting shall be within a reasonable time period
but shall not exceed 24 hours from the time of discovery if it is an emergency and the
first working day following discovery in the event of a non-emergency.

If violation of the provisions of this Article occurs and the Association does not take
immediate corrective action, as determined by the United States, the Association may
be subject to remedies imposed by the United States, which may include termination
of this contract.

The Association shall be liable for any response action or corrective measure
necessary to protect public health and the environment or to restore Federal project
lands, project waters, or project works that are adversely affected as a result of such
violation, and for all costs, penalties or other sanctions that are imposed for violation
of any Federal, State, local, or Tribal laws and regulations concerning hazardous
material. At the discretion of the United States, the United States may also terminate
this Contract as a result of such violation.

The Association shall defend, indemnify, protect and save the United States harmless
from and against any costs, expenses, claims, damages, demands, or other liability
arising from or relating to the Associations violation of this article.

Reclamation agrees to provide information necessary for the Association, using
reasonable diligence, to comply with the provisions of this Article.

3. Clean Air and Water – The Association and the District agree as follows:

    a. To comply with all the requirements of section 114 of the Clean Air Act, as
       amended (42 U.S.C. § 7414), and section 308 of the Clean Water Act (33 U.S.C.
       § 1318), relating to inspection, monitoring, entry, reports, and information, as
well as other requirements specified in those sections, and all applicable regulations and guidelines issued thereunder.

b. That no portion of the work required by this contract will be performed in a facility listed on the Environmental Protection Agency List of Violating Facilities on the date when this contract was executed unless and until the Environmental Protection Agency eliminates the name of such facility or facilities from such listing.

c. To use its best efforts to comply with clean air standards and clean water standards at the facility where the contract work is being performed.

d. To insert the substance of the provisions of this article into any nonexempt subcontract, including this subparagraph (a)(4).

The following definitions apply for purposes of this article:

c. The term “clean air standards” refers to all enforceable rules, regulations, guidelines, standards, limitations, orders, controls, prohibitions, and other requirements which are contained in, issued under, or otherwise adopted pursuant to the Clean Air Act or Executive Order 11738, an applicable implementation plan as described in section 110 of the Clean Air Act (42 U.S.C. § 7410), an approved implementation procedure or plan under subsection 111(c) or subsection 111(d) of the Clean Air Act (42 U.S.C. § 7411(c) or (d)), or an approved implementation procedure under subsection 112(d) of the Clean Air Act (42 U.S.C. § 7412(d)).

d. The term “clean water standards” refers to all enforceable limitations, controls, conditions, prohibitions, standards, and other requirements which are promulgated pursuant to the Clean Water Act or contained in a permit issued to a discharger by the Environmental Protection Agency or by a state under an approved program, as authorized by section 402 of the Clean Water Act (33 U.S.C. § 1342), or by local government to ensure compliance with pretreatment regulations as required by section 307 of the Clean Water Act (33 U.S.C. § 1317).

e. The term “comply” refers to compliance with clean air or water standards. It also refers to compliance with a schedule or plan ordered or approved by a court of competent jurisdiction, the Environmental Protection Agency, or an air or water pollution control agency in accordance with the requirements of the Clean Air Act or Clean Water Act and regulations issued pursuant thereto.
f. The term “facility” means any building, plant, installation, structure, mine, vessel or other floating craft, location, or site of operations owned, leased, or supervised by a District or subcontractor to be utilized in the performance of a contract or subcontract. Where a location or site of operations contains or includes more than one building, plant, installation, or structure, the entire location or site shall be deemed to be a facility except where the Director, Office of Federal Activities, Environmental Protection Agency, determines that independent facilities are collocated in one geographical area.

4. Water Conservation – Prior to the deliver of water provided from or conveyed through federally constructed or federally financed facilities pursuant to this contract, the District shall develop a water conservation plan, as required by subsection 210(b) of the Reclamation Reform Act of 1982 and 43 C.F.R. 427.1 (Water Conservation Rules and Regulations).

IV. Decision
Based on the foregoing information, Reclamation determined that the modified Proposed Action fits within the scope analyzed in the 2015 final EA and therefore does not necessitate supplemental NEPA. It is Reclamation’s decision, therefore, to issue this revised FONSI pursuant to NEPA and implementing regulations at 40 CFR 1500-1508, and authorize the modified Proposed Action to be implemented as described in the draft contracts. This revised FONSI supersedes the FONSI issued in 2015.
Attachment

Draft Temporary Contract
TEMPORARY CONTRACT AMONG
THE UNITED STATES OF AMERICA,
THE METROPOLITAN WATER DISTRICT OF SALT LAKE & SANDY
AND
THE PROVO RIVER WATER USERS ASSOCIATION
FOR STORAGE OF NON-PROJECT WATER IN DEER CREEK RESERVOIR
PROVO RIVER PROJECT, UTAH

THIS TEMPORARY CONTRACT is among the METROPOLITAN WATER DISTRICT OF SALT LAKE & SANDY (MWDSLS or District), a metropolitan water district organized and existing under the laws of the State of Utah, the PROVO RIVER WATER USERS ASSOCIATION (PRWUA or Association), a Utah non-profit corporation, and the UNITED STATES OF AMERICA, represented by the Department of the Interior, Bureau of Reclamation (Reclamation or United States), acting pursuant to the Act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof or supplementary thereto, particularly the Act of February 21, 1911 (36 Stat. 925, 43 U.S.C. §523), as supplemented by Section 2 of the Act of December 19, 2002 (P.L. 107-366), as well as the rules and regulations promulgated by the Secretary of the Interior (Secretary) under Reclamation law.

