Background Information

AMWG Tribal members and others have worked on a Tribal Consultation Plan for the Glen Canyon Dam Adaptive Management Work Group (AMWG). While several iterations of this document were circulated, it was not finalized. The latest version was dated August 11, 2004. This document is attached and labeled "Attachment 1."

DOI and DOE then drafted a tribal consultation plan dated August 25, 2009, which also was not finalized. That draft plan is attached and labeled "Attachment 2."

As directed by the Obama Administration on November 5, 2009, the Department of the Interior has promulgated a Tribal Consultation Plan, as well as Secretarial Order 3317 that was signed by the Secretary on December 1, 2011. These documents are also attached, and labeled "Attachment 3" and "Attachment 4."

During this agenda item, Anne Castle will discuss this history with the AMP, and come to agreement on next steps for AMWG. This may include the initiation of a process to finalize the AMWG tribal consultation plan and ensure its consistency with the DOI plan and order.
