

- Booster Station No. 2 (referred to in the EID as part of the distribution system)

Chimayó would also construct a twelve foot square concrete block building located inside a locked six foot high chain link fence. The facility would be connected to the distribution system (8-inch diameter water line). In addition, this station would be constructed along County Road RA 100 and would provide the necessary water pressure to Zone 4 shown on the drawing in Appendix B.

- Construct 1450 feet of 8-inch water lines on the right of way of road number RA 100.

An 8-inch water pipe would be installed in a four foot deep trench within the road right of way. Since the existing road is paved, the road would be repaved over the area that would be trenched.

For safety, traffic control would be required.

- Construct 4050 feet of 12-inch water lines on the right of way of road number RA 88, 87, and 101.

A 12-inch water pipe would be installed in a four foot deep trench within the road right of way. Since the existing road is paved, the road would be repaved over the area that would be trenched.

For safety, traffic control would be required.

- Apply a base course on gravel road numbers SF94, 94A, a portion of SF92A, RA 101, and RA 103.

A 4-inch layer of new base course gravel would replace the existing gravel base. The new base course gravel will be spread and compacted to match the width of the existing road.

Chapter 3. AFFECTED ENVIRONMENT/ENVIRONMENTAL CONSEQUENCES

3.1 Introduction

The relevant affected resources and the environmental consequences of the proposed action are described in Chapter 3 of the EID and are incorporated by reference in this EA. However, Indian Trust Assets (ITA) have not been included as an affected resource. The Department of Interior policy requires Reclamation to carry out its activities in a manner which avoids adverse impacts to ITAs when possible. As a result, a section in NEPA documents is required. The following statement therefore addresses ITAs for this supplement to the EID to fulfill that requirement for Reclamation:

3.1.1. Indian Trust Assets

Indian Trust Assets (ITAs) are legal interests in property held in trust by the United States for Indian tribes or individuals. For example, ITAs include land, minerals, hunting and fishing rights, and water rights. The proposed project is not anticipated to have any effect on ITAs. As a result, there would be no environmental consequences as a result of the proposed action.

3.1.2. Cultural Resources

In an effort to insure that cultural resources affected by the proposed action of this supplement has been considered, the following describes Reclamation's involvement regarding cultural resources:

The Booster Station, Water Fill Station, construction of two water lines, and construction of a base course over an existing road were reviewed by a Reclamation archeologist. The review included field trips, review of the EID's archeological survey of the proposed project, and several phone calls to the New Mexico State Historic Preservation Office (SHPO). The conclusions of the review indicated that the proposed undertaking would not alter, directly, or indirectly any characteristics of historic properties. No additional investigations regarding the proposed actions are recommended.

3.2. Irreversible and Irretrievable Commitment of Resources of the Proposed Action

No resources of this kind were identified in the EID.

3.3. Cumulative Impacts

Cumulative impacts on resources have been described in the EID and are incorporated by reference in this document. No cumulative impacts have been identified concerning ITAs and cultural resources.

Chapter 4. Environmental Commitments

Should evidence of possible scientific, prehistorical, historical, or archeological data be discovered during the course of this action, work shall cease at that location and the Area archaeologist shall be notified by phone immediately, with the location and nature of the findings. Care shall be exercised so as not to disturb or damage artifacts or fossils uncovered during operations, and the proponents shall provide such cooperation and assistance as may be necessary to preserve the findings for removal or other disposition by the Government.

Discovery of Human Remains. Any person who knows or has reason to know that he or she has inadvertently discovered human remains on Federal or tribal lands, must provide immediate telephone notification of the inadvertent discovery, with written confirmation, to the responsible Federal agency official with respect to Federal lands, and, with respect to tribal lands, to the