RECITALS

WHEREAS, Reclamation constructed the Provo River Project (Project), including Deer Creek Dam and Reservoir (Deer Creek), for the purpose of supplying water for irrigation and other uses (Project Water) to the Association for use by its shareholders. MWDSLS is a majority PRWUA shareholder; and

WHEREAS, the Association, by Contract No. ILR-874 (Repayment Contract), dated June 27, 1936, as amended and supplemented, agreed to repay the reimbursable Project costs to Reclamation and to operate and maintain the facilities constructed for the Project (Project Works); and

WHEREAS, MWDSLS provides wholesale supplemental treated water to its member cities, primarily Salt Lake City and Sandy City, as well as others. MWDSLS has access to water from the Ontario Drain Tunnel (ODT), under water rights owned by MWDSLS and Salt Lake City (ODT Water). ODT Water has flowed into the Provo River system since the 1880s. MWDSLS also has access to direct flows from Little Cottonwood Creek and Bell Canyon Creek under water rights of MWDSLS, Salt Lake City, and Sandy City; and

WHEREAS, in part because of differences in the hardness of the water from the different sources, the chemicals used to treat straight Little Cottonwood Creek and Bell Canyon Creek water are more expensive, and the process is more troublesome, than treating a mixture of canyon creek water and Provo River system water. Therefore, if the ODT Water that is available to MWDSLS is not stored in Deer Creek, ODT Water will be diverted at the Salt Lake Aqueduct and used in preference to Little Cottonwood Creek and Bell Canyon Creek water. For this reason, the storage of ODT Water available to MWDSLS will have no significant impact to Provo River system flows; and

WHEREAS, Reclamation has received a request from MWDSLS, which request is supported by the Association, that during periods when space is available in Deer Creek that is not otherwise required for the storage of Project Water or Central Utah Project Bonneville Unit water pursuant to the terms of
the Deer Creek/Jordanelle Operating Agreement (Contract No. 94-07-40-R1690), and the Provo Reservoir Canal Enclosure Project Master Agreement of February 1, 2010, that MWDSLS be allowed to use excess capacity for storage of non-project water on a space available basis. Reclamation is authorized, pursuant to the authority of the Act of February 21, 1911 as supplemented by the Act of December 19, 2002, to contract for the storage of non-Project water in Deer Creek for municipal and industrial (M&I) uses; and

WHEREAS, MWDSLS has requested a long-term contract to store ODT Water in Deer Creek and desires a temporary contract to meet its current needs prior to the execution of the long-term contract. The UCB is working diligently to secure a delegation of authority from the commissioner of Reclamation prior to this contract’s termination date of October 31, 2021.

AGREEMENT

NOW, THEREFORE, it is mutually agreed between the parties hereto as follows:

1. Storage of ODT Water in Deer Creek. The Parties agree that if and when capacity is available in Deer Creek that is not otherwise required for the storage of Project Water or Central Utah Project Bonneville Unit water pursuant to the terms of the Deer Creek/Jordanelle Operating Agreement (Contract No. 94-07-40-R1690), MWDSLS will be allowed to use the excess capacity for storage of its ODT Water subject to the terms of this Contract and upon the following conditions:

   (a) ODT Water to be stored under this Contract will not exceed 500 AF during this Contract’s term, as measured at the ODT and conveyed to Deer Creek Reservoir by the Provo River Commissioner. Conveyance and storage of ODT Water will be subject to the standard conveyance losses for the Provo River System.

   (b) MWDSLS will, at its sole cost and expense, secure any and all state or federal permits which may be required for the storage of ODT Water at Deer Creek, including the filing and necessary approvals of any applications relative thereto.

   (c) ODT Water stored in Deer Creek Reservoir will be charged appropriate evaporation and seepage losses proportionate to the amount of water stored and the period of storage, as determined by the Association or the Provo River Commissioner.

   (d) Should MWDSLS fail to utilize any portion of the ODT Water stored in Deer Creek on or before October 31, remaining ODT Water will convert to Project Water.

   (e) Upon execution of this Contract, the District will submit to the Association and the United States a written notice of its intent to store ODT Water in Deer Creek Reservoir pursuant to this Contract and the maximum storage space it anticipates using. During each month, the District will report the amounts of ODT Water stored in Deer Creek and delivered by the Association to the District pursuant to this Contract.

   (f) The District will pay directly to the Association a proportionate share of operation, maintenance, and replacement costs associated with the carriage and storage of ODT Water in Deer Creek, as determined by the PRWUA Board of Directors.
(g) The Association is authorized to suspend the storage of ODT Water in Deer Creek under this Contract if the District, its agents or employees, violate any provisions of this Contract.

