- (1) This compliance line item covers those activities that occur as a result of AMWG recommendations to the Secretary of the Interior.
- (2) Temperature Control Device environmental compliance, preconstruction design and construction costs are covered by appropriated funds.
- (3) This contract administration line item covers the Native American cooperative agreements and the contracts for AMWG facilitation and TWG chair reimbursement.
- (4) Native American participation consists of equal funding of each of the 5 involved tribes and is not tied to specific monitoring and research activites (5 tribes x \$80,000 per tribe = \$400,000). An additional \$75,000 is expected in FY 2001 from appropriations in addition to \$325,000 in AMP funding for a total of \$400,000 to fund participation.
- (5) In FY 2000, the \$80,000 cost for the tribal monitoring trips will be funded by appropriations. In FY 2001 and following, Tribal monitoring trips will be funded as an AMP administrative cost.
- (6) Completion of the Historic Preservation Plan is expected in FY 2001 as the result of a delayed start on the cultural PEP review.

 Should the HPP be completed in FY 2000, this \$50,000 cost in FY 2001 would be transferred to FY 2001 monitoring and mitigation.
- (7) The specifics of the FY 2001 and 2002 monitoring and mitigation activities will be unclear until the PEP and HPP are completed. It is important to note that 13 sites have been identified by the National Park Service in the Grand Canyon that are in critical need of some type of protection or mitigation.
- (8) For FY 2001 and 2002, the tribal cooperative agreements will be replaced by the participation line item 2.A.
