Subject: Finding of No Significant Impact for the Parallel Pipeline Project – Provo Reservoir Canal – Provo River Project, Utah

Dear Ladies and Gentlemen:

The Bureau of Reclamation (Reclamation), in compliance with the National Environmental Policy Act (NEPA), the Council on Environmental Quality, and the Department of the Interior regulations implementing NEPA, completed an environmental assessment (EA) to determine authorization for the Provo River Water Users Association (Association) to construct a 3,200 foot-long, up to a 96 inch-diameter, steel pipeline. On November 30, 2010, Reclamation notified you that the Draft EA was available for review and comment.

The comment period ended on December 30, 2010, one comment was received during that period, and appropriate edits were made. A copy of the final EA will be posted to Reclamation's Upper Colorado Region web site at [www.usbr.gov/uc/envdocs/index.html](http://www.usbr.gov/uc/envdocs/index.html) and will be made available to anyone who requests a CD.

After review of this comment, Reclamation has determined that a Finding of No Significant Impact (FONSI) is appropriate for the proposed action. A copy of the signed FONSI is enclosed for your information. The FONSI authorizes the Association to construct a steel pipeline parallel to the existing Provo Reservoir Canal Siphon from the inlet of the existing Provo Reservoir Canal Siphon at the mouth of Provo Canyon, just north of the Highway 189 interchange on 800 North in Orem, Utah.

If you have any questions, please contact Mr. Rafael Lopez at 801-379-1185.

Sincerely,

Curtis A. Pledger  
Area Manager

Enclosure