(h) The rights granted herein will be subject to the provisions of applicable federal laws, rules, and regulations.

(i) The right to store ODT water in Deer Creek is junior to the right to store water under the Deer Creek Reservoir / Jordanelle Reservoir Operating Agreement. When Deer Creek spills (physically, on paper, or modifies its water right diversions to avoid spilling), stored ODT Water will either physically spill or be provided to the Provo River Project and Bonneville Unit of the Central Utah Project according to these projects’ respective water rights and the Deer Creek Reservoir / Jordanelle Reservoir Operating Agreement.

(j) If at any time ODT water does not meet federal or state water quality standards, the District will not be able to store ODT water in Reclamation facilities under the terms and conditions of this Contract.

2. Payment for Storage. MWDSLS will pay a storage charge to Reclamation in the amount of $3.50 per acre-foot for the ODT Water stored under this Contract. Such payments will be credited to the Reclamation Fund as provided in Section 3 of the Act of February 21, 1911 (36 Stat 926, 43 U.S.C. §525). Payment amounts may differ in future agreements.

Payments will be remitted to:

BOR- Upper Colorado Region
PO Box 301504
Los Angeles, CA 90030-1504

All payments will reference Contract No. 21-WC-40-879

3. Term. This Contract will be effective beginning November 1, 2020, and will be effective until October 31, 2021. Upon execution of this Contract, the District will not retain any permanent right to the use of Project facilities for the storage of ODT Water.

4. United States Not Liable. Neither the United States nor the Association will be responsible for the control, care or distribution of the ODT Water before it is introduced into or after it is discharged from the Project Works. It is specifically understood by the parties that the United States is only providing storage capacity for the ODT Water and does not claim any interest in the acquisition or use of the ODT Water beyond the terms specifically set forth in this Contract. The District will indemnify and hold the United States and the Association and their respective officers, agents, and employees harmless from every claim for legal liability for damages of any nature whatsoever arising out of any actions or omissions of any of the parties and their respective officers, agents, and employees, resulting from the performance of this Contract, including the manner or method in which ODT Water is introduced and stored in Deer Creek. The District further releases the United States and the Association and their respective officers, agents, or employees from every claim for damage to persons or property, direct or indirect, resulting from the United States’ or Association’s determinations of the amount of
excess capacity available in Deer Creek for the storage of ODT Water.

5. This Contract is limited to ODT Water only and establishes no precedent for further storage in either Deer Creek or Jordanelle reservoirs.

STANDARD ARTICLES

6. CHARGES FOR DELINQUENT PAYMENTS

(a) The District shall be subject to interest, administrative, and penalty charges on delinquent payments. If a payment is not received by the due date, the District shall pay an interest charge on the delinquent payment for each day the payment is delinquent beyond the due date. If a payment becomes 60 days delinquent, the District shall pay, in addition to the interest charge, an administrative charge to cover additional costs of billing and processing the delinquent payment. If a payment is delinquent 90 days or more, the District shall pay, in addition to the interest and administrative charges, a penalty charge for each day the payment is delinquent beyond the due date, based on the remaining balance of the payment due at the rate of 6 percent per year. The District shall also pay any fees incurred for debt collection services associated with a delinquent payment.

(b) The interest rate charged shall be the greater of either the rate prescribed quarterly in the Federal Register by the Department of the Treasury for application to overdue payments, or the interest rate of 0.5 percent per month. The interest rate charged will be determined as of the due date and remain fixed for the duration of the delinquent period.

(c) When a partial payment on a delinquent account is received, the amount received shall be applied first to the penalty charges, second to the administrative charges, third to the accrued interest, and finally to the overdue payment.

7. GENERAL OBLIGATION—BENEFITS CONDITIONED UPON PAYMENT

(a) The obligation of the District to pay the United States as provided in this contract is a general obligation of the District notwithstanding the manner in which the obligation may be distributed among the District's water users and notwithstanding the default of individual water users in their obligation to the District.

(b) The payment of charges becoming due pursuant to this contract is a condition precedent to receiving benefits under this contract. The Association shall not make water available to the District through Provo River Project facilities during any period in which the District is in arrears in the advance payment of any charges due the United States or the Association. The District shall not deliver water under the terms and conditions of this contract for lands or parties that are in arrears in the advance payment of any charges levied or established by the Association.

8. CONFIRMATION OF CONTRACT

Promptly after the execution of this contract, the District will provide evidence to the United States that, pursuant to the laws of the State of Utah, the District is a legally constituted entity and the contract is lawful, valid, and binding on the District. This contract will not be binding on the United States until
the District provides evidence to the United States’ satisfaction. In addition to other forms of evidence to meet the requirements of this Article, the District may provide or the United States may require a certified copy of a final decree of a court of competent jurisdiction in the State of Utah, confirming the proceedings on the part of the District for the authorization of the execution of this contract.

