Dear Sir:

696-1

This letter is to demonstrate my support for the construction/building of the Narrows Dam and Reservoir. It is obvious that the time for this project to go forth is many years overdue!

The documentation, contracts, overdue promises, justification, water rights, financial concerns and environmental impact studies have all been addressed and completed. It is past time to construct this much needed water project. The project would enhance the area and benefit all parties that have a vested interest and need for its completion.

As a current farmer/rancher in Sanpete County and lifetime Utah resident, etc. My family strongly supports this project. The facts, evidence and mutual benefits are overwhelming. Nothing else is needed it's time to fund this project.

Sincerely,

M. Vinson Miner Ph.D.
