SUGGESTIONS for FURTHER / FUTURE CONSIDERATION

1. As part of the 5-year review of Humpback chub action triggers, Reclamation and GCMRC to consider humpback chub larval variability. Consider comparison of HBC recruitment response to the ecosystem to the recruitment response of other native fish species.
2. AMWG to consider tasking the TWG / GCMRC to more broadly consider drought implications to the system and the Program.
3. AMWG to consider tasking the TWG or FLAHDG to develop alternative hydrographs, consistent with the LTEMP ROD, for a potential future Bug Flows experiment.