9. NOTICES

Any notice, demand, or request authorized or required by this Contract will be deemed to have been given, on behalf of the District, when mailed, postage prepaid, or delivered to the Regional Director, Upper Colorado Basin Region, Bureau of Reclamation, 125 South State Street, Room 6107, Salt Lake City, Utah 84138 and on behalf of the United States, when mailed, postage prepaid, or delivered to the General Manager of the District, 3430 East Danish Road, Cottonwood Heights, Utah 84093. The designation of the addressee or the address may be changed by notice given in the same manner as provided in this article for other notices.

10. CONTINGENT ON APPROPRIATION OR ALLOTMENT OF FUNDS

The expenditure or advance of any money or the performance of any obligation of the United States under this contract shall be contingent upon appropriation or allotment of funds. Absence of appropriation or allotment of funds shall not relieve the District from any obligations under this contract. No liability shall accrue to the United States in case funds are not appropriated or allotted.

11. OFFICIALS NOT TO BENEFIT

No Member of or Delegate to the Congress, Resident Commissioner, or official of the District shall benefit from this contract other than as a water user or landowner in the same manner as other water users or landowners.

12. CHANGES IN DISTRICT’S ORGANIZATION

While this contract is in effect, no change may be made in the District’s organization, by inclusion or exclusion of lands or by any other changes which may affect the respective rights, obligations, privileges, and duties of either the United States or the District under this contract including, but not limited to, dissolution, consolidation, or merger, except upon the United States’ written consent.

13. ASSIGNMENT LIMITED—SUCCESSORS AND ASSIGNS OBLIGATED

The provisions of this contract shall apply to and bind the successors and assigns of the parties hereto, but no assignment or transfer of this contract or any right or interest therein by either party shall be valid until approved in writing by the other party.

14. BOOKS, RECORDS, AND REPORTS

The Association and the District shall establish and maintain accounts and other books and records pertaining to administration of the terms and conditions of this contract, including financial transactions; water supply data; project operation, maintenance, and replacement logs; project land and rights-of-way use agreements; the water users’ land-use (crop census), land-ownership, land-leasing,
and water-use data; and other matters that the United States may require. Reports shall be furnished to
the United States in such form and on such date or dates as the United States may require. Subject to
applicable Federal laws and regulations, each party to this contract shall have the right during office
hours to examine and make copies of the other party’s books and records relating to matters covered by
this contract.

15. RULES, REGULATIONS, AND DETERMINATIONS

(a) The parties agree that the delivery of water or the use of Federal facilities pursuant to this
contract is subject to Federal reclamation law, as amended and supplemented, and the rules and
regulations promulgated by the Secretary of the Interior under Federal reclamation law.
(b) The United States shall have the right to make determinations necessary to administer
this contract that are consistent with its expressed and implied provisions, the laws of the United States
and the State of Utah, and the rules and regulations promulgated by the Secretary of the Interior. Such
determinations shall be made in consultation with the Association.

16. ADMINISTRATION OF FEDERAL PROJECT LANDS

The lands and interests in lands acquired, withdrawn, or reserved and needed by the United
States for the purposes of care, operation, and maintenance of the Provo River Project works may be
used by the Association for such purposes. The Association shall ensure that no unauthorized
encroachment occurs on Federal project lands and rights-of-way. The Association does not have the
authority to issue any land-use agreement or grant that conveys an interest in Federal real property, nor
to lease or dispose of any interest of the United States.

The United States retains responsibility for compliance with the National Historic Preservation
Act of 1966 (NHPA), and the Native American Graves Protection and Repatriation Act of 1990 (NAGPRA).
The Association will notify the United States and, only when on tribal land, also notify the appropriate
tribal official, immediately upon the discovery of any potential historic properties or Native American
human remains, funerary objects, sacred objects, or objects of cultural patrimony.

17. PROTECTION OF WATER AND AIR QUALITY

(a) The Association, without expense to the United States, will care for, operate and
maintain transferred works in a manner that preserves the quality of the water at the highest feasible
level as determined by the United States.

(b) The Association will care for, operate and maintain reserved works in a manner that
preserves the quality of the water at the highest feasible level as determined by the United States. The
United States and the Association do not warrant the quality of the water delivered to the District and
are under no obligation to furnish or construct water treatment facilities to maintain or improve the
quality of water delivered to the District.
(c) The District will comply with all applicable water and air pollution laws and regulations
of the United States and the State of Utah; and will obtain all required permits or licenses from the
appropriate Federal, State, or local authorities necessary for the delivery of water by the District; and
will be responsible for compliance with all Federal, State, and local water quality standards applicable to
surface and subsurface drainage and/or discharges generated through the use of Federal or Association
facilities or project water provided by the Association within its Project Water Service Area.

(d) This article will not affect or alter any legal obligations of the Secretary to provide drainage or other discharge services.

18. CONTAMINATION OR POLLUTION OF FEDERAL PROPERTY

(a) The Association and District shall not allow contamination or pollution of Federal project lands, project waters, or project works of the United States or administered by the United States and for which the Association has the responsibility for care, operation, and maintenance by its employees or agents. The Association and the District shall also take reasonable precautions to prevent such contamination or pollution by third parties.

(b) The Association and the District shall comply with all applicable Federal, State, and local laws and regulations and Reclamation policies and instructions existing, or hereafter enacted or promulgated, concerning any hazardous material that will be used, produced, transported, stored, released, or disposed of in or on Federal project lands, project waters, or project works.

(c) “Hazardous material” means (1) any substance falling within the definition of “hazardous substance,” “pollutant or contaminant,” or “hazardous waste” under the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. § 9601(14), (29), and (33)); (2) oil, as defined by the Clean Water Act (33 U.S.C. § 1321(a)) and the Oil Pollution Act (33 U.S.C. § 2701(23)); (3) thermal pollution, refuse, garbage, sewage effluent, industrial waste, mine or mill tailings, mineral salts, pesticides, and other solid waste, and (4) any other substance regulated as hazardous or toxic under Federal, State, local, or Tribal law.

(d) Upon discovery of any event which may or does result in contamination or pollution of Federal project lands, project water, or project works, the Association shall immediately undertake all measures necessary to protect public health and the environment, including measures necessary to contain or abate any such contamination or pollution, and shall report such discovery with full details of the actions taken to the United States. Reporting shall be within a reasonable time period but shall not exceed 24 hours from the time of discovery if it is an emergency and the first working day following discovery in the event of a non-emergency.

(e) If violation of the provisions of this Article occurs and the Association does not take immediate corrective action, as determined by the United States, the Association may be subject to remedies imposed by the United States, which may include termination of this contract.

(f) The Association shall be liable for any response action or corrective measure necessary to protect public health and the environment or to restore Federal project lands, project waters, or project works that are adversely affected as a result of such violation, and for all costs, penalties or other sanctions that are imposed for violation of any Federal, State, local, or Tribal laws and regulations concerning hazardous material. At the discretion of the United States, the United States may also terminate this Contract as a result of such violation.

(g) The Association shall defend, indemnify, protect and save the United States harmless from and against any costs, expenses, claims, damages, demands, or other liability arising from or relating to the Associations violation of this article.

(h) Reclamation agrees to provide information necessary for the Association, using reasonable diligence, to comply with the provisions of this Article.
19. CLEAN AIR AND WATER

(a) The Association and the District agree as follows:

(1) To comply with all the requirements of section 114 of the Clean Air Act, as amended (42 U.S.C. § 7414), and section 308 of the Clean Water Act (33 U.S.C. § 1318), relating to inspection, monitoring, entry, reports, and information, as well as other requirements specified in those sections, and all applicable regulations and guidelines issued thereunder.

(2) That no portion of the work required by this contract will be performed in a facility listed on the Environmental Protection Agency List of Violating Facilities on the date when this contract was executed unless and until the Environmental Protection Agency eliminates the name of such facility or facilities from such listing.

(3) To use its best efforts to comply with clean air standards and clean water standards at the facility where the contract work is being performed.

(4) To insert the substance of the provisions of this article into any nonexempt subcontract, including this subparagraph (a)(4).

(b) The following definitions apply for purposes of this article:

(3) The term “clean air standards” refers to all enforceable rules, regulations, guidelines, standards, limitations, orders, controls, prohibitions, and other requirements which are contained in, issued under, or otherwise adopted pursuant to the Clean Air Act or Executive Order 11738, an applicable implementation plan as described in section 110 of the Clean Air Act (42 U.S.C. § 7410), an approved implementation procedure or plan under subsection 111(c) or subsection 111(d) of the Clean Air Act (42 U.S.C. § 7411(c) or (d)), or an approved implementation procedure under subsection 112(d) of the Clean Air Act (42 U.S.C. § 7412(d)).

(4) The term “clean water standards” refers to all enforceable limitations, controls, conditions, prohibitions, standards, and other requirements which are promulgated pursuant to the Clean Water Act or contained in a permit issued to a discharger by the Environmental Protection Agency or by a state under an approved program, as authorized by section 402 of the Clean Water Act (33 U.S.C. § 1342), or by local government to ensure compliance with pretreatment regulations as required by section 307 of the Clean Water Act (33 U.S.C. § 1317).

(5) The term “comply” refers to compliance with clean air or water standards. It also refers to compliance with a schedule or plan ordered or approved by a court of competent jurisdiction, the Environmental Protection Agency, or an air or water pollution control agency in accordance with the requirements of the Clean Air Act or Clean Water Act and regulations issued pursuant thereto.
(6) The term “facility” means any building, plant, installation, structure, mine, vessel or other floating craft, location, or site of operations owned, leased, or supervised by a District or subcontractor to be utilized in the performance of a contract or subcontract. Where a location or site of operations contains or includes more than one building, plant, installation, or structure, the entire location or site shall be deemed to be a facility except where the Director, Office of Federal Activities, Environmental Protection Agency, determines that independent facilities are collocated in one geographical area.

20. WATER CONSERVATION

Prior to the delivery of water provided from or conveyed through federally constructed or federally financed facilities pursuant to this contract, the District shall develop a water conservation plan, as required by subsection 210(b) of the Reclamation Reform Act of 1982 and 43 C.F.R. 427.1 (Water Conservation Rules and Regulations).

21. EQUAL EMPLOYMENT OPPORTUNITY

During the performance of this contract, the District agrees as follows:

(1) The District will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The District will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The District agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the United States setting forth the provisions of this nondiscrimination clause.

(2) The District will, in all solicitations or advancements for employees placed by or on behalf of the District, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The District will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee’s essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the District’s legal duty to furnish information.

(4) The District will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency United States, advising the labor union or workers’ representative of the District’s commitments under section 202 of Executive Order No. 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
(5) The District will comply with all provisions of Executive Order No. 11246 of Sept. 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The District will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the Contracting Agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the District’s noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be canceled, terminated or suspended in whole or in part and the District may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of Sept. 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The District will include the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by the rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontract or vendor. The District will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event the District becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the District may request the United States to enter into such litigation to protect the interests of the United States.

22. COMPLIANCE WITH CIVIL RIGHTS LAWS AND REGULATIONS

(b) These statutes prohibit any person in the United States from being excluded from participation in, being denied the benefits of, or being otherwise subjected to discrimination under any program or activity receiving financial assistance from the Bureau of Reclamation on the grounds of race, color, national origin, disability, or age. By executing this contract, the District agrees to immediately take any measures necessary to implement this obligation, including permitting officials of the United States to inspect premises, programs, and documents.

(c) The District makes this agreement in consideration of and for the purpose of obtaining any and all Federal grants, loans, contracts, property discounts, or other Federal financial assistance extended after the date hereof to the District by the Bureau of Reclamation, including installment payments after such date on account of arrangements for Federal financial assistance which were approved before such date. The District recognizes and agrees that such Federal assistance will be
extended in reliance on the representations and agreements made in this article and that the
United States reserves the right to seek judicial enforcement thereof.

(d) Complaints of discrimination against the District shall be investigated by the United States’
Office of Civil Rights.

23. CERTIFICATION OF NONSEGREGATED FACILITIES

The District hereby certifies that it does not maintain or provide for its employees any
segregated facilities at any of its establishments and that it does not permit its employees to perform
their services at any location under its control where segregated facilities are maintained. It certifies
further that it will not maintain or provide for its employees any segregated facilities at any of its
establishments and that it will not permit its employees to perform their services at any location under
its control where segregated facilities are maintained. The District agrees that a breach of this
certification is a violation of the Equal Employment Opportunity clause in this contract. As used in this
certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and
wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing
areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing
facilities provided for employees which are segregated by explicit directive or are in fact segregated on
the basis of race, creed, color, or national origin, because of habit, local custom, disability, or otherwise.
The District further agrees that (except where it has obtained identical certifications from proposed
subcontractors for specific time periods) it will obtain identical certifications from proposed
subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the
provisions of the Equal Employment Opportunity clause; that it will retain such certifications in its files;
and that it will forward the following notice to such proposed subcontractors (except where the
proposed subcontractors have submitted identical certifications for specific time periods):

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENT FOR CERTIFICATIONS OF
NONSEGREGATED FACILITIES

A Certification of Nonsegregated Facilities must be submitted prior to the award of a
subcontract exceeding $10,000 which is not exempt from the provisions of the Equal Employment
Opportunity clause. The certification may be submitted either for each subcontract or for all
subcontracts during a period (i.e., quarterly, semiannually, or annually). Note: The penalty for making
false statements in offers is prescribed in 18 U.S.C. § 1001.

24. PEST MANAGEMENT

(a) The Association is responsible for complying with applicable Federal, State, and local laws,
rules, and regulations related to pest management in performing its responsibilities under this contract.
(b) The Association is responsible for effectively avoiding the introduction and spread of, and
for otherwise controlling, undesirable plants and animals, as defined by the United States, on or in
Federal project lands, Federal project waters, and Federal project works for which and to the extent that
the District has operation and maintenance responsibility. The Association is responsible for exercising
the level of precaution necessary in meeting this responsibility, including inspecting its vehicles,
watercraft, and equipment for reproductive and vegetative parts, foreign soil, mud or other debris that
may cause the spread of weeds, invasive species and other pests, and removing such materials before
moving its vehicles, watercraft, and equipment onto any Federal land, into any Federal project facility
waters, or out of any area on Federal project land where work is performed.
(c) Where decontamination of the Association’s vehicles, watercraft, or equipment is required prior to entering Federal project land or waters, the decontamination shall be performed by the Association at the point of prior use, or at an approved offsite facility able to process generated cleaning wastes, pursuant to applicable laws, rules, and regulations. Upon the completion of work, the Association will perform any required decontamination within the work area before moving the vehicles, watercraft, and equipment from Federal project lands and waters.

(d) Programs for the control of undesirable plants and animals on Federal project lands, and in Federal project waters and Federal project works for which the Association has operation and maintenance responsibility will incorporate Integrated Pest Management (IPM) concepts and practices. IPM refers to a systematic and environmentally compatible program to maintain pest populations within economically and environmentally tolerable levels. In implementing an IPM program, the Association will adhere to applicable Federal and State laws and regulations and Department of the Interior and Bureau of Reclamation policies, directives, guidelines, and manuals, including but not limited to, the Department of the Interior Manual, Part 517 Integrated Pest Management Policy and Part 609 Weed Control Program, the Plant Protection Act of June 20, 2000 (Pub. L. 106-224), and Executive Order 13112 of February 3, 1999.

25. MEDIUM FOR TRANSMITTING PAYMENTS

(a) All payments from the District to the United States under this contract shall be by the medium requested by the United States on or before the date payment is due. The required method of payment may include checks, wire transfers, or other types of payment specified by the United States.

(b) Upon execution of the contract, the District shall furnish the United States with the District’s taxpayer’s identification number (TIN). The purpose for requiring the District’s TIN is for collecting and reporting any delinquent amounts arising out of the District’s relationship with the United States.

26. CONTRACT DRAFTING CONSIDERATIONS

This Contract has been negotiated and reviewed by the parties hereto, each of whom is sophisticated in the matters to which this Contract pertains. Articles 1 through 26 of this Contract have been drafted, negotiated, and reviewed by the parties, and no one party shall be considered to have drafted the stated articles.
IN WITNESS WHEREOF, the parties hereto have caused this Contract to be duly executed for the
dates above written.

Background

The Provo River Project (Project) provides a supplemental water supply for irrigation of 48,156 acres of highly developed farmlands in Utah, Salt Lake, and Wasatch Counties, as well as an assured domestic water supply for the cities of Salt Lake City, Provo, Orem, Pleasant Grove, Lindon, American Fork, and Lehi, Utah. The key feature of the Project, Deer Creek Dam, is located on the Provo River east of the project lands. Other significant Project features are the Power Plant at Deer Creek Dam, the 42-mile Salt Lake Aqueduct and Terminal Reservoir, Weber-Provo Diversion Canal, Duchesne Tunnel, Murdock Diversion Dam, Provo Reservoir Canal Enlargement, Jordan Narrows Siphon and Pumping Plant, and the South Lateral. The Salt Lake Aqueduct and Terminal Reservoir make up the Aqueduct Division; all other features are included in the Deer Creek Division.

Deer Creek Reservoir stores Provo River floodwater, surplus water of the Weber River diverted by the enlarged Weber-Provo Diversion Canal, and surplus water from the headwaters of the Duchesne River diverted by the 6-mile Duchesne Tunnel.

Releases from the reservoir for the Aqueduct Division are diverted at the dam into the Salt Lake Aqueduct. The Salt Lake Aqueduct, a 69-inch-diameter concrete pipeline, is 42 miles long, and has a capacity of 150 cubic feet per second. The Salt Lake Aqueduct delivers water to Salt Lake City and is a critical supplement to the city’s municipal and industrial (M&I) water supply. The Metropolitan Water District of Salt Lake and Sandy (District) operates and maintains the Aqueduct Division.

The District was established in 1935 by the Salt Lake City Commission. Salt Lake City is the founding member and Sandy City joined the District in 1990. The District’s primary function is to create a firm water supply for its member cities. The District also provides water to other entities on a surplus basis.

The District receives its water supply from Little Cottonwood Canyon, Bell Canyon, the Provo River Project, the Ontario Drain Tunnel (ODT), Little Dell Reservoir, and the Central Utah Project. Through the Project, the District is a shareholder of the Provo River Water Users Association. The Project includes the Salt Lake Aqueduct, Deer Creek Dam, Provo Reservoir Canal, and the Weber-Provo Canal. The Central Utah Project includes Jordanelle Reservoir, Jordan Aqueduct, and the Jordan Valley Water Treatment Plant.

Carriage of M&I water in Reclamation facilities is not authorized by the Warren Act, but was authorized specifically for Provo River Project facilities by Section 2 of the Act of December 19, 2002 (Public Law 107-366).

Mining in the 1800s in the Park City area was often difficult and expensive due to the enormous amount of water encountered at depths of even 100 to 200 feet underground. Initial pumping efforts were met with huge costs and limited success. In 1881, the owners of the Ontario Mine in Ontario Canyon, completed one of the earliest drainage tunnels to removed water from the mine and divert it to the surface.

In 1888, a second tunnel of approximately 3 miles in length\(^1\) was constructed to drain additional water from the mine, to allow for further extraction of valuable ores. This tunnel is called the ODT No. 2, and produces an average of 13,144 acre-feet of water annually into the Provo River drainage. Although ore extraction has ceased in the old Ontario Mine, the tunnel remains open due to the value of the water that is removed. ODT is operated and maintained by the Jordanelle Special Service District (JSSD), which also operates a water treatment facility below the tunnel outlet to remove heavy metals from the water, prior to its introduction into Jordanelle Reservoir (see Environmental Assessment for Jordanelle Reservoir Resource Management Plan p. 3-18). JSSD currently discharges the ODT water into Jordanelle Reservoir under Utah Pollutant Discharge Elimination System Permit (UPDES) No. 0022403 dated October 27, 2003. Documentation shows ODT water being discharged into the Provo River for nearly 130 years, with the accompanying water rights being adjudicated in the “Morris Decree” of 1921.

**Description of Project Facilities**

The Project includes 1 dam and reservoir, 4 diversion dams, about 84 miles of conveyance works including: tunnels, aqueducts, canals, and laterals, a power plant, a pumping plant, and a terminal reservoir. Construction of the Project began in May 1938, with the first water becoming available in 1941 upon the completion of Deer Creek Dam.

Construction of some features of the Project was severely hampered by wartime scarcities of manpower, materials, and funds. Work on the Duchesne Tunnel had to be stopped in 1942, although construction continued on a small scale on the canal system and Salt Lake Aqueduct.

In 1947, full-scale construction was resumed. Construction of features of the Aqueduct Division was started in 1939 and completed in 1951.

The Deer Creek Power Plant was completed in 1958.

All features of the Deer Creek Division are operated and maintained by the Provo River Water Users Association. The District operates and maintains the aqueduct system along with two water treatment plants to meet the needs of its customers.

**Purpose and Need for Action**

The purpose of the proposed action is to allow the District the option of storing available ODT water in Deer Creek on a space-available basis over the next five years. After the temporary contract has expired in five years, a long-term contract may be negotiated on similar terms and conditions, upon approval by the Commissioner of Reclamation. Project water maintains full priority and cannot be negatively impacted by this action. Storage of ODT water in Deer Creek would allow the District to be more efficient in its operations and better meet the demands of its member cities. This Environmental Assessment (EA) analyzes the impacts resulting from the storage of ODT water in Deer Creek. The ability to store ODT water will allow the District to reduce chemical costs to treat its M&I water.

The District has requested the proposed action to promote the efficient use of its water resources, as this action has the potential to benefit the water users in the Salt Lake Valley. The carriage contract was written to have no detrimental effects to either the Central Utah or Provo River Projects.

**Proposed Action**

The District has the rights to approximately 5,000 acre-feet of water from the ODT which currently flows into Jordanelle Reservoir, down the Provo River into Deer Creek Reservoir, and then into the Salt Lake Aqueduct where it is delivered to Salt Lake County for M&I use. The District has requested that Reclamation issue a five year contract for the storage of up to 4,000 acre-feet of ODT water in Deer Creek Reservoir, on a space-available basis, which it would deliver later in the year when runoff from the canyons east of Salt Lake has declined.

The potential impacts of storing additional water in Deer Creek during the summer months has been evaluated by professional engineers at Reclamation and the Provo River Water Users Association, which operates Deer Creek. With a reservoir capacity of 152,570 AF, the 4,000 AF of requested storage would only
comprise 2.6 % of the volume of Deer Creek. In the event that Deer Creek Reservoir fills with Project water, the District’s stored water would lose all privileges to remain in Deer Creek. The District would only be allowed to store ODT water in Deer Creek at the operator’s discretion and when space were available, if Deer Creek fills with Reclamation Project water, Metro would lose all storage ability. The District would only store ODT water in Deer Creek until October 31 of each year. Maintaining additional water in Deer Creek during the summer months could possibly create an incidental benefit to local fish and wildlife populations. The proposed action would not accept new water into Reclamation facilities, it would only allow up to 4,000 AF of the District’s ODT water to be stored temporarily in Deer Creek Reservoir, instead of being taken immediately at the Salt Lake Aqueduct as it enters the reservoir.

The Proposed Action would require no capital outlay or extra operation and maintenance expenditures because the action would demand no changes to project features or operations. The proposed action would not affect the operation of any reservoir or constructed facility within the Project. Release from upstream reservoirs and maintenance of flows for fish or other purposes would continue in accordance with past practice.

No Action Alternative

Under the No Action Alternative, ODT water would continue to be discharged into Jordanelle Reservoir and be delivered down the Provo River into Deer Creek and into the Salt Lake Aqueduct on a run-of-the-river basis, as has been occurring for many years. This would not meet the applicant’s need, because stored water would not be available for late season use when natural water flows diminish and water demands peak.
Environmental Consequences

The proposed action of allowing the District the option to store up to 4,000 acre-feet of ODT water in Deer Creek on a space-available basis, would require no ground-disturbing activities, and would not result in any new water being introduced into the Provo River drainage; nor would there be any changes to timing, quantity, or quality of water currently being discharged into Jordanelle Reservoir. No new water delivery facilities would be constructed, and no change in the use of project water would occur under this proposal.
As noted in the Background section above, the District acquired approximately 5,000 of the 13,144 acre-feet of ODT water in 2004 and this water is currently treated to drinking water standards by JSSD under a UPDES Permit before being released into Jordanelle Reservoir, where it is delivered through Deer Creek Reservoir and taken immediately to the Salt Lake Aqueduct below Deer Creek Dam, to be delivered to the Salt Lake Valley. If ODT water were to fall below federal and state water quality standards, it would no longer be allowed to be stored in Deer Creek Reservoir.

There are no anticipated impacts to any of the following resources as a result of the proposed action: threatened and endangered species, farmlands, flood plains, water quality, wetlands, wild and scenic rivers, hazardous or solid wastes, air quality, cultural resources, and Native American concerns. A no effect determination was made on each of the following environmental issues individually and cumulatively. Therefore, no further analysis is needed.
